A   Introduction and background

   A1   Introduction
   A2   What are OU validated awards?

B   The awards approval process

   B1   Criteria for initial consideration
   B2   The principles and process of institutional approval
   B3   Stages in the approval process

C   Procedures following institutional approval or review

   C1   Institutional agreement
   C2   Information about the University to students and staff
   C3   Relationships with University staff
   B4   Decisions arising from institutional approval meetings

D   Validation and revalidation

   D1   Principles for validation and revalidation
       • D1.1 The rationale, aims and intended learning outcomes of the programme of study
       • D1.2 The curriculum and structure of the programme of study
       • D1.3 Teaching and learning
       • D1.4 Principles related to programme management and monitoring
       • D1.5 Admissions and transfer
       • D1.6 Assessment regulations
       • D1.7 Staffing, staff development and research
       • D1.8 Teaching and learning resources
       • D1.9 Other resources for students
• D1.10 Information publicly available to students, their advisors, employers and other stakeholders
• D1.11 Equality and diversity

D2 Validation and revalidation
• D2.1 Development of new programmes
• D2.2 Outcomes of the validation planning meeting
• D2.3 The preliminary (re)validation meeting
• D2.4 Documentation for the final (re)validation meeting
• D2.5 Possible outcomes of (re)validation
• D2.6 Correspondence events

D3 Approval of foundation degrees

D4 Approval of flexible and distributed learning courses and programmes
• D4.1 Flexible and distributed learning (FDL)
• D4.2 Process for seeking validation
• D4.3 Following validation

D5 Changes to programmes of study

D6 Other validation and revalidation issues
• D6.1 Approval of programmes offered in new subject areas
• D6.2 Approval of programmes offered in collaboration between institutions
• D6.3 Approval of programmes validated by other validating universities
• D6.4 The charge for validation and revalidation
• D6.5 Procedures for appeals against panel judgements
• D6.6 Programme closure

E Annual monitoring

E1 What is annual monitoring?
E2 Scrutinising the annual monitoring reports
E3 Feedback
E4 Using feedback

F Assessment and External Examiners

F1 Assessment regulations for validated awards
• F1.1 Definition and purpose of assessment
• F1.2 Examiners’ judgement
• F1.3 Types and methods of assessment
• F1.4 Regulations on assessment
• F1.5 Scheduling, timing and volume of assessment
• F1.6 Staff development and training related to assessment
• F1.7 Assessment guidelines to students
• F1.8 Feedback to students on performance
• F1.9 Assessment arrangements for students with impairments
• F1.10 Identification of all elements of assessment
• F1.11 Processes for internal moderation of marks
• F1.12 External moderation of marks
• F1.13 Provision for exit awards
• F1.14 Penalties for late or non-submission of work
• F1.15 Identification of requirements from professional, statutory and regulatory bodies
• F1.16 Programme regulations on progression and attendance
• F1.17 Definitions of academic misconduct
• F1.18 Procedures for dealing with academic misconduct
• F1.19 Reassessment and resits
• F1.20 Reassessment regulations specific to honours degrees and the MEng
• F1.21 Reassessment regulations specific to masters degrees and postgraduate diplomas
• F1.22 Reassessment regulations specific to professional doctorates
• F1.23 Provisions for compensation
• F1.24 Extenuating circumstances
• F1.25 Aegrotat
• F1.26 Provision for viva voce examination
• F1.27 Procedures for the conduct of assessment
• F1.28 Appeals and complaints procedures

F2 Regulations relating to External Examiners
• F2.1 Institutions’ responsibilities related to External Examiners
• F2.2 The University’s responsibilities related to External Examiners
• F2.3 The rights and responsibilities of External Examiners
• F2.4 Non-attendance at boards of examiners meetings
• F2.5 Criteria for the appointment of External Examiners
• F2.6 Other considerations when nominating External Examiners
• F2.7 Conflicts of interest
• F2.8 Nomination of OU staff as External Examiners
• F2.9 Nomination of individuals retired from their academic or professional posts
• F2.10 The nomination process
• F2.11 Approval and appointment of External Examiners
• F2.12 External Examiners’ term of office
• F2.13 Requests for extension of approval of External Examiners
• F2.14 Notification of decisions
• F2.15 Payment of fees
• F2.16 Termination of approval of External Examiners
• F2.17 Chief External Examiners
• F2.18 External Examiners’ reports

F3 External Examiner briefing
• F3.1 Introduction
• F3.2 Written briefing to External Examiners
• F3.3 Induction meetings

F4 Board of examiners requirements
• F4.1 Appointment of boards of examiners
• F4.2 Timing of boards of examiners
• F4.3 Delegation of responsibility for assessments
• F4.4 Documentation for boards of examiners and record keeping
• F4.5 Powers of External Examiners

F5 Role of University representatives attending boards of examiners at partner institutions
• F5.1 Guiding principles
• F5.2 Terms of reference
• F5.3 Reports from University representatives attending boards of examiners

A Introduction and background

Contents

A1 Introduction
A2 What are OU validated awards?
A1 Introduction

The Open University’s mission

The Open University (OU) was founded by Royal Charter in 1969. It has an international reputation for the quality of its teaching by supported open learning, for its research and for offering a university education to many students who would not otherwise have had the opportunity to study. The University’s mission can be summarised thus: The Open University is open to people, places, methods and ideas.

Institutional approval and validated awards

OU validated awards are conferred under the University’s Royal Charter. They are of comparable standard to those made to students directly registered with the OU and other UK universities. They are available to institutions entering into a partner relationship with the OU, which requires institutions to demonstrate their ability to quality assure their own provision. Any organisation offering programmes of study at higher education level may seek to become approved by the University and offer programmes leading to its validated awards.

The approval of an institution wishing to offer OU validated awards is required before programmes of study can be validated. Once an institution is approved, a legally binding institutional agreement is drawn up setting out the relationship between the University and the institution and defining their responsibilities.

Authority for institutional approval and review

The authority for approving and for reviewing partner institutions, and validating and revalidating programmes, rests with the OU Senate and is exercised through the University’s Curriculum Partnership Committee for all decisions concerning institutional approval and validation.

The principle of peer review

Institutional approval, institutional review, validation and revalidation processes are based on the principle of peer review delivered through a panel of suitably qualified and experienced people. Authority for all approval rests with the Curriculum Partnerships Committee. The approval process is not complete until the recommendations have been considered at the committee and all conditions have been met.

Each panel must include an appropriate balance in its membership and operate in the context of the University’s requirements for institutional approval and programme approval as set out in this handbook.
The supporting role of the University

In addition to establishing the conditions for institutional and programme approval, the University supports the validation and revalidation processes and seeks to promote and maintain high academic standards by:

- providing a framework of policies designed to foster the development of institutions as strong, cohesive and self-critical academic communities
- acting as a source of information and advice about good practice in respect of all matters relating to academic quality and standards
- providing a forum for debate on matters of academic and institutional development
- facilitating collaboration and interaction between the University, institutions offering programmes leading to its awards, and national and international organisations, including professional bodies, employers and students.

Appointing external examiners for validated awards and attending all examination or assessment boards where awards are made in the University’s name or where progression is agreed.

The powers of the University

The assurance of the academic standards of the validated programmes offered as OU validated awards is a matter of prime importance to the University. The University will take any action it considers necessary under its Royal Charter to protect the quality of validated programmes of study and the standard of its validated awards.

Quality assurance

As a UK University, the OU is subject to the requirements and expectations of UK higher education, as represented by the Quality Assurance Agency for Higher Education (QAA). The QAA publishes the UK Quality Code for Higher Education, guidance on academic credit, subject benchmark statements and a range of associated guidelines. For more information, see http://www.qaa.ac.uk.

The University expects partner institutions to demonstrate knowledge and understanding of the UK Quality Code and to take account of this in their institutional quality assurance arrangements, programme submissions and delivery of validated programmes.
Definitions of key processes for institutional approval and validation

Institutional approval

Institutional approval is the process through which an institution is judged to meet a number of principles set out in Section B1 of this handbook and to provide a satisfactory environment for the presentation of programmes leading to OU validated awards. Approval of an institution is a prerequisite for the approval of any programme of study and it follows that, where institutional approval is withdrawn, programme approval is also suspended or withdrawn.

Validation

Validation is the process whereby a judgement is reached about whether or not a programme of study designed to lead to an OU validated award, or the award of credit¹, meets the principles and requirements for that award. OU validated awards must be equivalent in standard to comparable awards throughout higher education in the United Kingdom.

Institutional review

Institutional review is the process whereby a partner institution is critically appraised at intervals of not more than five years, and through which plans for change are considered.

Revalidation

Revalidation is the process whereby a validated programme of study is critically appraised at intervals of not more than five years, and through which plans for change are considered.

Monitoring

Monitoring is the regular internal process by which an institution critically appraises the operation of each validated programme of study and ensures that appropriate standards are maintained. The University requires annual programme evaluation reports from partner institutions and a separate institutional annual report that evaluates the effectiveness of monitoring and other quality assurance arrangements.

¹ This relates to those students who achieve an exit award within a programme of study.
OU validated awards

The Centre for Inclusion and Collaborative Partnerships (CICP) manages the approval and review of institutions and the validation of their programmes on behalf of the University. All communications should therefore be directed to CICP at cicp-recep@open.ac.uk.

A2 What are OU validated awards?

The nature of OU validated awards

OU validated awards are designed to ensure that they meet the requirements of the Higher Education Qualification Frameworks of England, Wales and Northern Ireland (FHEQ) or where relevant the Scottish Framework (SCQF). See the Regulations for validated awards of The Open University for details.

From 1 September 2015 all institutions were required to comply with The Open University’s regulations. Some institutions are approved to operate under dual awards regulations.

- Standard version: Regulations for validated awards of The Open University
- Dual awards version: Regulations for validated awards of The Open University for institutions offering dual awards

Partner institutions are responsible for maintaining the academic standards of the OU (see Part A of the UK Quality Code) and are therefore required to align their programmes in the same way.

Approval of new awards

The Senate will take advice from the Education Committee before proposing the establishment of any new type of validated award to the University Council.

The University will consider proposals in the context of its Curriculum Strategy, and the whole range of OU validated awards and their relationship to each other and to the awards of other bodies. In particular, the University will consider the:

- characteristics and level of the proposed award, what would both distinguish it from existing awards and relate it to them, and the place of the award in the relevant national qualifications framework
- suitability of existing awards for the proposed programme of study
- likely demand for, and recognition of, the proposed award by institutions, students and employers.
Degree Apprenticeships

A degree apprenticeship has a first degree as an integral part of the apprenticeship. They are co-designed by employers and the apprentice works and is paid for the duration of their apprenticeship. Typically an apprentice will be contracted for 30 hours of work per week; the rest of the time available for learning and study. Learning should be designed to fit around the work commitment and requires flexible learning modes like day or block release, distance or blended learning.

There are currently around 1000 degree apprenticeships and the Government has made a pledge to increase the number of apprenticeships starts to 3 million by 2020.

The Open University will be offering a validation service for degree apprenticeships which will be based on the Principles for validation outlined in section D1 of this Handbook. Further details will be published in due course.
B The awards approval process

Contents

B1 Criteria for initial consideration
B2 The principles and process of institutional approval
B3 Stages in the approval process
B4 Decisions arising from institutional approval meetings
B1 Criteria for initial consideration

If you are an institution interested in becoming approved by The Open University, please read the following sections carefully. They will provide you with detailed information about how to apply for approval and validation for your programmes.

Although the criteria for initial consideration of institutions wishing to be approved to offer Validated Awards are described here in broad terms, please note that fitness for purpose will be assessed based on the extent to which applicant institutions have developed the policies, structures and procedures necessary to meet the University's principles for institutional approval set out in the approval process.

Equality and diversity

See relevant sections of the UK Quality Code for higher Education at http://www.qaa.ac.uk/assuring-standards-and-quality/the-quality-code.

University policies can be found on the Equality and Diversity website at http://www.open.ac.uk/equality-diversity/content/welcome-open-university-equality-and-diversity.

The University’s vision of a fair and just society

The Open University is inclusive, innovative and responsive.

We promote social justice and equality of opportunity.

The Open University’s Equality Scheme and Equality Objectives is available on the website above and sets out the University’s equality and diversity principles.

The University expects its partner institutions to have equality and diversity policies that are compatible with those of the University, and comply with the UK Quality Code (see sections on students with disabilities, and recruitment and admissions).

Approval process

The approval process involves scrutiny of the institution’s formal submission and culminates in the formal institutional approval event.

Where an institution has a current or former relationship with another UK awarding institution for the validation of programmes, the University will make enquiries of that awarding institution about the standing and effectiveness of the institution seeking institutional approval. The reasons for terminating their partnership (if applicable) will also be sought. This is in accordance with Chapter B10 of the UK Quality Code (see http://www.qaa.ac.uk/assuring-standards-and-quality/the-quality-code).

A prima facie case for a new partnership to be approved will require:

- a robust business case
- mutual strategic benefit
- evidence of good standing and robust finances.

These are discussed in the next section.

B2 The principles and process of institutional approval

The primary focus of institutional approval is to give assurance to the University that an institution is able to provide an appropriate context for the delivery of programmes of study that lead to higher education awards. Institutions seeking approval must show that they can meet the University’s principles for institutional approval. These are:

1. Provision of an appropriate learning environment.
2. Independence of institutional ownership from the exercise of academic authority.
3. Appropriate academic organisation and the administrative structure to support it.
4. Robust and rigorous quality assurance and enhancement informed by the UK Quality Code.
5. Relations with the wider academic community.
Principle 1: Provision of an appropriate learning environment

a. The institution should display a commitment to providing an open intellectual community that expects critical reflection and personal educational or professional development by both staff and students.

b. The institution should have a commitment to maintaining an appropriately qualified and experienced staff team to support the programme(s).

c. The institution must be able to provide appropriate academic supervision, as well as adequate learning resources and support services, including adequate provision for the welfare of students.

d. The institution should have a commitment to continuity of the teaching, learning and assessment of a programme(s) in the event of staff absence or departure, and ensuring the minimisation of disruption to the student experience.

e. All teaching staff should have a shared understanding of the learning.

f. Outcomes of a programme and the strategies for ensuring that these are properly achieved and appropriately assessed. Staff should accept collective responsibility for the quality of the students’ learning experiences.

g. Effective arrangements should be in place for ensuring that approved programmes of study reflect advances in their subject disciplines and in pedagogical practice.

h. Staff teaching on a programme should ideally have contributed to its design and be involved in student assessment.

i. Staff teaching on a programme should be qualified to a higher (or at least equivalent) level, or have extensive relevant experience.

j. There should be regular opportunities for the staff and student body to contribute to academic and institutional policy, determination of priorities and discussion of issues affecting the institution’s academic performance and direction.
**Principle 2: Independence of institutional ownership from the exercise of academic authority**

a. There should be a governance structure that protects and assures the integrity of academic decision making.

b. There should be an independent body established within the organisation with a clear remit for academic development, quality assurance and decision making. This must be independent of all arrangements that the organisation may have for commercial development.

c. Where the institution is a company, the owner, shareholders or trustees should not exercise direct authority for academic decision-making, since this could lead to role conflict and jeopardise the stability of the academic environment.

**Principle 3: Appropriate academic organisation and the administrative structure to support it**

a. There should be an organisational structure that is understood within the institution and assigns clear executive, administrative and academic responsibilities to individuals and groups to run the institution’s programmes.

b. The governing body of the institution should ensure that there are adequate controls in place to safeguard institutional sustainability with effective systems for risk management and control.

c. There should be a set of institutional policies and a regulatory framework in place to support the delivery of programmes and assessment of students that comply with the Regulations for Validated Awards (see section D). Such mechanisms should be informed by good practice in the UK HE sector.

d. There should be an appropriate committee structure to support the delivery and assessment of HE programmes that includes effective student representation at all levels of the structure.

e. There should be a commitment to sharing good practice in teaching and learning and assessment.

f. The organisation should have effective systems in place that are not reliant on particular individuals.
Principle 4: Robust and rigorous quality assurance and enhancement informed by the UK Quality Code

a. There should be a system in the institution’s academic organisation that defines the processes for academic quality assurance and identifies responsibility for decision-making.

b. The institution’s systems should ensure:
   - regular monitoring, evaluation and reporting of programme performance
   - that action takes place to deal with any issues raised.

c. Responsibility for this system should be owned by an accountable role or body.

d. Mechanisms for programme evaluation should be informed by feedback from teaching staff; students; external examiners; external peers; professional, statutory or regulatory bodies; and employers.

e. Procedures should take account of the UK Quality Code and any professional, statutory or regulatory body requirements.

