2. Summary of duties

The team at the OU runs a large aggregator of research papers called CORE and a set of projects promoting principles of Open Science (FOSTER+, FT4RRI). CORE provides free access to the full-texts of 8 million+ Open Access research papers as well as a number of information services for researchers and organizations. These include services enabling text & data mining, recommender systems, content management services for libraries & repositories and the provision of an API. We are also in the process of developing analytical services to support business intelligence for research.

We are currently looking for a Web Developer (Front-end & CMS) to join our team of developers and researchers. This is a great opportunity to work at the intersection of research and development.

The appointment will be made on the Grade 6 of the Salary Scale for Support (Technical) Staff, ranging £26,495 to £31,604 pa depending on qualifications and experience.

JOB DESCRIPTION

You will work as part of a team of developers and researchers on improving the front-end UI/UX experience of CORE users. Additionally, you will be involved in improving our e-learning platform delivering training materials and courses on Open Science. You will work in the team at the Knowledge Media Institute, Open University.

Specific Tasks:
- Improving the UI/UX of a range of web applications;
- Performing user testing and daily operation of existing web applications;
- Extending the functionality of existing web applications, such as e-learning solutions based on CMS.

3. Person specification

Requirements  (E = Essential/ D = Desirable)

Education, qualifications and training

A degree in Computer Science or related field (D)

Knowledge, work and other relevant experience

Essential:
- Good knowledge and at least 3-year experience with web development;
- Good skills in PHP, especially applied to web development;
- Working knowledge of Javascript, CSS and HTML;
- Working knowledge of MySQL or other databases;
- Working knowledge of the Linux environment.

Desirable:
- Experience working with CMS, especially PHP CMS, preferably Drupal;
- Experience with CSS3 and HTML5;
- Experience with data visualization frameworks;
Experience with developing APIs;
Experience with code sharing, issue tracking (JIRA, GIT), testing.

Personal abilities and qualities

Essential:
- Ability to quickly demonstrate understanding of the project aims and specific task as requested;
- Willingness to follow an agile development according to Scrum;
- Fluency in English;
- Ability to write technical reports and document code;
- Team player;
- Hard worker;
- Good communicator;
- Ability to work to challenging targets.

Desirable: n/a

4. Role specific requirements e.g. Shift working

n/a

5. About the unit/department

Faculty of Science, Technology, Engineering & Mathematics
