THE DEVELOPMENT OF THE PhD DEGREE IN BRITAIN, 1917-1959 AND SINCE:
An Evolutionary and Statistical History in Higher Education

Renate Simpson

Contribution to Scholarship:
This book examines the first half-century of the British PhD. The work begins with a study of the development of the new degree from the point of view of the decision-making bodies of the Universities - Senates, Faculty Boards, the teaching staff and the administrators. The second part provides detailed statistics and analysis on Faculties, Departments, overseas students, year of admission, gender, age, completion rates and duration of studies, part-time study and staff candidates, with more than 200 Tables and Figures.

From the Foreword:
“To describe Renate Simpson’s work in this book as statistical history would itself be congratulatory, but it is a great deal more than that. It is also outstandingly careful, meticulous detective work which addresses issues and implications.”

– Prof. Harold Silver
University of Plymouth

From a Peer Review:
“... will not only be a record of the past but also has the potential to impact on present and future policies in respect of higher degrees. It is clear from this study that many of the practices that are thought to be innovatory have substantial histories and that we can learn from their trajectories of success and failure.”

– Prof. Richard Aldrich
University of London