Principle 5: Relations with the wider academic community

a. The institution must be aware of and responsive to UK national and international standards for the subjects it offers, current practice in UK higher education and benchmarks, and (where appropriate) international expectations.

b. Institutions will need to demonstrate their use of the UK Quality Code and professional requirements as external reference points. They will be expected to include external inputs in their development work and seek their own academic and professional points of reference additional to External Examiners.

c. The professional and research activities of staff should sustain the academic development of the institution.

Institutions will be expected to provide evidence in order to demonstrate their alignment with these principles.

Following initial approval, institutions will be subject to periodic institutional reviews. Together with annual monitoring, these are key processes that the University uses to satisfy itself that partner institutions continue to maintain a suitable environment for the conduct of validated programmes.
Where programmes are delivered and assessed in a language other than English, it must be established that there is a sufficiently large and experienced bilingual peer group to allow the University to validate and monitor programmes.

**Preconditions concerning financial security and administrative infrastructure**

The approval of an institution as suitable for the conduct of programmes leading to awards of the University implies a commitment on the University's part to ensuring that registered students will be able to complete their programmes.

The University will seek assurances that the institution's financial status is sufficiently robust to honour its commitments to registered students.

This assurance will be sought by undertaking a process of due diligence and the University reserves the right to seek such information as it considers appropriate to provide reasonable assurance that the institution has the required financial stability.

As part of the approval process, the University also undertakes an administrative audit of the institution.

**B3 Stages in the approval process**

The Open University selects partnerships against criteria that have been approved by its Education Committee.

**Stage 1: Enquiry**

The applicant institution contacts the University for an initial consideration with information about itself and the programmes for which it seeks validation, using the enquiry form found at [http://www.open.ac.uk/cicp/main/validation/about-ou-validation](http://www.open.ac.uk/cicp/main/validation/about-ou-validation).

**Stage 2: Advisory**

Following the initial enquiry an advisory visit is set up.

This second stage enables a more detailed discussion about the potential relationship and requirements on both sides of the partnership and agreement to proceed towards institutional approval, which includes a full administrative audit.
Stage 3: Institutional approval

Administrative audit

The purpose of the administrative audit, which forms part of the institutional approval, is to:

a. assess the administrative infrastructure of the institution
b. confirm that it is fit for the purpose of supporting validated programmes
c. conclude due diligence checks.

The administrative audit covers a wide range of administrative, financial and governance issues, including financial viability, planning, administrative staffing and processes, IT structure, and communications.

Documentation

Information will be requested from institutions to assist with the administrative audit and the preparation for the visit.

The information will be requested well in advance of the visit. The University should receive it no later than six weeks before the date of the visit, along with other documentation required for the institutional approval, so that it can be considered and interrogated before the visit takes place. Supplementary information may be needed after the initial documentation has been examined; this will be requested if required.

The following information will be requested from institutions to assist with the audit and the preparation for the visit. This list is subject to changes consequent upon the individual circumstances of the institution concerned:

- Audited accounts for the past 3 years
- Annual and 5 year plans
- Current budget statement
- Administrative staffing structure
- Staff Handbook
- IT staffing structure
- Admissions regulations and procedures
- Examination regulations and procedures
- Student records procedures including QA processes
- Example of final examination results
- Graduation brochure
- Student Handbook - General regulations
• Example of a transcript and diploma supplement
• Prospectus
• Programme publications for validated programmes
• Equality and diversity policies
• Health and Safety policy
• Prevent Policy
• Data Protection and Freedom of Information policy documents
• Data retention schedule
• Appeals and complaints procedures
• Procedures for Safeguarding Children and Vulnerable adults (where relevant)
• Risk management and business continuity planning process.

Process

The institution will be provided with information about the audit once a date has been agreed; this will include details of the audit process.

In cases where it would be helpful, questions arising from the information received will be prepared and submitted to the institution in advance of the visit.

The audit will include discussions with relevant members of administrative staff. It should also include a tour of administrative areas in order to allow the OU team to become familiar with the operation of administrative processes and meet members of staff.

The audit is usually completed within a day, but for larger institutions (eg with multiple sites) this may take longer.

Outcomes

The auditors will agree a set of conditions and recommendations. Where good practice is identified, commendations will also be made.

Where set, conditions must be met before institutional approval or re-approval is granted. The institution’s response to any recommendations must be reported in the institution’s first annual monitoring report to the University and tracked in subsequent annual monitoring reports.
Follow-up

When required, a follow-up visit may be undertaken by the auditors to confirm that conditions have been met. This provides an opportunity to examine areas that have been subject to conditions and/or where development was being undertaken at the time of the original audit visit – for example, the introduction of new IT systems.

As part of their annual monitoring report to the University, institutions are expected to provide a statement of any substantial changes to their administrative systems and practices, or confirmation that they have not changed.

The University reserves the right to ask for audited accounts from institutions at any time.

Approval visit

The final stage of institutional approval activity will be an approval visit to the institution by a panel of experts determined by the OU.

The institution must provide its submission for institutional approval in both hard copy and electronically at least six weeks before the date of the final approval meeting. This should include a self-evaluation document. The University does not prescribe the form or content of an institution’s self-evaluation, but requires that it should cover the following:

a. institutional mission, strategy and purpose
b. the means by which these are converted into academic and programme activity
c. how success in achieving these goals is established and measured at all levels in the institution
d. what action is taken when achievements fall short of goals and targets.

More specifically, the University will be looking at an institution’s self-evaluation for analysis of:

e. how effectively the institution ensures that approved programmes of study are maintaining a satisfactory standard and are being taught, managed and operated satisfactorily in the light of, for example, the UK Quality Code, subject benchmarks and professional, regulatory or statutory requirements
f. how effectively the institution ensures that approved programmes of study reflect advances in their subject disciplines and in pedagogical practice
g. how the institution satisfies itself that new and existing work is adequately resourced
h. what provision is made for the welfare of students and for enriching their experience of higher education.
Institutional approval panel members are asked to review the institution’s documentation before the meeting and identify the issues for the agenda. The panel will be asked for its feedback in advance (which will be shared with the institution), although this does not preclude other matters being raised during the meetings.

Documentation required for an institutional approval visit could include:

- the institution’s prospectus and any other relevant publicity material
- Institutional academic regulations following the University’s template
- terms of reference and organisational chart/diagram to show the structure of the institution’s committees to include:
  - the governing body of the institution
  - Academic Board
  - relevant sub-committees of Academic Board, such as Higher Education Committee
  - Quality Committee
  - Course Teams
  - Assessment Boards
- the institution’s strategic plan, to include in particular its mission statement and strategic aims
- student disciplinary procedures
- equality and diversity policy and procedures
- the institution’s provision for policy regarding student guidance and support (such as career services, personal tutoring, support for students with special needs)
- summary of quality processes relating to higher education provision to include arrangements for development, monitoring approval and review of programme
- student feedback mechanisms including the NSS
- Teaching, and Learning and Assessment strategy and Assessment policy
- Personal Development Planning (PDP) policy
- any mapping of processes exercise against the UK Quality Code
- staff recruitment, training and development policy, including appraisal and teaching peer observation
- contractual requirements for staff, including remission policy
- sample programme handbook for existing higher education programmes
- sample programme specification for existing higher education programmes
- sample programme review documentation
- sample examination results sheet
- sample of assessed student work, across the range of provision
- proposals for the briefing and induction of External Examiners
- reports from External Examiners or equivalent
• details of the programme to be validated, eg teaching, learning and assessment strategies, programme specification, student handbook.
• reports of external agencies or bodies on the institution or its programmes (eg local or national accreditation agencies or, in the UK, QAA or other Validating Universities Professional, Statutory or Regulatory Bodies.

In order to explore how an institution is proposing to meet, or is fulfilling, the requirements for institutional approval, the panel will meet the groups set out below. An indication of typical issues for discussion is included. The panel will often wish to explore the same issues with more than one group. An example of an agenda for an institutional approval can be found at Appendix 6.

Meetings with senior management and Boards of Trustees

Issues to be discussed with representatives from the governing body of the institution will typically include:

a. institutional mission, strategic planning and development
b. institutional management, policy making, and executive and academic structures
c. commitment to equal opportunities
d. staffing and staff appraisal and development
e. finance and resources.

Meetings with members of the academic board or board of studies

Issues to be discussed with those responsible for the standard and quality of programmes will cover:

a. academic responsibilities and quality assurance
b. institutional level policies and regulations
c. external examining arrangements
d. institutional assessment policy
e. research and staff development
f. appeals, complaints and disciplinary procedures.
Meetings with those responsible for programme development and monitoring

Issues to be discussed with those responsible for programme development and monitoring, such as an academic standards committee, include:

a. arrangements for programme design, internal approval and monitoring
b. provision for equal opportunities
c. where there are employer links and provision for student placements
d. provision for personal development planning (PDP)
e. the role of external input and feedback from students and, where applicable, employers in programme development and enhancement.

Meetings with teaching staff

Issues to be explored with representatives of teaching staff will include:

a. the staff experience of the institution’s academic community
b. understanding and ownership of quality assurance processes
c. opportunities to contribute to programme development
d. staff development and research.

Meetings with student representatives

Issues to be explored with student representatives will include:

a. the student experience of the institution’s learning environment
b. including, where applicable, work placements
c. student representation within the committee structures and the opportunities for feedback to staff
d. adequacy of student support, including support for students with special needs
e. adequacy of learning resources.

Review of learning resources

The activity will also include a review of the teaching resources and other facilities of the institution, including library and computing facilities.
B4 Decisions arising from institutional approval meetings

The approval panel will agree its recommendation regarding institutional approval for consideration by the University's Curriculum Partnerships Committee and this will be reported to the institution at the end of the final meeting. Once a conclusion has been collectively agreed by the panel, panel members will not be allowed to raise further issues or make substantive amendments to any conditions of approval or to recommendations to the institution. The Curriculum Partnerships Committee may, in the course of their considerations, decide to amend or add conditions and recommendations.

Final approval by the Curriculum Partnerships Committee will be subject to the satisfaction of any conditions set. Final approval is also subject to an institutional agreement between the University and the institution being signed.

When institutional approval is confirmed, the institution can seek approval for programmes leading to OU validated awards.

Institutional approval will only become effective and operational when a programme of study is approved and students are registered with the University.

Approval

Where initial approval is recommended, this will normally be for a full period of five years. However, the University reserves the right to instigate an institutional review at any time during the initial period of approval.

Conditions of approval

A recommendation for approval may be conditional on further work by the institution to be completed before approval is confirmed.

Institutions will be allowed up to two attempts to fulfil the conditions of approval (an initial response to the conditions, plus a resubmission if the panel requests further work to be undertaken). A third submission will only be allowed at the invitation of the University.

Recommendations to the institution

The panel may also make recommendations to assist institutional development. These will require follow-up in the institution’s annual reports to the University.
Non-operational approval

If following institutional approval programme approval is not achieved, or recruitment to approved programmes is not successful, approval status will be reviewed within one calendar year of the date of the final approval meeting. The partner institution will be required to meet its financial commitments to the University for the duration of the agreement.

Institutional approval reports

A draft report on the outcomes of the approval visit will be sent to the institution for comment on matters of factual accuracy before being presented to the University.

Institutional approval of overseas institutions and validation of non-English programmes

General principles

The approval of overseas institutions and of foreign providers located within the UK is subject to the same principles, regulations and requirements as all other institutions.

Institutions that are located outside the UK will need to provide written evidence that the partnership with the University has the approval of the competent governmental authorities and is not contrary to any national laws. The institution will be responsible for consulting these authorities and securing any legal approvals at its own expense.

The University will not normally consider approving an institution if its validated awards are unlikely to be recognised in the host country.

Institutions may seek validation of programmes that are designed to also lead to other awards, such as those leading to professional qualifications and US or European degrees and diplomas. Although dual awards are permitted by the University, such programmes will only be considered for validation if they can meet in full the University's requirements for validated awards.

All agreements between a partner institution and the University shall be governed in accordance with UK law. All disputes arising from such agreements, or in relation to them, shall be subject to the non-exclusive jurisdiction of the UK courts. Notwithstanding this requirement, in the event of a dispute, both the partner institution and the University would be expected to negotiate in good faith and endeavour to resolve the matter amicably.

Any additional costs that the University incurs in sustaining an overseas partnership must be met, directly or indirectly, by the partner institution. The University will agree with each institution the financial arrangements to be set out in the agreement.
Language of instruction and assessment

Programmes leading to validated awards of the University will normally be written, delivered and assessed in English.

Where the programme (or any significant part of it) is to be delivered and assessed in a language other than English, whether overseas or in the UK, it will be necessary for evidence to be provided that there is a sufficient number of people fluent in the language, with subject expertise at the appropriate level, with first-hand knowledge of the standards of UK degrees and from sufficiently diverse backgrounds to:

a. enable balanced initial validation and subsequent revalidation panels to be formed  
b. provide a sufficient number of external examiners over a number of years  
c. deal with any student appeals.

It must also be established that there is a sufficiently large and experienced bilingual peer group to allow the University to validate and monitor programmes.

English will be the language of communication between the University and all institutions. English must be used for key documentation including institutional agreements, submissions for institutional approval and validation, definitive programme documents, annual monitoring, external examiners’ reports, registration and conferment records, and minutes of assessment boards deciding final awards. Institutional approval, institutional review, validation and revalidation panel discussions will be carried out in English.

Partner institutions will be required to provide the University with English translations of programme handbooks and any advertising, publicity and public information relating to OU validated programmes. The University may require translations of other institutional documents, records and student transcripts as and when required.

Except where otherwise agreed, translation of materials will be the responsibility of the partner institution at its own expense. The partner institution must ensure that any translations are made faithfully and accurately by a competent and independent translator.

The University’s award certificates will indicate where a programme has been delivered and/or assessed in a language other than English.
Institutional Review

Supporting documentation for institutional review could include:

a. A self-evaluation document that is supported by documentation incorporating existing policy statements, regulations, statistical material, and other papers that substantiate the matters raised in the self-evaluation. The supporting documentation should provide evidence that institutions continue to meet the principles of institutional approval. This documentation should be submitted both in hard copy and electronically. Section B1 lists those principles, together with a list of the documented evidence that is required in support of applications. Most of it should already exist.

b. In addition to the evidence listed in for an institutional approval, documentation for institutional reviews must include the following:
   • a year’s series of minutes and papers of key committees that evidence effective engagement with the University’s principles of institutional approval and with the UK Quality Code, and that demonstrate a consistent attention to quality assurance and enhancement
   • an account of the institution’s response to any issues arising from the attendance of University representatives at board of examiners, quality assurance committees, academic boards and programme committees at the institution in the year leading up to the institutional review
   • an evaluation of the outcomes or impact of all engagements with the University
   • an evaluation of the outcomes of all external audits, including QAA engagements, accreditation, inspection, or reviews, either of the institution or of its OU validated provision
   • an evaluation of the outcomes of annual monitoring in the last three years together with an institutional overview of these, including an account of how issues have been addressed.

c. The institution should also invite the representative student body to contribute towards the self-evaluation document or to write a separate document reflecting on arrangements for teaching and learning in respect of OU validated awards and the student experience. This should be included in the papers. If the representative student body declines to contribute, this should be recorded.

Institutional approval and review panels

The panel will be chaired by a member of staff of the University and will have representation from Curriculum Partnerships Committee (CuPC). The balance of membership will be weighted towards OU membership, and its composition will be decided on the basis of the requirements for expertise and experience.
C Procedures following institutional approval or review

Contents

C1 Institutional agreement
C2 Information about the University to students and staff
C3 Relationships with University staff
C1 Institutional agreement

Signing an agreement

Following institutional approval or institutional review, a formal institutional agreement (see Appendix 1) must be signed between the University and the institution. This sets out the terms and conditions under which the University agrees to confer partner institution status.

OU requirements

The OU has these requirements regarding the approval and monitoring of partner institutions’ publicity materials/publicly available information:

General requirements

Institutions cannot publish any co-branded publicity materials or produce any materials that imply in any way that they have been approved by The Open University (OU) before the University has confirmed their institutional approval via the formal approval letter.

Once they are formally approved by the OU, all institutions must publicise their relationship with the OU in all the relevant materials, whether in print or online.

Similarly, partner institutions cannot publicise a programme of study as being validated by the University before validation has been confirmed via the formal programme approval letter. However, where a programme of study leads to a validated award of the University, this should be clearly stated in all the publicly available information about this programme, whether in print or online.

Compliance with the OU publicity requirements is a key element of the admin audit and institutional review processes.

