II The course of studies I

What “Course of Studies”?

- From admission to submission (I)
  - the prescribed minimum length of course
- Residence and leave to study elsewhere
- Supervision
  - Early views on the role of the supervisor
  - The role of the PhD supervisor in practice
  - Who chooses the topic?
  - Supervisor and thesis
  - The supervisor reports
  - The overburdened supervisor

III The course of studies II

Choice of topic - its timing and formulation

- Training in research and courses of instruction
  - Early views
  - To the end of the 1930s
  - Post-World War II developments
- Foreign languages as a requirement for the PhD
  - In the USA
  - At the University of Edinburgh
- From admission to submission (II) - the maximum time allowed

IV The end product - the thesis

Submission of the thesis

- How long should a thesis be? Cambridge - a case history
- Conjoint/collaborative work for the PhD
- Two degrees for the same work? Oxford - a case history
Printing the thesis in Germany and America 128
“Publishability” of the thesis in Britain 131
Access to the unpublished thesis 135
Published work submitted in place of a thesis or in its support 141

V The ordeal 143
  The oral examination (and the written) 143
  The appointment of examiners 150
    (a) The external/non-resident examiner 152
    (b) The supervisor as examiner 154
  The independence of individual examiners 158
  Examiners’ reports 160

VI The verdict - the outcome 165
  What makes a PhD? 165
  Referral, revision, re-submission 173
  The Master’s degree in lieu 177
    (a) At Oxford 177
    (b) At Cambridge 181
    (c) At the University of London 187
    (d) At Edinburgh 190
    (e) At Manchester 191

VII Part-time students and staff candidates 195
  Part-time study 195
    (a) At the University of London 198
    (b) At Manchester 201
    (c) At Edinburgh 204
    (d) At other Universities 205
  Staff candidates for the PhD 206
Part 2   The British PhD in Numbers

I   Overview of the PhD student population

   The inadequacy of quantitative data on the PhD student population - then and now
   215
   How the sample was chosen
   220
   Date of admission to the PhD course
   228
   Faculties and Departments
   228
   Home and Overseas Students - University of first degree
   231
   Men and women PhD students
   232
   Age of PhD students at admission
   232
   Part-time study and staff candidates for the PhD
   233
   Submission, outcome and duration of studies
   234
   The role of the institutions at which PhD students studied
   235

IIA What PhD students studied - the Faculties

   The unitary PhD versus disciplinary flexibility
   237
   Arts and Science
   240
   The relative strength and growth of the PhD in the Faculties
   245
   (a) Special episodes - including the effect of the War
   249
   (b) The varying strength of the Faculties in the institutions
   251
   (c) The distribution of undergraduate students among the Faculties and the relative size of their postgraduate sector
   258
      (i) Arts holds its own amongst undergraduates, whilst Science rules heavily beyond
      259
      (ii) Why school leavers choose Arts
      261
      (iii) The pool of graduates eligible for postgraduate studies in the various Faculties
      267
      (iv) Alternatives to postgraduate study
      270
      (v) What students from the various Faculties did with their higher degrees
      274
   An early instance of pleas for the abolition of the PhD
   280
II B  What PhD students studied - the Departments

(a) Departments in the Faculty of Arts
   (i) Over the years
   (ii) Divinity
   (iii) History
   (iv) Other Arts Departments
(b) Departments in the Faculty of Social Science
   (i) Economics
   (ii) Psychology and the special case of UCL
   (iii) Other Social Science Departments
(c) Departments in the Faculty of Science
   (i) The supremacy of Chemistry
   (ii) Other Departments of Science
   (iii) The relative size of the Science Departments in the various institutions
(d) Departments of Technology
Departments compared - irrespective of Faculty
Genesis of the Postgraduate School of Theology at Edinburgh

III  PhD students’ origins - University or country of first degree

Origins of the PhD population as a whole
To stay or not to stay - migration of home students from the University of their first degree
Home and overseas students at individual institutions
   (a) “Science” and “Rhodes” Scholars and the PhD
   (b) Geo-academic origins of PhD students from overseas
Home and overseas students in Faculties and Departments
Classification of PhD students by institution or country of first degree

IV  Gender and the PhD

The odds that a woman embarks on a PhD

(a) Girls ‘fall behind’ even before they leave school 375
(b) What happens at University entrance? 377
(c) Women and men - wastage at undergraduate level and class of degree 380
(d) Women’s aspirations to proceed to a higher degree 386

Women and men PhD students at the institutions, in Faculties and Departments 391
(a) Women at the institutions 391
(b) Women in Faculties and Departments 396

Women and men PhD students from home and overseas 401
(a) At the institutions 401
(b) Over the years 402
(c) In Faculties and Departments 403
(d) Geo-academic origins 405

A brief glance at more “recent” times - thanks to a temporary improvement in national statistics 408

V How old were PhD students? 411
Age and age groups 411
Age at admission according to Faculty and Department 418
Differences in age between students from home and overseas 423
Differences in age between home students who stayed at the University of their first degree and those who migrated 429
Gender and age 431

VI Part-time study and staff candidates 435
Who studied part-time? 435
(a) Part-time study in Faculties and Departments 438
(b) Part-time students from home and overseas 442
(c) Women among part-timers 445
(d) Did age affect the mode of study? 446
Staff candidates for the PhD 448
VIIIA How long did they take? Duration of studies - from admission to completion (I)  
The picture overall 551  
Changes in the duration of studies over the years 556  
Institutional variations in time taken to the PhD 560  
Time taken to complete - students from home and overseas 567  
Time taken to complete - according to Faculty 576  
Departmental variations in time taken to the PhD 586  
A somewhat unusual PhD student from overseas 591

VIIIIB How long did they take? Duration of studies - from admission to completion (II) 595  
Women, men and time to complete the degree 595  
Time taken - does age matter? 597  
Did transfer in from a Master’s course affect the duration of studies for a PhD? 604  
Completers who had to revise their thesis - how long the delay? 608  
Completion rate and time to degree 612

VIIIC How long did they stay? - Non-completers’ duration of studies 615  
Students who left without a PhD 615  
Non-completers who submitted a thesis and those who did not - how long did they stay? 623  
Completion rates compared with “submission rates” as defined by today’s Research Councils 631

IX How PhD part-timers and staff candidates fared - completion and duration of studies 633  
Part-timers’ completion rates 634  
(a) Over the years 636  
(b) Institutional variations 637  
(c) In Faculties and Departments 639  
(d) Home and overseas students 641
(e) Women and men part-time PhD students
(f) The effect of age at admission

Other outcomes of part-time study

Part-time completers’ duration of studies
(a) Over the years
(b) Institutional variations
(c) In Faculties and Departments
(d) Home and overseas students
(e) Women and men PhD part-timers
(f) The effect of age at admission

Part-time students who left without a PhD - how long did they stay?

PhD staff candidates’ completion rates
PhD staff candidates - how long did they take to complete?
