

Menu

This app has been designed to help you to learn the names, positions and actions of some of the major muscles in the body.

You can move the model around to look at the front, side and the back and zoom in to explore key muscles and the actions they perform.

Using this menu tab you can select / deselect pins that, when individually tapped, will help you

Show Digestive System

Show Pins

Reset Model

Self-Test

Change Colour

AR Mode

Activity Tracker

Help

Navigating the E117 App

The menu functions are explained below:

Changes model to show the digestive system

Displays interactive pins you can tap to reveal further information on both models

Resets the model

A quiz to test knowledge of the muscular system

Offers a range of colour options

Changes view to desktop mode (if viewing in desktop mode this will show as 'augmented reality')

Once activated displays activity data from tracker

Help and support function