Use of the OU logo and wording

Partner institutions of The Open University are allowed to use the Open University logo in accordance with the OU brand guidelines. Brand guidelines and a high-resolution logo can be obtained from the Manager (Communications) at cicp-recep@open.ac.uk.
Partner institutions must use the following wording to describe their relationship with The Open University:

[Institution] is approved by The Open University as an appropriate organisation to offer higher education programmes leading to Open University validated awards.

Or:

[Institution] is a partner institution of The Open University.

Partner institutions should use the following wording to describe validated programmes/modules:

Programmes/modules in [XYZ] subject(s) have been developed and will be delivered by [organisation]. They have been validated through a process of external peer review by The Open University as being of an appropriate standard and quality to lead to The Open University validated awards of [full title of award(s)].

Or:

[Title of programme/This award] is validated by The Open University.

Further guidance, as well as additional content regarding The Open University and its validated provision can be obtained from the Manager Communications at cicp-recep@open.ac.uk.

**Sign-off and monitoring processes**

In order to ensure the accuracy of all publicly available information referring to its validated provision The Open University must be involved in the sign off of partner publicity, as detailed in the table below.

The table also includes details of the audits and checks carried out by the University. Furthermore it outlines the responsibilities of the different stakeholders involved in the sign off and monitoring processes, both at the University and in the institutions.

</tr>
</tbody>
</table>
2. **Student Handbooks**

- Student handbooks related to OU validated programmes must be published on publicly accessible web pages (where no password is required).
- The Open University will carry out a yearly check, over the summer months, in order to ensure that student handbooks are publicly available and that their content is accurate. Amendments may be required where necessary.

3. **Regulations for Validated Awards of The Open University**

- An up-to-date version of the regulations must be made publicly available on partner websites (on a page where no password is required).
- The Open University will carry out a yearly check, over the summer months, in order to ensure that the most up-to-date version of the regulations is publicly available. Amendments may be required where necessary.

4. **Leaflets, external advertisements**

- We no longer approve leaflets and external ads prior to publications. However these will be routinely checked during visits at the partner institutions and any issues in relation to these will be reported to the particular partner institution.

5. **Partner websites**

- The Open University will carry out an audit of all partner websites every year in the summer. Amendments may be required where necessary.
- Partner Institutions must inform the Manager (Communications) at cicp-recep@open.ac.uk where significant changes are to be made to their website (eg web re-development or re-branding).

6. **Reporting annually to the partner institutions**

- Each year in September, The Open University will produce a report for each partner institution, which will summarise the interaction between the University and the particular institution in relation to the above activities, highlighting areas of good practice and identifying any required action, where necessary.

*Please note: Institutions are required to keep a record of all the printed and electronic information produced to describe their validated programmes and their relationship with the University. They must keep this information for the maximum period for which students might be registered on the relevant programmes.*
C2 Information about the University to students and staff

Information relating to validated programmes and the nature of the institution’s relationship with the University, including the Handbook for Validated Awards, Regulations for Validated Awards of The Open University and programme handbooks, must be made available to students, staff and other interested parties. This will include details of the respective responsibilities of the institution and the University.

The Student’s Guide to Studying on a Programme Validated by The Open University aims to introduce students to the University, as well as explaining what being registered on a programme validated by the OU means to them.

An electronic copy of the guide must be circulated annually to all the students registered on a programme validated by The Open University. In addition, the electronic version of the guide must be made available and clearly signposted on the institution’s website. Furthermore, hard copies of the guide must be available in the relevant information points at the institution, including the library.

Where programmes are delivered outside the United Kingdom clear information must be made available about the language of instruction and assessment. Such information must be published in both English and the language of the country where the institution is situated.

Information about engagements with the QAA and professional, statutory and regulatory bodies

In respect of information about engagements with the Quality Assurance Agency, Professional, Statutory and Regulatory Bodies, and other external agencies, partner institutions are required to:

a. inform the University of all external audit, accreditation, inspection or review, either of the institution or that will include provision validated by the University
b. provide draft self-evaluation documents in good time for the University to consider and offer comment, where appropriate
c. copy to the University all communications from the external agency or body following the review, including initial judgements or findings and draft reports;
d. provide the University with an opportunity to consider a draft action plan and to make comment, as appropriate
e. keep the University informed of progress with the action plan and any further communication with the external agency or body.
C3 Relationships with University staff

Following approval, the University will provide advice, guidance, academic support and oversight of quality and standards, as through Academic Reviewers, who support the quality assurance and enhancement of validated provision.

Attendance of University representatives at other key committees

In addition to boards of examiners, at which decisions on OU awards are made, University representatives may attend a sample of key committees and boards such as academic boards, programme committees or quality standing committees or their equivalents. The sample will usually be decided at planning meetings between the University and the partner institutions.

The Institution will provide the OU with all papers of such committees in the year leading up to institutional review.

Terms of reference of University representatives at key committees at partner institutions are to:

a. attend board and committee meetings of the institution as per prior agreement
b. observe the conduct of the boards and committees in accordance with the institutional procedures
c. provide a source of advice on the interpretation and application of University policies and of guidance offered by QAA in the UK Quality Code and elsewhere
d. alert the institution and the University to policies, procedures or circumstances which seem likely to impede the effective functioning of the boards and committees or the discharge of their responsibilities
e. report to the University, including institutional review panels.

The University representative will prepare a checklist report, noting whether:

f. the meeting was competent and quorate to conduct business in accordance with the institutional structure and procedures, and was conducted in accordance with its agreed terms of reference
g. an appropriate officer took minutes
h. everyone was familiar with and understood the terms of reference for the meeting
i. the agenda was appropriate and adequately supported by relevant documentation
j. if applicable, minutes and follow-on action from previous meetings were dealt with
k. there was evidence of appropriate record keeping
I. all participating members present at the meeting were given an adequate and structured opportunity to contribute to discussion.

A copy of the report prepared by the University representative on the conduct of meetings will be submitted simultaneously both to the institution and to the University.

  • D6.2 Approval of programmes offered in collaboration between institutions
  • D6.3 Approval of programmes validated by other validating universities
  • D6.4 The charge for validation and revalidation
  • D6.5 Procedures for appeals against panel judgements
  • D6.6 Programme closure
D1 Principles for validation and revalidation

All programme proposals must meet the principles below in order to be validated and revalidated. Validation and revalidation panel members will refer to the principles from the early stages of the process until the final approval event. The principles inform the agenda for events as well as the structure of (re)validation reports.

The principles relate to:

a. the rationale, aims and intended learning outcomes of the programme of study
b. the curriculum and structure of the programme of study
c. teaching and learning
d. admissions and transfer
e. assessment regulations
f. staffing, staff development and research
g. teaching and learning resources
h. other resources for students
i. information publicly available to students, their advisors, employers and other stakeholders
j. equality and diversity.

D1.1 The rationale, aims and intended learning outcomes of the programme of study

Rationale and aims

Validated programmes will reflect the mission, strategic direction and academic goals of institutions, and they will fulfil a demonstrable market demand.

They must stimulate an enquiring, analytical and creative approach, encouraging independent judgement and critical self-awareness.

The aims of a validated programme will be appropriate to the award to which they lead.
Learning outcomes

The intended learning outcomes for the programme will be clearly identified and appropriate to the aims of the programme. They will include the development, to the level required for the award, of a body of knowledge and understanding appropriate to the field of study and reflecting academic, professional and occupational standards in that field as well as subject benchmarks. The levels are defined in the QAA Frameworks for Higher Education Qualifications and the SEEC Credit Level Descriptors.

Learning outcomes will also relate to the relevant external reference points and the requirements of any professional or statutory body requirements, and to European reference points as appropriate.

Generic transferable skills

Learning outcomes will incorporate generic transferable intellectual and practical abilities and skills, appropriate to the level of the proposed award.

External reference points

Learning outcomes will relate to the relevant external reference points, including the QAA Frameworks for Higher Education Qualifications, QAA Subject Benchmark Statements, and the SEEC Credit Level Descriptors.

Learning outcomes will relate to the requirements of any professional or statutory body requirements, and to European reference points as appropriate.

D1.2 The curriculum and structure of the programme of study

Curriculum design and content

Curriculum design and content of validated programmes will enable students to achieve the intended learning outcomes in terms of knowledge and understanding, cognitive skills, practical and professional skills, and key transferable skills. Curriculum design will also take account of students’ progression to employment, research or further study, and personal development.

The curriculum design and content will be informed by recent developments in techniques of teaching and learning, by current research and scholarship, and by any changes in relevant occupational or professional requirements. Mechanisms will exist to maintain the necessary links.
A programme must demonstrate balance in relation to academic and practical elements, to personal development and academic outcomes, and to breadth and depth in the curriculum. It must also demonstrate coherence to ensure that the overall experience of a student is logical and has an intellectual integrity.

Where relevant, the role of practical or project work and how it is integrated in the programme will be specified.

The curriculum must also specify any proposals for any dissertation or written projects, including approval of chosen topics and arrangements for supervision.

**Programme structure**

The programme documentation will indicate links with other programmes (e.g., common foundation year, common modular structure, top-up award) and opportunities for transfer and progression.

The documentation should include provision for exit awards, where appropriate, with their own learning outcomes.

Adaptations will be made to the structure in order to meet the needs of students following different modes of study and with different backgrounds at entry or special needs.

The determination of core and optional elements and of any prerequisites or constraints on choice will be clearly defined.

Where relevant, the structure will specify the distinction between the honours route and routes leading to other awards within the same scheme such as Diploma of Higher Education and unclassified degrees.

**Provision for work placement or study abroad**

Where appropriate (and with reference to Quality Code B10) provision for supervised work experience, community experience or experience abroad will be made, and the way that such elements fit with the rest of the programme must be clarified.

**D1.3 Teaching and learning**

The teaching and learning strategies for validated programmes will be appropriate to the aims, learning outcomes and diversity of the student intake.
There must be adequate levels of staffing to support the proposed programme.

The institution must have in place policies that will ensure continuity of the teaching and assessment programme and avoid any disruption in the event of the departure or prolonged absence of particular members of staff. These will include, in particular, policies for staff recruitment, deployment and development, and for the development, availability and sharing of teaching, learning and assessment materials.

Staff must be properly and appropriately qualified and experienced, and their teaching must be informed by their active participation in research or relevant scholarly, professional or consultancy activities. It is expected that academic staff engaged in designing and delivering programmes will hold an academic qualification or have equivalent experience at the level above that which they are teaching and assessing.

There must be effective engagement with and participation by students, including the opportunity to serve on committees at all levels as appropriate. Mechanisms will be in place for collecting student feedback, implementing changes and communicating them to students.

There must be an appropriate overall strategy for academic support, including written guidance, which is consistent with the student profile and the overall aims of the provision. There will be clear and effective arrangements for academic support and supervision, including the arrangement for student support and supervision during any work placements or study abroad where applicable.

Where common teaching with other programmes is proposed, there should be a clear strategy setting out how this common teaching will be managed.

Panels need to be able to assess that personal development planning (PDP) is visible in the programme documentation (whether discrete or embedded).

D1.4 Principles related to programme management and monitoring

There will be arrangements in place to enable programme teams to review and seek to enhance standards taking account of developments in techniques of teaching and learning, current research and scholarship, and any changes in relevant occupational or professional requirements.

Institutions are expected to review the continuing relevance of the programme in light of changes to external reference points, such as subject benchmark statements, or the requirements of professional, statutory and regulatory bodies.

Institutions must have mechanisms in place to ensure the effectiveness of arrangements for collecting and acting upon feedback from students and staff and for identifying and acting upon any difficulties which may arise from changes to the staff team. There must be student
representation at all levels of institutions’ governance committee structure where issues concerning students, learning support, and physical and staffing resources are discussed. In particular, there must be at least one student representative on each of the groups or committees dealing with programme-level matters. Student representatives must be given adequate induction to their role and support in fulfilling their responsibilities.

Mechanisms must be in place to ensure that recommendations for appropriate action are followed up to remedy any shortcomings identified as a result of these engagements.

Where programmes have employer links, such as in the case of foundation degrees and work-based learning, there will be mechanisms in place for obtaining and acting upon feedback from employers.

Engagement with External Examiners and consideration of External Examiners' reports constitute a key mechanism through which institutions routinely monitor the effectiveness of programmes.

D1.5 Admissions and transfer

All validated programmes must have effective criteria and arrangements for admission that relate to the level of the programme, its learning outcomes, teaching and learning methods, and assessment. For further guidance, see Chapter B2 of the QAA UK Quality Code.

See the Regulations for validated awards of The Open University for more information. The regulations will also give guidance on Recognition of Prior Learning (RPL).

D1.6 Assessment regulations

From 1 September 2015 all institutions were required to comply with The Open University’s regulations. Some institutions will be approved to operate under dual awards regulations.

- Standard version: Regulations for validated awards of The Open University
- Dual awards version: Regulations for validated awards of The Open University for institutions offering dual awards

The purpose of assessment is to encourage effective learning and enable students to demonstrate that they have fulfilled the learning outcomes of the programme and achieved the standard required for the award. The assessment process must be undertaken by impartial internal and external examiners, who are competent to make judgements about the performance of individual students both in relation to the assessment criteria and learning outcomes and to students on other comparable programmes.

The assessment regulations must be in line with the Regulations for validated awards of The Open University.
The assessment strategy

a. The assessment strategy will have an adequate formative function in developing student abilities. The assessment process will enable learners to demonstrate achievement of the intended outcomes. Criteria for success will be made clear to students, and will relate to the intended learning outcomes.

b. The assessment strategy will provide evidence that the standards achieved by learners will meet the minimum expectations for the award, as measured against relevant QAA Subject Benchmarks and the QAA Framework for HE Qualifications.

The assessment process

a. There must be full confidence in the security and integrity of assessment procedures. The arrangements proposed to ensure the validity and objectivity of the assessment process must be clear. Staffing arrangements for the programme must be such as to ensure continuity of the assessment process should particular members of staff leave or be absent.

b. Arrangements will be in place for the involvement of External Examiners in the assessment process. There will be criteria that enable internal and External Examiners to distinguish between different categories of achievement. The criteria for assessment will be clearly specified and measures taken to ensure that they will be understood and applied by all the examiners involved.

c. The composition of the board of examiners will be in accordance with the University requirements for boards of examiners set out in section F4 of this handbook. In particular, where a complex scheme requires a tiered structure of assessment boards, there will be adequate arrangements for the examiners to take an overall view of each student’s performance.

D1.7 Staffing, staff development and research

Both teaching and support staff must be adequate in number and appropriately qualified for the aims and learning outcomes of the programme to be fulfilled. Where the number is less than adequate, a firm undertaking that deficiencies will be made good and that key staff will be in place in time for the delivery of the programme must be made. This applies equally to the staff involved in learning support services (including library and media services, computing and information technology) as well as to technical and administrative support staff.

There should not be over-reliance on one or two staff members. The arrangements for staff deployment and development must ensure continuity of the teaching programme in the event that particular staff are no longer available to the programme.
Staff should be able to draw upon research, scholarship or professional activity to inform their teaching, and there will be arrangements for supporting staff in these activities.

Where a programme involves a period of work experience or residence abroad, the institution must demonstrate that they can provide adequate student contact with tutors or supervisors during this period.

Where part-time or visiting staff are used to deliver a programme, adequate mechanisms must be in place to promote their integration and access to staff development opportunities.

D1.8 Teaching and learning resources

The physical resources needed to teach the programme must be adequate. These may include accommodation, relevant library (including e-resources) and computer provision, media resources, specialist laboratory or studio facilities and specialist equipment, and facilities for students with disabilities.

If all of the necessary resources cannot be made available within the institution, appropriate arrangements must be in place to secure access to resources elsewhere (eg through collaboration with other institutions). The Open University reserves the right to inspect accommodation used for teaching purposes.

Where not all the required resources are available at the start of the programme, appropriate plans for their provision later must be in place.

For distance learning programmes, the essential physical resources include printed or online learning materials, and other media, backed up by an efficient delivery system.

D1.9 Other resources for students

Opportunities should be available for students to interact within and across programmes to allow students to engage in collaborative activities.

The institution must make provision for student guidance and support relevant to the programme, for example induction, career services specific to the programme, personal tutoring, and support of students with disabilities.

D1.10 Information publicly available to students, their advisors, employers and other stakeholders

All validated programmes must have a programme specification and a student handbook. The programme specification should be clear and accurate, and – together with module/unit specifications, the student handbook and any relevant institutional regulations – should
include all the programme-related regulations and procedures needed by applicants, students, staff and external examiners. The student handbook should be made available to potential students through a public facing part of the institutions’ website – see Appendix 5 for guidance on the content of the student handbook.

**D1.11 Equality and diversity**

All regulations and procedures related to programme design (as well as admissions, delivery, staffing, assessment, learning resources, and guidance and support services) will give due regard to preventing discrimination and promoting equality of opportunity and good relations, and make provision for responding effectively to the different needs and circumstances of students. Such policies and procedures should align with those of the University.

**D2 Validation and revalidation**

Validation is the process by which the University approves proposals of programmes of study leading to OU validated awards.

Validation will include analysis of the institution’s internal quality assurance arrangements at programme level with the University’s validation requirements.

All proposals for validation or revalidation will be judged against the criteria for validation (see Section D1). The criteria inform the processes of validation and provide the basis for the agenda for validation events and for the structure of validation reports. The criteria, therefore, will assist institutional staff responsible for programme development and for validation submissions.

**D2.1 Development of new programmes**

Through an annual workload request in February to March each year. Institutions are asked to indicate any validation plans, including major changes to programmes currently in validation, for the next two academic years. All new programme proposals must allow sufficient time to complete the University’s approval process. The University cannot guarantee that a proposal will be scheduled for validation if it is not included in the workload return.

Requests for new programme validations should be realistic. Once a validation has been included in a planning meeting, costs may be incurred if the event is cancelled.
The initial proposal, developed by a programme development team which should include a programme leader, should be forwarded as a completed Template for Programme Descriptions (using this template) to the University at least one month before the planning meeting. The programme description outlines the basic details of the proposal, including:

a. a provisional title and programme content
b. target market and supporting market research
c. resource implications and consideration of financial viability
d. relevant subject benchmark statements and any other relevant aspects of the QAA Quality Code.

A validation planning meeting will take place early in the new academic year (and at the latest by the end of September) part of this meeting will discuss plans for the validation of new programmes, the revalidation of existing ones and any other events such as the institutional review or external review by public, statutory or regulatory bodies.

Core members of the planning meeting may include:

e. senior representative(s) of the programme development team(s)
f. institutional quality assurance person(s)
g. learning resource representative
h. OU Quality and Partnerships Manager (QPM – the institution’s first point of contact).

**D2.2 Outcomes of the validation planning meeting**

The following will be discussed at the validation planning meeting:

a. the proposed start date of the programme(s)
b. details of key personnel involved in the development of the proposal(s)
c. identification of an institutional officer responsible for ensuring that the process is recorded and, in particular, for demonstrating that account is taken of the panel members’ comments in finalising the proposal(s)
d. date for a preliminary validation
e. composition of the preliminary validation panel
f. date for a final validation meeting
g. composition of the final validation panel
h. provisional programme title(s), including modules, duration of programme, credits and start date
i. programme development timetable and management of the validation process to include
the consideration of such issues as:

- involvement of professional, statutory and regulatory bodies
- nature and extent of external subject involvement during the programme
development and validation process
- identification of any specific issues on which external comment is
required
- timetable of meetings of the programme development team
- timetable for circulation of papers to external panel members
- timescale and responsibility for an internal audit of the adequacy of
learning resources

A formal record of the meeting with action points should be produced as soon as possible by
the institution after the meeting.

Following the planning meeting

Throughout the (re)validation process the institution must use the templates provided by the
University (Actual documentation required will be discussed in the planning meetings).
These documents have been designed to minimise duplication and for ease of reference for
all involved, particularly panel members and institutional staff. If necessary, additional
supporting information may be provided as appendices.

For practice-based programmes, it is expected that the documentation will express the
articulation, balance, and sequencing of theory and practice in the curriculum. This will be
reflected in the intended learning outcomes of practical/performance work and how they will
be assessed.

Where the validation of distinctive pathways within a programme are required, institutions
should ensure that they provide a separate rationale and learning outcomes for each route, in
particular where the alternative routes branch out to quite distinct subject areas.

Where appropriate the proposal should include the validation of exit qualifications, and
ensure that the programme specification includes distinctive learning outcomes for such
qualifications.

Where the programme is offered in different modes of attendance (eg part time or distance
learning) panels must ensure that there is parity of the student experience across all modes
of attendance. The documentation should therefore detail which additional mechanisms are
in place for the support and guidance for part time and/or distance-learning students.
The programme development team will work on the following documentation required for the preliminary validation meeting:

a. Programme specification
b. Module specifications
c. Draft student handbook
d. Draft background document
e. Critical appraisal (for revalidations)
f. Regulatory framework including:
   - Admissions policy and regulations for the programme
   - Staff development policy
   - Placement learning policies and regulations including study abroad regulations
   - Equality and diversity policies (covering both staff and students)

D2.3 The preliminary (re)validation meeting

It is expected that the dates for preliminary and final validation meetings will be separated by sufficient time to allow a response to issues identified at the preliminary stage. A minimum period of six weeks between these two events is required.

The purpose of the preliminary (re)validation meeting is to confirm that the programme proposal is fit for purpose and may proceed to final stage revalidation.

This meeting, organised by the institution will be held with a panel that could include a Process Panel Member (PPM) and the Institutional Process Panel Member (IPPM).

Nomination of an OU representative as a process panel member

a. The University may nominate a representative as process panel member, who will offer comments relevant to validation during the development of the programme. The process panel member will be a member of both the preliminary validation meeting organised by the institution and a final validation meeting organised by the University.

b. Whenever possible the OU nominee will be a member of OU academic staff, although the important criterion is that the person nominated has specialist expertise relevant to the proposal.
Nomination of a process panel member by the institution

c. The institution is invited to identify one external panel member for the preliminary validation panel who can also take part in the final validation, subject to approval by the University. The aim of this provision is to give an opportunity for institutions to have a nominee who can link between the preliminary and the final validation meetings.
d. Approval of such institutional nominees to sit on final validation panels will be subject to the submission of a CV to the Quality and Partnerships Manager. The nomination will be submitted at an early stage, ideally in advance of the planning meeting. The following criteria will be taken into account:

- the nominee will be someone with expertise relevant to the proposal
- impartiality, ie the nominee will not have had formal links with the institution in the last five years as an External Examiner or a former member of staff, for example
- prior experience of teaching on programmes at the same level or above
- where appropriate, professional expertise from a relevant professional background
- individuals who have been engaged by the institution as external consultants for the proposal should not be nominated as process panel members.

Where it is not feasible for the University or the partner institution’s PPM to attend the meeting in person, their written input must be considered as part of the meeting, and there is an expectation that they participate by tele-conference.

Following the meeting the PPM will be asked to confirm with the QPM:

e. that the programme documentation contains all specified requirements, including a complete and appropriate programme specification
f. that appropriate learning resources to support the programme have been properly evaluated and that a strategy and plan to meet the needs of the programme are in place and have full institutional support
g. that the proposal demonstrates how the programme is aligned with the UK Quality Code and the requirements of any relevant professional, statutory or regulatory bodies where appropriate
h. that the regulations for the programme meet the University’s requirements for validated awards and are in accordance with the regulatory framework
i. that the proposal should proceed to a final revalidation meeting.
The partner institution is required to produce a summary report of the preliminary revalidation. The report should summarise:

j. issues that have arisen and how they have been resolved
k. outstanding issues, together with proposals for their resolution.

The report will be received as part of the documentation for the final revalidation meeting.

If the outcome of the preliminary revalidation meeting is that the proposal needs further work before it can proceed, a decision will be taken by the University on whether the final (re)validation meeting should be cancelled or deferred (depending upon the likely time needed to undertake the required work). The views of the institution, the QPM and the PPM will be taken into account.

D2.4 Documentation for the final (re)validation meeting

Papers for the final revalidation meeting should include the institution’s revised documentation, which must include responses to any recommendations set at the preliminary meeting.

Institutions must provide documentation for consideration by panel members at least three weeks in advance of the final revalidation meeting. This documentation includes the documents required for the preliminary event plus any other documents agreed with the QPM. This deadline is important and must be adhered to so that panel members have sufficient time to give it due consideration.

Final (re)validation meeting

The OU arranges the final (re)validation event. It will be set up and organised as agreed at the planning meeting. This would normally be scheduled to occur at the partner institution for a whole or half day depending on the complexity of the proposal and the nature of the issues identified during the programme development and preliminary (re)validation phases.

The final (re)validation panel will have a Chair and at least three panel members, although exceptionally panels may be larger or smaller dependent upon the spread of subject expertise. Its composition will include an OU academic member of staff (who may undertake the role of the Chair) and external panel members as appropriate:

a. the external member(s) nominated by the University who may have been members of the preliminary validation meeting (PPM)
b. the external member nominated by the institution who may also have been a member of the preliminary validation (IPPM)
c. other external subject specialists  
d. for programme revalidations one panel member from the previous event.

A member of OU staff will produce the report from the event.

Observers at final (re)validation meetings

Institutional agreements make provision for the staff of the proposing institution to observe the (re)validation process. The University encourages observers nominated by the institution to overview the (re)validation process and, as appropriate, attend any meetings, except those with students.

Observers are not decision-making members of the panel, but are encouraged to assist the panel by contributing factual information and intervening if the panel appears to be making incorrect assumptions. If, however, a situation should arise where the participation of an observer is likely to inhibit discussion or the formulation of decisions, the Chair has the discretion to ask observers to leave until recalled. This action should only be necessary on rare occasions.

Observers will not normally be nominated from the senior management of the institution or from persons involved with the management or teaching of the programme under (re)validation.

Where an institutional review and (re)validation of a programme take place concurrently, observers may be invited subject to the agreement in advance of the Chair. In such cases the observers would normally be nominated from external members of the academic board or its equivalent body, or from the governing body of the institution.

The agenda for the final (re)validation meeting is set by the QPM in discussion with the partner institution. Core agenda items will include:

e. Meeting with the Senior Management Team  
f. Meeting with the Programme Team  
g. Meeting with a representative group of students  
h. Tour of facilities  
i. Private panel meetings

A sample agenda can be seen at Appendix 8.

The final (re)validation meeting offers the opportunity for the panel and the programme team to discuss the process of programme design and related academic requirements, and for the panel to resolve any outstanding matters relating to the academic rigour of the proposal and the ability of the institution to support it and deliver a good student experience. It is not expected that the final (re)validation meeting will be concerned with matters of regulation
unless there are specific professional accreditation regulations to be met. It also allows the panel the opportunity to scrutinise assessed student work, if the programme has been (re)validated previously.

The final (re)validation panel reserves the right to assure itself of the adequacy of learning resources, and it will scrutinise them before giving final approval to the proposal.

At the end of the final meeting the panel will propose the outcome, and detail any commendations for good practice, conditions for approval and recommendations. This will be in the form of an oral report to the institution. The final approval decision will be made by the Curriculum Partnerships Committee. The period of validation is in all cases subject to satisfactory annual monitoring.

The written report should be available within four weeks of the final meeting. The institution will be invited to comment on matters of factual accuracy.

D2.5 Possible outcomes of (re)validation

The following (re)approval decisions may be proposed by the panel and may be amended by the Curriculum Partnerships Committee:

a. Full-term (re)approval
   A programme may be (re)approved for a specified period of not more than five years subject to revalidation before the end of the (re)approval period.
   Where an institution fails to register students on a programme of study for two consecutive academic years its (re)validation will be required to undergo a short re-approval process before it can be offered again.

b. (Re)approval for a shorter period
   (Re)approval may be granted for a shorter period. In such cases revalidation of the programme will be necessary before the end of the specified period.

c. Conditional (re)approval
   (Re)approval may be made conditional upon the fulfilment of certain requirements, by a specified date(s). Institutions are responsible for ensuring that such conditions are met in accordance with the terms of the requirements set out in the validation report. Students may not be enrolled until the panel has confirmed that a formal (re)approval letter may be issued.
   Institutions will be allowed up to two attempts at fulfilling the conditions of (re)validation (an initial response to the conditions, plus a resubmission if the panel requests further work to be undertaken). A third submission will only be allowed at the invitation of the University.

d. Recommendations
   The panel may make recommendations for ongoing follow-up by the institution and a response will be required through the annual monitoring report for the programme.
e. Non-approval
The panel may decide not to recommend (re)approval of the programme.

f. Retrospective validation
Programmes leading to validated awards must be approved prior to commencement. Retrospective approval may be recommended only in exceptional cases where the proposed programme has already been in operation under approval arrangements other than those of the University, with full external assessment, including external examining, in place, and when there are no outstanding conditions of approval requiring significant changes. This will require detailed conversation with CICP.

Following (re)validation and before the start of the programme, a definitive student handbook must be lodged with the University. A copy (or access to an online version) of the handbook must be issued to each student registered on the (re)validated programme(s) before they start their studies.

Whenever approved changes are made to the programme, a replacement handbook must be provided to both the University and to students.

The University holds the definitive documents of all its validated programmes, which act as a comprehensive programme archive, facilitating the gathering of information on programme development.

Student handbooks must be available for public scrutiny including being accessed through the institution’s intranet without password protection.

The approved student handbook will always be a ‘snapshot in time’ and some detailed information may expected to change during the lifetime of the programme. Such changes in the detail of these policies are not modifications to the programme. However it is essential that such changes are made to the document and that both students and the University are made aware of them. The University must be advised of any significant changes to personnel, organisational structure, or policy for interim approval.

D2.6 Correspondence events

In exceptional circumstances, and only following discussion and agreement with the QPM, the University may (re)validate a programme by correspondence.

A correspondence event follows the same rigor and scrutiny as a full validation event and requires a quorate panel (as described in section D2.4). Complete documentation is required and panel meetings with representatives and students from partner institutions are conducted online or by tele-conference. The outcomes are the same as for a (re)validation ie a recommendation of either approval or not, which may be with or without conditions and recommendations.
A minimum of 3 months should be allowed for this process, although it can, dependent on the circumstances, take longer, and partner institutions will incur a financial charge by the University.

A correspondence event is appropriate for institutions who have had a programme validated but have not recruited to this programme for a period of 2 years. If partner institutions then wish to recruit for the remainder of the approval period they would need to reassure the University that the programme is still current and appropriate resources are still in place.

### D3 Approval of foundation degrees

Those involved in the design and validation of foundation degrees are advised to use the [QAA’s foundation degree qualification benchmark](https://www.qaa.ac.uk/standardised-quality/approaches-to-validation) as an external reference point.

All proposals for validation or revalidation of a foundation degree should comply with the following expectations. Proposals should contain evidence of:

- systematic and formalised arrangements for maintaining effective links with employers and practitioners in the relevant field
- inclusion of at least 25% of work-related learning across the programme including an integrated programme of work-based learning equivalent to a minimum of 60 credits
- formally agreed progression routes to specified honours degrees, together with arrangements for approved bridging units.

### D4 Approval of flexible and distributed learning courses and programmes

The University allows (re)validations to be undertaken for learning modes other than purely face-to-face delivery.

The (re)validation process detailed in section D2 concentrates on programmes with a traditional classroom based delivery. If an institution wishes to move away from this delivery method, the (re)validation panel will be required to consider additional requirements to meet the additional level of scrutiny for programmes delivered using distance learning elements. The term ‘distance learning’ is used in this section to cover all forms of delivery other than 100% face-to-face.

A partner institution wishing to submit a distance learning programme for (re)validation will be expected to make this clear in the template for programme descriptions and in the planning meeting discussions with the OPM. It is acknowledged that an institution may wish to use delivery methods combining face-to-face and distance learning methods. The anticipated division of the methods should also be clear in template for programme descriptions.
partner institution will be required to submit the programme documentation set out in section D2 making clear reference to the delivery methods which are to be used.

In addition to the standard documentation, the partner institution should be able to provide the (re)validation panel with online information which clearly shows the panel the following:

- What the students will see while studying each module
- How the students and tutors will interact with the online material
- How the online material links in with the classroom delivery (if relevant)
- The additional support systems which will be in place to assist students working with a distance learning delivery

As well as ensuring the programme content, the (re)validation panel will also be ensuring the support systems both for tutors delivering the programme, and, students receiving the programme.

It is acknowledged that one of the benefits of providing distance learning delivery is that it allows the programme to retain currency and adjust quickly. The partner institution must pass all changes to the validated programme through to CICP in line with the major/minor change process in section D5.

D4.1 Flexible and distributed learning (FDL)

The practice of flexible and distributed learning has developed in many different forms in recent years so that the description is routinely applied to a wide spectrum of activities and delivery models. However, all models can be described at one level as a process through which knowledge and skills are acquired through distributed information and instruction. Flexible and distributed learning is normally characterised by the following:

- separation of place or time between learners and learning resources
- interaction between learners and learner resources conducted through one or more media
- a learning experience that could include interactions such as written correspondence study, face-to-face tuition, telephone tuition, computer and other electronic technologies – alone or in combination. Most providers use more than one medium for instruction. Such multi-media environments aim to provide a rich, interactive learning experience for students. The use of electronic media for instruction is widespread but is not necessarily a requirement; technology should be seen as an aid to delivery and to the provision of appropriate learning opportunities in accordance with individual learning needs
- provision that may be synchronous, with the students and staff of the providing institution interacting in real time, or asynchronous, the latter allowing access to learning resources at any time.
Within the overall constraint of resources, successful flexible and distributed learning providers rely for their effectiveness on a number of factors:

- high quality interactive teaching materials
- individual and individualised support for learners
- teaching (both content and pedagogy) informed by current best practice, research and scholarship
- systems (administrative and operational) to enable a whole range of necessary interactions between the learner and the institution
- robust quality assurance practices that interrogate all aspects of learner support and materials production.

Programmes to be offered by flexible and distributed means should be designed so that the academic standards of the awards are consistent with the UK Quality Code and meet the requirements of the University.

**Guidelines**

Institutions should refer to the [UK Quality Code for Higher Education](https://www.qaa.ac.uk/quality-code). The following guidelines, together with those contained in the UK Quality Code, will be used as a reference point for those involved in approval activities on behalf of the University and will inform the judgements they make.

Throughout this section the terms ‘providing institution’ and ‘provider’ are used to indicate the higher education institution that is responsible for designing the flexible and distributed learning system, for designing and delivering courses and programmes of study and for ensuring that academic standards meet the requirements of the OU as the validating university.

Flexible and distributed learning may be approached in a variety of ways. These guidelines identify the key matters an institution must demonstrate that it is addressing effectively, in particular through its own relevant quality assurance mechanisms as approved by the University.

a. Each course should provide the student with an interactive learning experience with an academic content appropriate to its level, credit rating and academic subject area. Materials and delivery mechanisms may take a variety of forms.

b. If producing written materials the provider should include informed peer comment at one or more draft stages and allow for the incorporation of feedback into subsequent and final versions of the learning materials. Such informed peer review might be both internal and external, and enable commentary to be made on both academic content and pedagogical approach. This should aim to ensure:
   - that the materials produced are of the required quality
• that the different media used are integrated so that they support and complement each other in enabling student achievement of the stated learning outcomes
• that student workload across the whole package is appropriate and that the materials satisfy the descriptors for study at the defined level of the course
• that the learning environment used in conjunction with the learning materials requires active engagement by the student and that students can test and monitor their progress through the course at appropriate points
• that the relationship between the materials and other components of student support activity such as face-to-face tutorials and residential schools is defined.

D4.2 Process for seeking validation

There are four stages to achieving full approval for programmes using flexible and distributed learning. These are:

Stage 1: Institutional approval for development and use of FDL materials

At institutional approval, institutional review or, if necessary, at an intermediate stage following initial approval, an institution intending to develop FDL programmes will be expected to:

a. demonstrate how it intends to apply the University’s principles relating to FDL modules and programmes;
b. demonstrate interpretation of the guidelines and associated commentary within its own institutional and national higher education contexts;
c. identify how modules and programmes will be developed;
d. demonstrate how current staff qualifications and experience relate to FDL;
e. identify the use to be made of external consultants and experts in FDL, including for critical reading and appraisal of draft materials;
f. identify how training will be provided for staff undertaking i) the development and support of FDL materials and ii) FDL teaching where such experience is lacking.
Stage 2: Validation of programme documentation and resources to support the programme

Following successful completion of stage 1 and well in advance of the intended starting date of the programme, the institution will need to submit programme documentation for validation. (The time needed in advance will vary according to the nature of the proposal. As a guide for a wholly new programme stage 2 would be expected at least one year in advance of the start date.) This should follow the requirements for programme documentation (Appendix 7) as far as possible in providing draft versions of the programme handbook and background document. It is anticipated that most of the information requirements for programme documentation will be available at this stage, at least in draft, including a detailed programme specification. It is recognised however that certain items, for example the detailed content of modules, will not be available at this stage; indicative module outlines will be sufficient.

Where the programme will be dependent on local tutors for support, confirmation will need to be provided at this stage of anticipated staffing resources, the criteria for their appointment together with the capacity of the institution to support delivery of the programme.

There must be agreement at this stage on the timescale for subsequent development of modules at the various levels of the programme, and the identity of the external assessors who will be involved (if relevant). The timescale will be influenced by factors such as pre-requisites, progression rules and programme flexibility as well as the need for validation of the materials in stages 3 and 4.

Agreement should be reached at this stage on contingency arrangements in the event of subsequent stages of the validation process not occurring or modules failing to be validated.

Stage 2 of the process, involving a full consideration of the proposals by a validation panel will, if successful, lead to the institution being able to advertise the programme as ‘subject to validation’ and begin marketing it to students.

Stage 3: Validation of first level modules in the programme

At any time following stage 2 or, if appropriate, simultaneously with stage 2, but not less than five months before the proposed start date of the programme, materials comprising all first level modules must be made available for approval by members of the validating panel. The University will wish to assess representative and complete samples of the learning experience and learning materials provided to the student in all the media employed in the programme.
If learning materials are being produced then they should be accompanied by a description of the process by which the materials have been developed demonstrating the iterative nature of the development via drafts which have been subject to peer review and external assessment, together with the comments of the external assessor at each stage.

Assurance should also be provided of the timescale for completion of the remaining modules in accordance with the agreement at stage 2.

Successful approval at stage 3 will allow registration of students for the full programme leading to the award and commencement of the first level of the programme.

Stage 4: Validation of intermediate and final level modules in the programme

At any time following stage 3 but not less than 3 months before students are enrolled on them, the full set of materials at each level must be approved in accordance with the agreed timescale from stage 3. The requirements will be the same as the initial material assessed at stage 2.

The University’s comments at stage 4 will be expected to influence the final version of the programme as undertaken by students, and any subsequent revision to the materials.

D4.3 Following validation

Once any conditions for approval concerning the content and structure of the programme have been met, the institution is required to provide the final definitive versions of the programme specification and the programme handbook before students are registered on the programme. Institutions must provide replacement documents, or amended sections, whenever interim changes are made to the curriculum or regulations. The current version of these documents for all approved programmes must be available in the institution’s learning resources centre, or other central resource.

All approved programmes must have External Examiners who have been appointed by the University. Institutions may propose External Examiners prior to validation as part of the process. The procedures for nominations are covered in detail in section F2.5.

It is the responsibility of institutions to schedule Board of Examiners meetings in consultation with external examiners. The University will send a representative to final award and progression board meetings and reserves the right to attend any other meetings of boards of examiners. Institutions are required to forward Board of Examiners dates to the University at the beginning of each academic year. The Academic Board (or equivalent body) of the institution is required to agree the membership of Boards of Examiners on an annual basis, at the start of the academic year.
The University will require from the institution an annual evaluation of the programme (see section E), together with the responses to any comments made by the External Examiners.

D5 Changes to programmes of study

Introduction

Changes to approved programmes of study may be made in between formal revalidation. The University expects partner institutions to review and adapt approved programmes in response to the outcomes of monitoring and evaluation and in accordance with their commitment to continuous improvement.

The University recognises essentially two types of change: minor changes and major changes.

Minor changes to programmes

Minor changes to programmes of study are those which do not change either singly or incrementally the basis on which the validation of the programme was made. They will usually not involve any change to the programme specification.

Some examples of minor changes are:
   a. change of module title
   b. replacement of a module in a pathway with another OU-approved module where this does not change the overall learning outcomes for the pathway
   c. minor changes to teaching or delivery methods

Major changes to programmes

Major changes to programmes of study are those which change the basic nature of the programme or student experience such as significant changes to learning outcomes, regulations or assessment. Major changes will usually involve a revision to the programme specification.

Some examples of major changes are:
   a. introduction of new modules or pathways within a programme changes of syllabus content which significantly affect learning outcomes so that it becomes a new module or pathway
   b. a change of programme title
   c. a change of pathway title
   d. a change to or addition of mode of study
e. significant changes to assessment or other programme regulations
f. adaptations to make the programme available to new student or client groups
g. significant changes to work-based or work-related learning components
h. new arrangements for collaborative provision
i. a change of level of a module.

Process for approval of changes to programmes

Where a partner institution is considering a major or minor change the University should be consulted.

Where experience of running a programme, developments in the subject area or advice from External Examiners leads to minor changes, these must be approved in accordance with the agreed procedures of the partner institution, and in consultation with the University. The University expects that programme teams will make full use of the ability to make minor changes in the interests of keeping programmes vibrant and up-to-date, and in response to the outcomes of quality monitoring. The institution must provide a brief account of such changes and the approval process for these changes to be given in the subsequent annual monitoring report (see section E) for the programme in question.

Major changes to a programme will require formal approval by the University. Proposals for changes should be submitted as part of the Annual Workload Request. If this is not possible for any reason the request should be submitted at least 6 months prior to the date on which the change is expected to come into effect. The form that the approval process takes will depend on the scale of the changes, but a rationale for the changes must always be provided. In most cases, consultation with external advisors will be required.

Major changes are generally approved by correspondence (see section D2.5). The documentation required to support the change should be discussed with the QPM. The QPM will send the proposal for changes electronically to a panel of usually 3 academics, one of whom will usually be an OU academic reviewer and one of whom will have been a panel member during the most recent (re)validation. The outcomes will be the same as for a (re)validation event, i.e. a recommendation of either approval or not, which may be with or without conditions and recommendations.

Where the changes being proposed are of such a magnitude that the programme specification requires significant revision, a full programme revalidation will be required. It is also possible that a number of smaller changes made to the programme during the approval period could also lead to a full programme revalidation. Changes affecting the assessment or progression of students must receive the explicit written consent of the approved External Examiners for the programme.

All changes will be incorporated into definitive programme handbooks which must be sent to the University before the start of the academic session to which they will apply.
D6 Other validation and revalidation issues

Approval of study below HE Level 4

Study below Level 4 can be either incorporated as part of the degree at the time of initial programme validation event or introduced later.

Students must register from the outset for the whole qualification of which the pre-Level 4 study forms part.

Study below Level 4 does not constitute a qualification in itself and carries credit at Level 0; it should be described in terms of student learning hours.

Students will either pass or fail below Level 4.

Students who pass pre-Level 4 are deemed to be at the appropriate level to commence Level 4 and must be guaranteed progression to Level 4 of the relevant named award.

Students who pass pre-Level 4 study but leave without progressing will be provided with a transcript by the partner institution. The transcript will state that such students have completed a course that would have enabled them to meet the admissions criteria for Level 4 of the relevant degree programme had they chosen to continue.

The institution must make sure that the Regulations for Validated Awards and the student handbook include the following:

a. the options available to students who fail pre-Level 4 study, and indicate arrangements for resits and progression
b. the options available to students who pass pre-Level 4 study but do not wish to progress immediately
c. the time limit within which students must progress to Level HE4 after completion of pre-Level 4 should suitably reflect the length of time the skills gained at the latter are likely to remain current with the former
d. in the case of foundation degrees, the time limit within which students may progress from pre-Level 4 to Level HE4 should reflect the length of time the skills gained at the former are current in the latter.
Validation of programmes approved by other authorities

The University values the fact that many Professional, Statutory and Regulatory Bodies (PSRBs) accept that programmes leading to OU validated awards fulfil their requirements for professional accreditation.

The University will agree procedures for joint validation with PSRBs where this is appropriate. A major objective of such agreements is to minimise duplication of effort.

Dual approval

Where a programme is approved or recognised by a Professional or Statutory Body or another authority, the institution must ensure that the body concerned is informed of proposals for validation and of the outcome.

D6.1 Approval of programmes offered in new subject areas

The University will consider the approval of programmes offered in areas not previously the subject of study leading to higher education awards. It will be the responsibility of the institution submitting proposals to establish a case for their consideration. In making such proposals factors to be considered should include whether:

a. there is sufficient intellectual depth within the subject itself to provide the challenges demanded by degree level study
b. a body of scholarship exists in the area
c. published research in the area is available in refereed journals
d. there is a formally constituted body of practitioners or people employed in the area
e. in the sciences, technology and health studies areas, a well-accepted scientific or medical basis exists for the theories embodied in the study
f. when practice is involved, a reasoned causal explanation for the techniques involved and the evidence of scientific study and assessment of the results of practice are available
g. those proposing the programme are appropriately qualified in established areas of study
h. qualifications are available at sub-degree levels
i. well-established qualifications are available in closely associated areas of study
D6.2 Approval of programmes offered in collaboration between institutions

Chapter 10 ‘Managing Higher Education Provision with Others’ of the Quality Code Part B specifically deals with these arrangements.

Any collaboration (for example joint or dual degree arrangements) in respect of the delivery and assessment of a validated programme requires explicit approval by the OU.

The University will seek assurances, through the validation and revalidation procedures, that the collaborative programme fulfils the University’s educational principles and that the collaborating institution provides a suitable learning environment for students undertaking programmes leading to OU validated awards.

The University requires programmes to be delivered through collaborative arrangements to be validated, approved and revalidated in accordance with the requirements set out in this Handbook, and subject to the same criteria as a programme offered by a single institution.

Particular attention will be paid to the appropriateness of the higher education learning environment provided for students in each institution, to the suitability of the staff to teach the approved curriculum, and to the arrangements made for the staff to collaborate on programme planning, delivery and the exchange of good practice.

The details of the proposed arrangements and locus of responsibility must be set down in a memorandum of co-operation in accordance with the paragraph below and be approved as part of the validation or revalidation process for each programme.

Memorandum of co-operation

A memorandum of co-operation must be agreed for each joint programme, the purposes of which are:

- to define the means by which the academic standards of the programme will be maintained
- to ensure that collaborative arrangements are clearly set out and operate smoothly, and that clear channels of authority, accountability and executive action are identified.

A memorandum of co-operation must specify:

- the name of the programme and the qualifications to be conferred
- the names of the institutions or bodies which are parties to the agreed memorandum
• the allocation of authority for the oversight and maintenance of quality assurance, and procedures for resolving any differences which might arise in respect of the programme between the collaborating institutions

• procedures and responsibilities for the initial validation, approval and subsequent revalidation of the programme, including provision for the implementation of changes to the programme required by validation, revalidation and annual monitoring in the collaborating institutions

• procedures and responsibilities in respect of programme management and monitoring and if these are to be divided between institutions, the details of each institution’s procedures and responsibilities will be specified

• assessment and examination arrangements where these involve collaboration between institutions

• procedures for agreeing all necessary financial arrangements and the provision of resources, both physical and human

• responsibility for communication of all necessary reports and other information to the OU

• responsibilities in respect of all administrative arrangements, including student registration, the location and general welfare of students, decisions relating to student progression and assessment, and the nomination, appointment and remuneration of External Examiners.

The memorandum of co-operation must be signed and dated on behalf of each institution or body by the Principal, Director or designated representative.

**D6.3 Approval of programmes validated by other validating universities**

The University will require an OU approved institution wishing to transfer a programme to the University from another validating body to undergo a full validation.

As part of this validation process discussions will include:

a. the possibility of transferring external examiners from the original validating body to the OU

b. the arrangements to be made in respect of students already following the programme.

**D6.4 The charge for validation and revalidation**

Fees invoiced by the University for the validation of a new programme, or included in the annual fee for revalidation of an existing programme, are non-refundable in the event that the programme is not approved.
D6.5 Procedures for appeals against panel judgements

The University cannot consider appeals against panel judgements on programme approval, but may consider complaints about the relevant process and conduct leading to a judgement. Complaints should be made to the Deputy Director (Partnerships) in the first instance.

D6.6 Programme closure

If the decision is made that a programme will cease to recruit students the University should be informed without delay. The University will require the institution to confirm the means by which quality and standards will be maintained for any students remaining on the programme; or that students are enabled to transfer to a suitable alternative programme elsewhere to complete their qualification. A decision to cease student recruitment to a programme will apply to recruitment to any level of that programme. Please consult with the Quality and Partnerships Manager if the programme is due for revalidation during the teach-out period.
E  Annual monitoring

E3  Feedback
E4  Using feedback
E1 What is annual monitoring?

Once approved, a partner institution is required to develop and deliver OU validated programmes within a quality assurance and enhancement framework defined by the University. One key element of this framework is the annual monitoring process. Annual monitoring is designed to:

a. ensure that partner institutions meet these responsibilities
b. enables the institution to reflect on issues arising from programme reports and evaluate its quality assurance and enhancement arrangements.

Reports should consist of:

c. an institutional overview
d. details of changes made to the administrative structure since the latest administrative audit or the latest annual monitoring exercise
e. a written statement confirming that the annual monitoring process has been comprehensively and satisfactorily carried out, and that programmes have been taught, managed and operated in accordance with the procedures agreed at validation
f. all annual programme evaluations
g. a quality assurance flowchart setting out the annual monitoring process.

It is important that the requirements outlined in this section are met in full. The Annual Monitoring Template should be used for both reflection on the previous year’s activity as well as action planning for the year ahead. Evidence to support these should include the good practice shown in Figure E1.

The University has standard templates for the annual institutional overview and annual programme evaluations available at: Annual Monitoring.
Information is gathered from various sources, and should include:

- statistical information
- outcomes of student feedback
- a copy of the programme specification
- programme team minutes
- reports and feedback from external examiners and academic reviewers
- the University's feedback from the previous year's annual monitoring exercise
- the list of conditions and recommendations arising from the programme validation or latest revalidation
- a copy of the previous year's programme enhancement plan, as submitted in the annual monitoring report
- issues that have arisen over the year related to learning resources, staffing, engagements with employers, the QAA, professional, statutory and regulatory bodies and UKVI.

Programme teams:
- meet to review the information above
- critically evaluate the evidence base and external examiners' reports
- reflect on engagements with academic reviewers.

Programme teams:
- draft annual programme evaluation and responses to external examiners.

Academic standards committee (or equivalent):
- considers all programme evaluations
- agrees responses to external examiners
- identifies institution-wide issues for the attention of academic board.

Academic board:
- considers a draft report for final approval.
- agrees the content of the institutional annual monitoring report and institution-level action plan.

Head of institution:
- signs off annual monitoring report and forwards to the University.

Figure E1 Flow chart showing good practice.
E2 Scrutinising the annual monitoring reports

In the term following final completion of an academic year, the academic standards committee or academic board should scrutinise the annual programme reports. It should then confirm that the proposed solutions to the identified problems are satisfactory and that the annual monitoring process has been comprehensively undertaken.

The academic standards committee or academic board must agree the content of the institutional overview, which must include:

a. details of the progress made to date on meeting conditions of approval and recommendations from the institutional approval or latest institutional review
b. identification of cross-institution themes and issues
c. an evaluation of student feedback practice and outcomes across the institution
d. an evaluation of personal development planning (PDP) policy and practice across the institution
e. an evaluation of how appeals, complaints, disciplinary matters and plagiarism have been dealt with; including cases dealt with formally, informally and by mediation (this should also indicate whether any particular student categories – such as, for example, students with disabilities or from ethnic minorities – are making a disproportionately high number of complaints or appeals)
f. identification of significant achievements and good practice that will be disseminated across the institution and how these will be disseminated
g. an evaluation of how the institution engages with the UK Quality Code for Higher Education including, where applicable, an updated mapping of institutional policies and practices against the Code and details of any measures taken as a result of the mapping
h. details of action taken in relation to any QAA or other external reviews, including UKVI applications, during the year
i. an account of staff development priorities and activities
j. an institutional enhancement agenda for the following year.

Annual monitoring reports will be considered by the University in conjunction with a subgroup of the Curriculum Partnerships Committee.

Partner institutions will receive individual feedback, which may identify issues requiring immediate action.

Institutions should retain documentation associated with annual monitoring so that the University or outside agencies can review it, if necessary, in the context of a revalidation, institutional review or relevant QAA review.
Evaluating programmes

Programmes should be monitored and critically reviewed throughout each academic year. In the term following completion of an academic year, each programme team must complete an annual programme evaluation for submission to the institution and the University. Each annual programme report forms a part of the overall institutional annual monitoring report to the University, as outlined in section E1. CVs relating to staff appointed during the academic year, and not previously sent to the University, must also be included.

Programmes are evaluated to:

a. contribute to their enhancement
b. contribute to the maintenance of academic quality and standards
c. monitor the quality of students’ learning experience
d. evaluate the effectiveness of quality assurance arrangements
e. record issues to be addressed and determine actions
f. identify and disseminate good practice
g. ensure ongoing, appropriate levels of staffing and expertise.

Institutions must submit programme statistics (including student recruitment, progression and achievement, appeals and complaints) in the format prescribed.

Data on appeals and complaints should be included in the report and institutions should evaluate the effectiveness and fairness of these procedures and reflect on their outcomes for the purpose of enhancement. Monitoring and evaluation of appeals and complaints should include cases dealt with formally, informally and by mediation.

Internal systems, such as student records, should identify whether any particular student categories (by age, disability, ethnicity and gender as a minimum) make a disproportionately high number of complaints or appeals. Any emerging patterns should be monitored in other areas such as student retention and achievement.

Programme teams should evaluate how the data compares with previous years, the HESA data and any other relevant comparative data, and reflect and comment on it under each heading of the programme evaluation report. The data, together with data on student feedback, may be used as evidence of:

h. maintaining standards
i. adequacy learning resources
j. meeting intended learning outcomes
k. student satisfaction
E3 Feedback

Student feedback

Institutions must formally obtain students’ views, including suggestions for possible improvements, for each programme and specify how this is obtained. Feedback should be evaluated in the following areas:

a. teaching quality
b. learning resources
c. assessment and feedback to students on assessment
d. student support and guidance
e. personal development planning opportunities (see also section E4).

Institutions should indicate action taken or planned as a result of student feedback.

Programme team

The programme team should reflect upon the success of the programme and consider whether amendments are desirable in the areas of:

f. curriculum design, content and organisation
g. teaching, learning and assessment
h. student progression and achievement
i. student support and guidance
j. learning resources, including staffing and staff development
k. quality management and enhancement.

Reviews of programmes by the University and external bodies

The programme team should also include details of actions taken to progress the following areas:

l. feedback received from the University about the previous year’s annual monitoring
m. conditions of approval and recommendations made at the latest validation or revalidation
n. issues following engagements with QAA, Ofsted and other professional, statutory and regulatory bodies.
Employer and workplace feedback, as appropriate

Include employers’ feedback in programme evaluation, particularly in the case of foundation degrees. It is evidence of the achievement of intended learning outcomes and can inform the review of programme specifications, teaching methods and assessment strategies. Where a programme includes student placement or work enrichment activities, include an account of the effectiveness of the arrangements in place and whether they can be enhanced, using student and employer feedback. In the case of foundation degrees, include an account of the continuous involvement of employers in the programme design and assessment.

Feedback from OU academic reviewers

Academic reviewers, who are the University’s faculty representatives, submit a summary of their engagements over the year. Where comments relating to particular programmes are submitted these should also be considered. It is expected that academic reviewers will engage with students at least once a year and will include feedback about these meetings in their reports.

E4 Using feedback

The remaining sections illustrate how to draw together all the conclusions reached on the quality of the programme, any improvements to be made and any good practice to share.

Learning resources, student support and staffing

Comment on the adequacy of learning support and physical and staffing resources. Evidence could include student evaluation, feedback from meetings involving student representatives, minutes of Teaching and Learning committees, programme committees (or equivalent), external examiners’ reports, student progression and achievement data, and reports from professional accrediting bodies or the QAA and programme validation or revalidation reports.

Include a staff list and ensure that this reflects all staff appointed since the last annual monitoring exercise or the latest validation or revalidation activity, together with an evaluation of the consequences of staff turnover. The relevant academic reviewer is asked to comment on the appropriateness of staff appointed and CVs should be submitted to CICP throughout the year after any new academic appointment.

Intended learning outcomes

Evidence of how the programme continues to support the intended learning outcomes might include feedback from external sources such as professional bodies or employers, student evaluation, graduates’ feedback, comments from external examiners, student progression and achievement data, and employment and destination data.
Personal development planning (PDP) policy and practice

Include a reflection on the effectiveness and student experience of PDP opportunities embedded in validated programmes, together with any identified actions for enhancement.

Include a critical reflection of the formal arrangements and structures that have been made available to students to support and monitor individual PDP activities not embedded in programmes. This should include consideration of student uptake, student feedback, perceived effectiveness of the activities and an account of identified strengths and weaknesses. Include details of the steps that will be taken to address any weaknesses.

Programme specification and proposals for enhancement

Programme teams must ensure that the programme specification and information to be published are up-to-date. The following areas should also be checked to ensure that:

a. the programme description and reading list are up to date
b. the teaching methods, coursework requirements and assessment arrangements for the academic year in question are clearly stated
c. minor changes arising from the monitoring process (refer to section D5 for major and minor changes) are made
d. any changes made following programme evaluations are publicised.

Examples of enhancement include:

e. presenting proposals for the programme’s future enhancement and solutions for any problems that need to be addressed
f. identifying good practice that might be incorporated into other programmes and providing a timescale for implementation
g. reporting on preparation for forthcoming events or interactions with QAA and other professional, statutory and regulatory bodies; or any actions arising from them
h. reference to any programme amendments that are proposed for approval during the coming year.

Action plan and report format

Institutions must provide an action plan that addresses all issues arising from a programme evaluation. Both strengths and weaknesses should be included. The action plan should include the timescale and responsibility for each action, and cross-referencing the page or section number of the report where the action was originally identified.
The report must be provided in the required format using the standard template that will be provided, together with guidance notes, by the University. The University’s template for annual programme evaluations can be downloaded from resources for partners.

**Student Transcripts**

As the Validating Institution, The Open University has a responsibility to ensure that adequate backup is in place in the event of a Partner Institution no longer being able to issue replacement records of study (See Chapter B10, Indicator 19 of the QAA UK Quality Code). In order to meet these requirements, Partner Institutions are required to provide us with transcripts for all students (completing and progressing) on an annual basis. These transcripts should conform to section 4.3 of the Diploma Supplement – see Appendix 2. The transcripts should be provided by the end of November each year. An annual request for this data will be sent out with detailed guidance.

Transfer of the student records will be via a secure file transfer system and the files received will be securely and confidentially stored. Details of the secure file transfer system will be provided at the same time as the annual request.

F  Assessment and External Examiners

F1  Assessment regulations for validated awards

See relevant sections of the UK Quality Code for Higher Education:
http://www.qaa.ac.uk/assuringstandardsandquality/quality-code/Pages/default.aspx

F1.1  Definition and purpose of assessment

Assessment is the means by which a student’s ability, progress and achievement are measured against agreed criteria. It provides the basis on which decisions can be made about a student’s learning needs and whether a student is ready to proceed or to qualify for an award. It also enables students to obtain feedback on their learning and helps them improve their performance. As such it must be an integrated aspect of a programme’s learning and teaching strategy.

The purpose of assessment is to enable students to demonstrate that they have fulfilled the intended aims and learning outcomes of the programme of study, and achieved the standard required for the award they seek. The University therefore requires that students are assessed in accordance with those aims and learning outcomes.

Assessment should be designed in such a way as to promote effective learning and to minimise the potential for plagiarism or other forms of unfair practice.

The institution’s arrangements for quality assuring assessment constitute a key area that the University will monitor closely following initial approval of a partner institution.

F1.2  Examiners’ judgement

Assessment must be carried out by competent and impartial examiners, and by methods which enable them to assess students fairly. In order to achieve this end, the University requires External Examiners to be associated with all assessment that contributes towards an OU validated award, and to be involved whenever there is progression from one level to the next in a validated programme. Their particular role is to ensure that justice is done to the individual student and that the standard of the University’s validated awards is maintained.
Within the constraints imposed by the requirements of section F1.1, boards of examiners have discretion in reaching decisions on the awards to be recommended for individual candidates. They are responsible for interpreting the Regulations for Validated Awards of the Open University and good practice in higher education. Their academic judgements cannot, in themselves, be questioned or overturned.

The University’s requirements related to the remit and powers of boards of examiners for validated awards are further detailed in section F4.

**F1.3 Types and methods of assessment**

Most assessment is likely to fall into one or more of the following categories:

a. diagnostic assessment, which provides an indicator of a learner’s aptitude and readiness for a programme of study and identifies possible learning problems or study needs

b. formative assessment, which is designed to provide learners with feedback on progress and informs development

c. summative assessment, which provides a measure of a learner’s achievement in relation to the intended learning outcomes of a programme of study.

A variety of assessment methods or instruments should be used. Each method may involve more than one of the three types of assessment defined above. The University requires that the methods and types of assessment encourage and support effective student learning and relate closely to the learning outcomes and subject matter of the programme of study. Such learning should be consistent with agreed subject benchmarks where available.

**F1.4 Regulations on assessment**

From 1 September 2015, all new student cohorts on programmes leading to an Open University validated award were subject to the Regulations for Validated Awards of The Open University. For students registered before 1 September 2015, the regulations under which they originally registered apply unless the partner institution agreed to transfer all its students to the new regulations.

From 1 September 2015, all institutions were required to comply with The Open University’s regulations. Some institutions are approved to operate under dual awards regulations.

In addition, each programme of study leading to a validated award must have assessment regulations covering all the matters set out in the sections below, in accordance with the University’s requirements and expectations. It is expected that assessment regulations governing different programmes will be as consistent as possible across the institution. Assessment regulations specific to a programme of study will be validated at the point of programme approval and subsequent revalidations.
The assessment regulations for a programme of study must state the basis on which students will be assessed for an award. They will relate the assessment requirements to the general educational aims and learning outcomes for OU validated awards, to the programme specification, and to any special assessment requirements associated with the award.

Assessment procedures must state clear criteria for marking and grading assessments, including learning outcomes-based assessment and assessment of employability skills.

Institutions are expected to review the continuing fitness for purpose of programme assessment regulations on a frequent basis and amend these as necessary. Review of assessment regulations may be undertaken through the annual programme evaluation, engagement with External Examiners, and preparations for revalidation. Any changes of a significant nature need to be approved by the University.

F1.5 Scheduling, timing and volume of assessment

The scheduling, amount and weighting of assessment types must be appropriate to the level of the award, the programme of study and the delivery mode. These issues are considered at validation and revalidation, but institutions are expected to keep them under review and monitor their effectiveness. The general underlying principles are that the amount and timing of assessment should ensure that intended learning outcomes are assessed, and that they enable effective measurement of student achievement. The scheduling of assessment must be such that students have adequate time to reflect on learning before being assessed, and that they can benefit from feedback.

F1.6 Staff development and training related to assessment

The University expects that institutions will provide any necessary support and training to members of academic staff involved in the assessment of students to ensure that they fully understand the application of assessment criteria. It is also expected that administrative staff will be given training in order to understand the assessment regulations and manage the administrative aspects of the assessment process effectively.

In accordance with the 4th indicator of sound practice in the UK Quality Code Chapter B6, Assessment of students and recognition of prior learning, institutions must ensure that relevant staff:

a. understand the theory and practice of assessment and its implementation, including the different purposes of formative and summative assessment
b. effective ways to evaluate the extent to which learning outcomes have been achieved.
c. effective ways to engage with students to enable and promote dialogue about, and, reflective use of feedback
d. are aware of the importance of designing assessments that minimise opportunities for plagiarism and other forms of unacceptable academic practice

e. have opportunities to learn about new approaches to assessment and devise new methods, as well the best way to operate exiting methods

f. develop awareness of assessment implications of the diversity of students, including cultural diversity, differences in learning methods and the need for inclusivity (see Indicator 10)

g. have other opportunities related to the interpretation of regulations, chairing assessment meetings, and record-keeping at boards of examiners.

F1.7 Assessment guidelines to students

The assessment of an individual programme of study will be subject to both Regulations for Validated Awards of the Open University and regulations specific to that programme, and so students must be made aware of the detailed requirements of both sets of regulations.

The institution must ensure that the assessment requirements for programmes of study that are made known to students include the type, volume, weighting and timings of assessments. Such information should be given to students at the beginning of each study phase, before any assessment is taken. Assessment regulations for each programme must be included in the student handbook.

F1.8 Feedback to students on performance

Students should be encouraged to reflect on their own performance. The University requires institutions to provide constructive and timely feedback to students on assessed work in order to promote effective learning and facilitate improvement. There is a need for adequate marking time to be available for staff to ensure this.

Feedback should be based on clear assessment criteria and it should be sufficient to provide students with an understanding of the way the mark was derived, and the extent to which learning outcomes have been met.

As noted in section F1.5 above, the scheduling of assessment must be such that it ensures that students can benefit from the feedback, as in the case of summative assessment following formative assessment.
F1.9  Assessment arrangements for students with impairments

If a student is unable to be assessed by the methods specified in the assessment regulations, the University expects institutions to try to accommodate that student by making special arrangements for examination or assessment.

The board of examiners may vary the methods as appropriate bearing in mind the learning outcomes of the programme and the need to assess the student on equal terms with other students.

The institution must have procedures in place for approving any special arrangements in advance of a student's first assessment. Institutions are expected to ensure that reasonable adjustments are made to accommodate students’ needs, having regard to any applicable legislation.

Failure to implement any special arrangements which have been formally agreed may be grounds for an appeal (section H of the Regulations for Validated Awards of the Open University).

F1.10  Identification of all elements of assessment

Programme assessment regulations must cover all assessments which formally contribute to progression or final award recommendations, at whatever point in the programme they are undertaken. The regulations on assessment must identify all the elements that will be assessed, including any assessed supervised work experience.

Regulations must specify which or how many elements must be passed to obtain an award and what weighting each carries in the assessments.

The minimum and maximum number of elements to be attempted must be identified in the regulations.

Regulations for Validated Awards of the Open University defines when and how each of the assessment elements will be assessed by internal examiners, and the role of External Examiners in moderating assessment.

F1.11  Processes for internal moderation of marks

The University expects that institutions have transparent and fair mechanisms for internal marking and moderation of marks. The UK Quality Code chapter on assessment points out that the use of clear assessment criteria and, where appropriate, marking schemes are key factors in assuring that marking is carried out fairly and consistently.
Programme assessment regulations must specify arrangements for second marking by internal examiners and other measures used to ensure that the first marking is fair and consistent with the marking scheme and to ensure comparability of assessment across a cohort. Institutions are required to establish procedures whereby marks generated by a first marker (or marking team) are scrutinised to verify the appropriateness of the marking and also bring a second judgment, particularly in relation to very good and very poor performance.

Within the Regulations for Validated Awards of the Open University clear guidance is provided on the following:

a. How borderline marks or grades are defined and treated.
b. In the assessment of larger groups of students, the criteria for sampling of assessment for the purposes of moderation. This includes the determination of the size of the sample to be drawn from each group of assessed work.
c. The circumstances that warrant the second marking of the whole batch of scripts as a consequence of any significant discrepancies between the first and second marking.
d. The method of reconciliation of the first and second marking where applicable. Where two markers cannot agree a final mark, the board of examiners, or a subsidiary committee, will determine a final mark in consultation with External Examiners.
e. In order to ensure consistency and fairness to students, how amendments to the marks of the sample as a result of internal moderation must be applied to the rest of the cohort.

**F1.12 External moderation of marks**

Following internal moderation, all assessment that contributes towards an award must be moderated by External Examiners, and advice provided to internal examiners as appropriate. The sample selected for external moderation should normally include all summative work for an agreed selection of students from a given cohort, based on the marks agreed by internal examiners.

**F1.13 Provision for exit awards**

Programme assessment regulations must make provision for exit awards at intermediate levels, for which clear achievement criteria must be stated. These will be approved by the University at validation and revalidation.

**F1.14 Penalties for late or non-submission of work**

Programme assessment regulations must set out the consequences and penalties incurred for late or non-submission of material for assessment. This information must be widely available to students.
F1.15  Identification of requirements from professional, statutory and regulatory bodies

Programme regulations must set out clearly specific assessment requirements that must be met in relation to professional bodies or accreditation requirements relevant to the programme of study.

Programme regulations must set out clearly any assessments under the regulatory framework of another awarding body which contribute to the award.

F1.16  Programme regulations on progression and attendance

Progression regulations must set out the way(s) in which students progress through the programme, and identify the elements that are compulsory or optional.

Where attendance is compulsory for certain elements, the regulations must give details of the attendance requirements to be met by students.

The regulations must give details of any formal arrangements designed to monitor students’ progress and warn students of possible failure.

Regulations must specify the provision for exclusion from the programme on academic grounds.

F1.17  Definitions of academic misconduct

The Regulations for Validated Awards of the Open University defines misconduct in respect of assessment, in particular what constitutes cheating or plagiarism. The regulations must also set out penalties and provide for procedures to be followed in cases where these offences are suspected or alleged.
F1.18 Procedures for dealing with academic misconduct

Boards of examiners should be responsible for decisions in relation to suspected cases of misconduct. The University requires that institutions have detailed procedures for investigating and documenting alleged misconduct in assessment within the following broad guidelines:

a. Where a case of misconduct is suspected the board of examiners should not come to a decision on the candidate’s result until the facts have been established. The institution should establish a process that will allow all evidence to be collated and documented before a case is reported to the board of examiners.

b. Where a case of misconduct has been established, the board of examiners should judge the significance of the academic misdemeanour and exercise its discretion as appropriate to the case. If it is established that a student has attempted to gain an unfair advantage, the examiners should be given the authority to rule that the student has failed part or all of the assessments, and the authority to determine whether or not the student should be permitted to be reassessed.

c. All such cases should be treated seriously and should be reported to the academic board.

d. Where evidence becomes available subsequent to the recommendation of the board of examiners it should be possible for the matter to be reopened.

e. Procedures dealing with misconduct must be applied consistently across the validated provision. Institutions must establish procedures that allow an institution-wide overview.

F1.19 Reassessment and resits

Within section 17 of the Regulations for Validated Awards of the Open University guidance is provided on options for the repeat of study, which includes partial and full repeat of a stage.

Programme assessment regulations must specify the provisions and conditions which shall be made for a student seeking to retrieve an initial failure by reassessment. Candidates who have failed in their first attempt to satisfy the board of examiners for an OU validated award may, where programme regulations permit (but see F1.20 and F1.21), be reassessed for the award at the discretion of the board of examiners on more than one occasion within the maximum planned length of the programme. All reassessment must normally be completed within the maximum period of registration.

Boards of examiners must be allowed discretion to interpret regulations for reassessment flexibly in the case of individual candidates, subject to the requirements of the University’s principle that a validated award is only made when a candidate has fulfilled the programme’s learning outcomes and achieved the required standard.

Regulations should make it clear that boards of examiners shall not unreasonably withhold permission for a student to be reassessed in accordance with programme regulations.
Reassessment regulations should provide guidance to boards of examiners and students on the circumstances under which students may be allowed to:

a. retake a module  
b. resit failed assessment  
c. take a replacement assessment  
d. take an alternative replacement module.

Reassessment regulations should also specify the criteria for the capping of marks for reassessed elements. Except as permitted under F1.23, students who have already passed a module shall not be allowed to be reassessed for that module nor retake in order to improve marks.

A candidate for reassessment may not demand reassessment in elements which are no longer current in the programme. The board of examiners may, at its discretion, make such special arrangements as it deems appropriate in cases where it is not practicable for students to be reassessed in the same elements and by the same methods as at the first attempt. However, where a validated programme is discontinued, provision has to be made to ensure fair assessment opportunities for all students who have been enrolled. This must include appropriate provision for resit opportunities and for students who intermit or intercalate in accordance with the validated programme regulations.

Where programme regulations permit, the board of examiners may determine that the candidate has achieved the level required for a lower award and may offer the candidate the choice of accepting the lower award immediately or resitting for the higher award.

F1.20 Reassessment regulations specific to honours degrees and the MEng

Programmes leading to the awards of a Bachelor’s Degree with Honours or a Master of Engineering must require students to demonstrate the capacity for sustained independent and high quality work, and this needs to be taken into account in the regulations for assessment and reassessment.

Reassessment regulations for these programmes should allow candidates who fail to achieve Honours or Master of Engineering at the first attempt to be re-examined once only at the discretion of the examiners.

It is expected that reassessment regulations will specify the highest classification of Honours that can be achieved after re-examination. This will normally be Third Class. Where a Pass award is available on an Honours programme, examiners may offer the candidate a choice of accepting a pass award or being reassessed for an Honours award.
F1.21 Reassessment regulations specific to masters degrees and postgraduate diplomas

Regulations for the award of a Master’s Degree or a Postgraduate Diploma must specify that candidates who fail at the first attempt may be re-examined at the discretion of the board of examiners in any or all of the elements of assessment once only.

F1.22 Reassessment regulations specific to professional doctorates

Candidates for the award of a Professional Doctorate who fail in their first attempt to satisfy the board of examiners in the assessment for the award may, at the discretion of the board of examiners, be permitted to be reassessed, once only, in any or all of the elements of assessment. Programme regulations will be required to make clear the conditions under which resubmission and reassessment for the Doctorate will be permitted and, where appropriate, the circumstances under which the award of a Master’s Degree or Postgraduate Diploma may be recommended.

F1.23 Provisions for compensation

Within the Regulations for Validated Awards of the Open University, the conditions for the application of compensation at stage level is detailed.

Assessment regulations must make clear any provision for compensation for failure in assessment, and identify any elements that may under no circumstances be the subject of compensation for failure. Compensation should not be applied to:

a. an element that forms a substantial proportion of the assessment for the award
b. an element that is central to the fulfilment of programme aims
c. an element specifically precluded from compensation by programme regulations.

F1.24 Extenuating circumstances

The Regulations for Validated Awards of the Open University, section F, provides information on procedures for extenuating circumstances.
F1.25  Aegrotat

An Aegrotat award may be recommended, where it is available, when the board of examiners does not have enough evidence of the student’s performance to recommend the award for which the student was a candidate or a lower award specified in the programme regulations, but is satisfied that but for illness or other valid cause the student would have reached the standard required.

Before a recommendation of an Aegrotat is submitted to the University the student must have signified willingness to accept the award and understand that this implies waiving the right to be reassessed.

F1.26  Provision for viva voce examination

Section 16 of the Regulations for Validated Awards of the Open University provides information on provision for viva voce examination.

F1.27  Procedures for the conduct of assessment

In addition to procedures included within The Regulations for Validated Awards of the Open University, partner institutions must produce regulations or codes of practice which set out arrangements for the conduct of assessments including:

a. respective student and staff responsibilities. This should include, for example: any requirements for staff to mark and return annotated work in a timely manner, or requirements for students to retain material for a specified period

b. invigilation requirements setting out, for example, the minimum ration of invigilators/candidates and the duties of invigilators for collection and handling of scripts

c. arrangements to ensure the security of assessment papers and other forms of assessment, such as arrangements for tracking and return of drafts sent to External Examiners and original sent for secure printing

d. arrangements to ensure that students taking an assessment are the same as those against whose names the marks are recorded by, for example, checking against (photo)identification

e. special arrangements that may be necessary for the assessment of materials based on work placements or periods of study abroad, where such assessment cannot be conducted by an overseas partner

f. arrangements for recording and publishing assessment decisions, communicating results to students and clarifying when results will be ratified if these are provisional

g. arrangements for the retention of assessed materials, whether by students or the institution, normally until the last opportunity for appeal has passed.
The procedures and arrangements above will be monitored by the University at institutional approval and review through administrative audits. In addition, institutions are required to report any significant changes to such processes in their annual monitoring report.

**F1.28 Appeals and complaints procedures**

Underlying principles:

a. The University requires institutions to have clear and well-publicised appeals and complaints regulations and procedures, including the grounds for academic appeal defined below.

b. The QAA recognises that there may be times when what is expressed by a party presenting a case as a complaint contains within it an appeal and vice versa. It recommends that institutions make it possible for complaints and appeals to be reclassified in consultation with the person complaining or appealing (UK Quality Code, chapter B9). It also suggests that institutions may find it helpful to describe their general approach to handling complaints and appeals where these are linked.

c. Although the underlying principles and some of the operational procedures may be common to complaints and appeals, there are distinctions between what may constitute an appeal and what may constitute a complaint. Whereas appeals are restricted to requests for revision of decisions by a board of examiners, a complaint can be raised over a wider range of matters. The QAA defines a complaint as ‘the expression of a specific concern about matters that affect the quality of a student’s learning opportunities’ (UK Quality Code, chapter B9).

d. Institutions are required to monitor, evaluate and review the effectiveness of their formal appeals and complaints procedures, taking into account current good practice and having regard to any applicable law. The University monitors and review institutions’ internal procedures through its annual reporting and at institutional approval and review through administrative audits. Administrative audits also monitor how information about formal appeals and complaints procedures are made available to students. The latter should cover both the University’s and the institution’s own internal appeals procedures.

The Regulations for Validated Awards of the Open University, section H, provides information on academic appeals and complaints that includes information on:

e. General requirements related to appeals and complaints procedures.

f. Grounds for appeal.

g. Consideration of appeals by the academic board or its appointed sub-committee.

h. Procedures of the appeals committee or equivalent.

i. Consequences of established cases of procedural irregularity.

j. Action following completion of complaint or appeal procedures.
Report to the University:

k. As part of annual monitoring, institutions are required to provide an annual report containing an analysis of how cases of academic appeals and complaints have been dealt with, including the nature and outcomes of such cases.

l. The University reserves the right to require a further report from the academic board if it has reason to believe that the standard of a validated award may be at risk or that the University’s regulations for validated awards may have been breached. The University will intervene directly if concerns remain after all institutional procedures have been exhausted.

Appeals to the University

m. If students have exhausted all institutional procedures open to them in requesting a review of a decision of a board of examiners, they have the right to submit a formal appeal to the University. The University will conduct its procedures for appeals and complaints as detailed in Appendix 3.

n. The institution concerned has a right to be heard and to present its case in relation to any formal appeal or complaint made against it to the University. In such cases an institution is expected to:

o. Respond in an open and timely manner to any requests made by the University in relation to a formal appeal or complaint, without disadvantage to the student

p. Act in accordance with the final outcome of a formal appeal or complaint to the University

q. Report to the University that action has been taken in response to a formal appeal or complaint.
F2 Regulations relating to External Examiners

Relevant external reference points:
See relevant sections of the UK Quality Code for Higher Education.

The following are available on the validation website (see Resources for partner institutions) at http://www.open.ac.uk/cicp/main/validation/resources-partners/external-examiners:

- Guide for external examiners of OU validated awards
- External examiner report template
- Application forms for appointment/extension of appointment of external examiners

F2.1 Institutions’ responsibilities related to External Examiners

Partner institutions are responsible for:

a. nominating External Examiners
b. providing External Examiners with briefing and induction (in addition to OU briefing)
c. managing boards of examiners
d. ensuring that reports of External Examiners are formally considered and, where necessary, that appropriate action is taken and informing External Examiners, in writing at the beginning of their appointment, that they have a right to raise matters of serious concern with the University’s Vice-Chancellor, if necessary by means of a confidential report which may be copied to the head of the institution.
e. sending External Examiners a response setting out the action taken following receipt of reports.
f. providing the University with an account of the responses made to the issues raised by External Examiners in an annual programme evaluation report.
g. making External Examiners’ reports available in full to students, with the sole exception of any confidential reports made directly to the head of institution
h. including the name, position and institution of their External Examiners in module or programme information provided to students. External Examiners must refer any direct correspondence from students back to the institution, and institutions should include this in their guidance to External Examiners.
F2.2 The University’s responsibilities related to External Examiners

External Examiners are appointed by, and report to, The Open University. The terms under which they engage with the partner institution and the programmes to which they are appointed are those determined by The Open University.

The University sets and keeps under review the regulations and procedures related to external examining.

The role of the External Examiner is critical to the University's confidence in the quality and standards of its validated provision. The University places great value on the External Examiner system and requires its partner institutions to give a high priority to responding to their advice and feedback.

F2.3 The rights and responsibilities of External Examiners

The University appoints External Examiners for two main reasons: to benefit from direct experience of relevant standards in other universities; and to subject its examining methods and processes to external assessment.

The role of External Examiners appointed by the University for a validated programme is to ensure that justice is done to the individual student and that the standard of the University’s validated awards is maintained. In order to carry out these responsibilities, External Examiners must:

a. be able to judge students impartially on the basis of the work submitted for assessment without being influenced by previous association with the programme, the staff or any of the students
b. be able to compare the performance of students with that of their peers undertaking comparable programmes of higher education in the UK and in the light of subject benchmarks and qualification descriptors, as appropriate
c. jointly, with the Board of Examiners, moderate and approve the final draft of each examination paper or end-of-module component together with the related marking scheme or notes for the guidance of markers. This activity should include scrutinising the form and content of examination papers, coursework and other assessments that count towards the award in such a way as to enable the External Examiners to judge whether students have fulfilled the aims and learning outcomes of the programme and reached the required standard. This activity should include alternative assessments and adjustments made for students with declared disability or impairments, in order to ensure that all students will be assessed fairly in relation to the programme syllabus and regulations
d. be consulted about and agree to any proposed changes to the approved assessment regulations or assessment strategy which will directly affect students currently on a programme

e. have access to all assessed work, and see samples of the work of students proposed for each category of award and for failure, in order to ensure that assessment criteria have been interpreted correctly and that there is parity of assessment across the cohort

f. consider the reliability of the mode of monitoring the marks of module assessments and the final end-of-module component (eg examination) and report to the board of examiners on such revisions as they consider necessary

g. have the right to moderate the marks awarded by internal examiners where this is within the regulations for the programme and does not bias the overall assessment or cause unfairness to individual candidates

h. have the right to meet students and, where appropriate, conduct a viva voce examination of any candidate

i. ensure that the assessments are conducted in accordance with the approved programme regulations

j. attend the meetings of the board of examiners at which decisions on recommendations for award are made and ensure that those recommendations have been reached by means in accordance with the University’s requirements and normal practice in UK higher education

k. participate as required in any review of decisions about individual students’ awards taken during the examiner’s period of office

l. report back to the University and the partner institution on student performance and academic standards as well as on the effectiveness of the assessments and any lessons to be drawn from them

m. report in confidence to the University’s Vice-Chancellor on any matters of serious concern arising from the assessments which put at risk the standard of the University’s validated award.

Within the terms of programme regulations, it is for External Examiners to decide in detail how to fulfil the responsibilities described above. The University requires programme regulations for validated awards to describe the nature and methods of assessment and show how External Examiners will be involved in assessment. External Examiners should be involved in all assessment that counts towards the recommendation of an award, including progression from one stage of the programme to the next.

Programme regulations related to external examining will take into account the operation of any tiered boards of examiners where applicable. As noted in section F4, terms of reference of subsidiary boards need to be approved by the University, normally at validation and revalidation.
F2.4  Non-attendance at boards of examiners meetings

A board of examiners which does not include approved External Examiners is not authorised to assess students for an award or to recommend the conferment of an award upon a student. Recommendations to the University for the conferment of an award will not be valid without the written endorsement of the External Examiners. See also Section F5 on the role of the University's representative.

All External Examiners are required to attend relevant board of examiners meetings, and it must not be assumed that a board can be held without the presence of the External Examiner. Where unforeseen circumstances prevent attendance and an External Examiner is the sole examiner, the institution and the University should be informed so that a decision can be made regarding the postponement of the board. Where an External Examiner is a member of a pair or team of examiners, he/she should inform fellow examiners of his/her absence.

In the event of non-attendance, External Examiners must indicate this in their written report at paragraph 8, ‘The administration of the assessments, operation of examination boards...’ and confirm that they were fully involved in the moderation of assessment and the external examining process. The written report should be submitted in advance of the meeting of the board of examiners so that the External Examiner’s comments can be formally considered and recorded.

Non-attendance by an External Examiner without good cause would usually constitute grounds for the termination of appointment.

F2.5  Criteria for the appointment of External Examiners

An External Examiner should be a senior member of another university or have appropriate standing, expertise and experience to maintain academic standards in the context of UK higher education as a whole, as indicated by accepted attainments and standing.

The University will only approve External Examiner nominations if the nominee can show appropriate evidence of the following criteria. These must be taken into account by institutions nominating External Examiners and will be adopted by the University during scrutiny of nominations by appraisers and in approval:

a. An External Examiner must be resident in the UK and have the right to work in the UK. As part of the appointment process, the University will undertake checks to ensure that these criteria are met to its satisfaction.

b. Knowledge and understanding of UK sector agreed reference points for the maintenance of academic standards and assurance and enhancement of quality
c. Fluency in English and, where programmes are delivered and assessed in languages other than English, fluency in the relevant languages(s) (unless other secure arrangements are in place to ensure that External Examiners are provided with the information required to make their judgments)

d. Competence and experience in the fields covered by the programme of study, or parts thereof

e. Relevant academic and/or professional qualifications to at least the level of the qualification being externally examined, and/or extensive practitioner experience where appropriate

f. Sufficient standing, credibility and breadth of experience within the discipline to be able to command the respect of academic peers and, where appropriate, professional peers

g. Competence and experience relating to designing and operating a variety of assessment tasks appropriate to the subject and operating assessment procedures in assessing students in the subject area concerned.

h. Awareness of current developments in the design and delivery of relevant curricula

i. Familiarity with the standard to be expected of students to achieve the award that is to be assessed

j. Competence and experience relating to the enhancement of the student learning experience

k. Meeting applicable criteria set by professional, statutory or regulatory bodies.

F2.6 Other considerations when nominating External Examiners

It is expected that External Examiners will be drawn from a variety of institutional and professional contexts and traditions in order that the programme benefits from wide-ranging external scrutiny. Phasing of appointments to the team is a way of ensuring continuity. There should be appropriate balance and expertise in the team of External Examiners, including for example:

a. examining experience

b. academic and professional practitioners

c. the range of academic perspectives

d. members from different types of institution of higher education.

If someone without external examining experience is appointed, it is expected that they will be appointed to join a more experienced team and/or with agreement that a more experienced External Examiner, from within the same institution to which they are being appointed, will act as a mentor.

Ideally, there should not be an External Examiner within a programme area from the same institution which has provided examiners for that programme area during the past five years.
F2.7 Conflicts of interest

An External Examiner must be independent of the module on which he or she serves. In line with QAA guidance, an External Examiner should not be appointed if any of the following conflicts of interest are identified. The University will not approve the appointment of anyone who:

a. is a member of a governing body or committee of The Open University or one of its collaborative partners, or a current employee of The Open University or its collaborative partners
b. is a member of a governing body or committee of the partner institution or one of its collaborative partners, or a current employee of the partner institution or its collaborative partners
c. has a close professional, contractual or personal relationship with a member of staff or student involved with the programme of study
d. is required to assess colleagues who are recruited as students to the programme of study
e. is, or knows they will be, in a position to influence significantly the future of students on the programme of study
f. is currently, or has recently been, involved in substantive collaborative research activities with a member of staff closely involved in the delivery, management or assessment of the programme or module(s) in question
g. is a former member of staff or student of The Open University unless a period of five years has elapsed and all students taught by or with the External Examiner have completed their programme(s)
h. is a former member of staff or student of the partner institution, unless a period of five years has elapsed and all students taught by or with the External Examiner have completed their programme(s)
i. would replace an External Examiner from the same department in the same institution.
j. is required to assess colleagues who are recruited to the programme of study
k. is from the same department of the same institution as another member of that team of External Examiners
l. is a consultant to the Module/Programme team, or if they contributed to writing the teaching materials. (In exceptional circumstances, the University may approve the appointment of a person who contributed to the module/programme as External Examiner, provided that this is not when the module is first presented, and that there is no other eligible person available to serve.)

There must not be a reciprocal external examining arrangement involving cognate programmes in two institutions.

A proposed External Examiner should not examine at more than one OU partner institution at any one time.
Examiners should not have too heavy a workload in respect of external examining duties. An examiner should normally hold no more than two External Examiner appointments, for taught programmes/modules at any point in time.

A proposed External Examiner should not have been an examiner on a cognate programme in the institution.

**F2.8 Nomination of OU staff as External Examiners**

The following categories of people are not eligible for appointment as External Examiners on any validated award:

a. all salaried staff of The Open University (including associate lecturers)
b. Open University Residential School staff
c. visiting members of academic staff
d. part-time members of academic staff holding dual appointments.

**F2.9 Nomination of individuals retired from their academic or professional posts**

It is the University's expectation that External Examiner nominations should be submitted on behalf of individuals who have current substantive academic or professional posts. However, retirees can be considered provided they have retired recently and still have an affiliation with a UK institution of Higher Education. The University will consider the nomination provided that a robust case can be made for that person's continuing academic or professional currency for the duration of the proposed appointment.

**F2.10 The nomination process**

The University has standard forms for the nomination of External Examiners, which can be downloaded from the validation website in the Resources for Partner Institutions section.

The University will organise the appraisal of External Examiner nominations. In all cases the University retains responsibility for approving and appointing External Examiners for its validated awards.

In making recommendations for the appointment of External Examiners for a programme, appraisers will be seeking to ensure that the External Examiners will be competent and impartial.
Institutions must ensure that nominations arrive at least six months before duties of the examiner are expected to be taken up. A nomination should be made on the appropriate application form and include the nominee’s current and detailed curriculum vitae. The nominee’s curriculum vitae should be submitted both in hard copy and electronically. In considering nominations, institutions are asked to ensure the board of examiners as a whole maintains an appropriate balance and diversity in order to ensure that students are fairly assessed.

At any stage a nomination may be rejected by the University, in which case an institution may be asked to provide a new nomination, or the University may appoint an External Examiner of its choosing. In addition, further details or clarification may be requested from the nominating institution at any point.

F2.11 Approval and appointment of External Examiners

All External Examiner appointments are made by the University. The University will follow its approval process before making any appointment. External Examiners formally report to the University but are asked to send copies of their reports to the partner institution.

F2.12 External Examiners’ term of office

New examiners should take up their appointments on or before the retirement of their predecessors. External Examiners should remain available after the last assessments with which they are to be associated in order to deal with any subsequent review of decisions.

The duration of an External Examiner's appointment will normally be for four years, with an exceptional extension of one year to ensure continuity. This must include any time already served as an external advisor or assessor on the same module or programme and is not dependent on the frequency of presentation of the programme or module.

An External Examiner may be reappointed in exceptional circumstances but only after a period of five years or more has elapsed since their last appointment.

If External Examiners change jobs, a revised CV must be submitted to the University to ensure that they are still eligible to externally examine the programmes for which they have been appointed. (See F2.5 – F2.9.)
F2.13 Requests for extension of approval of External Examiners

The nomination process is also used for proposals to extend the period of approval of existing External Examiners or to extend their duties to other related programmes such as a new pathway or a top-up award. Requests for the extension of the period of approval are not generally encouraged, but can be considered in extenuating circumstances, in which case a clear rationale for the request must be provided on the appropriate nomination form.

The term of office of an existing External Examiner may be extended in extenuating circumstances, up to a maximum of 12 months beyond the expiry date of the original appointment.

F2.14 Notification of decisions

External Examiners will be appointed by the University. The University will send an offer of appointment to the approved nominee. Once a contract acceptance form has been returned by the examiner and any right to work check completed, the University will send an approval letter to the head of the partner institution, copied to the institutional primary contact.

The University will write to all newly appointed External Examiners providing them with a copy of the most recent validation report for the programme(s) to which they have been appointed, together with some briefing material. This will consist mainly of clarification regarding the University’s expectations, reporting lines, and the relationship between examiners, partner institutions, and the University. As noted in section F3, partners are required to supplement this material with a range of institution-specific induction and briefing material that they are expected to provide to External Examiners.

F2.15 Payment of fees

The University will be responsible for the payment of External Examiner fees and expenses.

F2.16 Termination of approval of External Examiners

All termination of External Examiner appointments must be undertaken by the University. If a partner institution wishes to terminate the appointment of an External Examiner, the University must approve the termination and be informed in advance of the grounds for termination. A reasonable minimum period of notice should apply. If possible, termination should occur at a natural point in the assessment cycle, such as after the last meeting of board of examiners at the end of the academic year.

If an External Examiner resigns, the University should be informed immediately.
The University reserves the right to terminate the appointment of an External Examiner at any time, subject to approved University procedures, for failure by the External Examiner to fulfil his/her obligations, for example failure to produce reports in a timely manner or to an appropriate standard.

Other circumstances that may constitute grounds for termination include:

a. failure to attend a board of examiners without good reason
b. a new conflict of interest that cannot be resolved (eg due to change of the External Examiner’s position subsequent to the appointment).
c. discontinuation of the programme.

F2.17 Chief External Examiners

The University may appoint a Chief External Examiner from within a team of approved External Examiners, should the approved board of examiners’ arrangements require it. The approval of the appointment of an External Examiner who is to act in this capacity will be subject to the criteria set out above.

The Chief External Examiner role can be useful in a variety of situations, for example:

a. for institutions who use a tiered exam board system holding subject then award and progression boards
b. by institutions who have a large provision and wish to be able to oversee exam board decisions at Faculty/school level.

We see the Chief External Examiner as working closely with their institutions and CICP to use the role flexibly to ensure the individual programme/subject level External Examiners and institution programme teams see the value of the role.

The following guidance on the role of Chief External Examiners gives some ideas on how their role may be developed. We anticipate that following the appointment of a Chief External Examiner, discussions will be held with the partner institution and the QPM to formalise key areas of activity.

Guidance on role of Chief EEs

c. Be able to review a sample of student work across the programmes from selected modules
d. As a last resort, be able to confirm grades for EEs who are not able to be physically present. (This normally depends on the External Examiner having contacted the Chief EE with a written report confirming they have seen the work, agree the grades and providing the Chief EE with their comments.)
e. Be able to make observations on the conduct of the Exam Boards
f. Discuss the effectiveness of the team of External Examiners with Registry
g. Mentor any new External Examiners without previous experience of external examining
h. Identify where there are disparities, areas of concern or good practice across the faculty provision

**F2.18 External Examiners’ reports**

External Examiners are required to make a report following each board of examiners they attend (at least annually) to the academic board of the partner institution and to the University on the conduct of the assessments just concluded and on the standards being set and achieved including:

a. whether the standards set are appropriate for the award by reference to any agreed subject benchmarks, qualifications framework, programme specification or other relevant information
b. the quality of the students’ work, and their knowledge and skills in relation to their peers on comparable programmes
c. the strengths and weaknesses of students
d. the quality of teaching and learning, as indicated by student performance
e. the quality and appropriateness of the curriculum, course materials and learning resources
f. the quality and fairness of the assessments, in particular their design and structure, relation to stated objectives and learning outcomes of the programme, and marking
g. good practice and innovation related to learning, teaching and assessment
h. opportunities to enhance the quality of the learning opportunities provided to students
i. where the programme has specific work-related learning outcomes (eg foundation degrees) the assessment and achievement of these outcomes, including employers’ involvement where relevant
j. the administration of the assessments, operation of examination boards, briefing of External Examiners, access of External Examiners to essential materials, etc.
k. whether any issues identified in previous External Examiners’ reports have been addressed by the institution.

It is expected that such reports will be received no later than one month following the final meeting of the board of examiners at which awards are decided. The University has a specimen format for the submission of reports which External Examiners must use.

The purpose of the report is to enable the University and the institution to judge whether the programme is meeting its stated objectives and to make any necessary improvements, either immediately or at the next revalidation. Institutions are required to give detailed written feedback to External Examiners on action taken in response to their reports.
Partner institutions are required under their institutional agreement to provide the University with an annual report for approved programmes which includes an account of the responses made to the issues raised by External Examiners. Where an External Examiner’s report raises issues which call into question the quality of the programme or the standard of the award, the University requires an immediate account of the measures being put in place to consider the issues and identify and rectify deficiencies. The Open University will need to provide a considered and timely response to any confidential report received, outlining any actions they will be taking or require the partner institution to take as a result.

Institutions must make External Examiners’ reports available in full to students, with the sole exception of any confidential report made directly to the head of the institution.

If External Examiners’ reports are either too brief or too broadly phrased to provide an agenda for enhancement, The Open University will be responsible for taking appropriate action to ensure that more comprehensive reports are submitted.

Where an External Examiner has a serious concern relating to systemic failings with the academic standards of a programme or programmes and has exhausted all published applicable internal procedures, including the submission of a confidential report to the head of the institution, he/she may invoke the QAA’s concerns scheme and/or inform the relevant professional, statutory or regulatory body.

The report presented at the end of an External Examiner’s term of office should include a brief retrospective on their experience and perceptions of the programme/module throughout their association with it.

**F3 External Examiner briefing**

**F3.1 Introduction**

The University will provide External Examiners with a briefing and induction. This section offers guidance for institutions on local briefing and induction of new External Examiners. It is recommended that each institution should develop a set of briefing documents for their External Examiners to supplement the regulations set out in section F2, to give a range of further institution-specific information. The University requirements must be included in the briefing. The University will approve briefing and induction arrangements as part of the approval process, during follow-up to institutional approval for new partner institutions and as part of institutional review for others.
The University will write to all newly appointed External Examiners providing them with a copy of the last External Examiner report for the programme(s) to which they have been appointed, together with some briefing material. This will consist mainly of clarification regarding the University’s expectations, reporting lines and the relationships between Examiners, partner institutions and the University.

**F3.2 Written briefing to External Examiners**

The written briefing for External Examiners will cover the items below. Some may be addressed in the appointment letter, others through a briefing paper and others by supplying External Examiners with relevant institutional or programme documents. The OU’s written briefing will include:

**General Information:**

A comprehensive list of OU contacts, administrative and academic, with an indication of who to contact about what. This will vary according to where responsibility for different aspects of the relationship with External Examiners is handled in the institution.

a. Term of appointment, with provision for termination on either side. This should indicate the required notice from the External Examiner and give possible circumstances for termination by the institution related to non-fulfilment of responsibilities, such as no provision of the required report and non-attendance at the board of examiners without compelling reason, or changes in circumstances affecting the criteria of appointment.

b. Information about the membership and remit of the external examining team for the programme, identifying a Chief External Examiner who will be responsible for the preparation of summaries of External Examiners’ findings for publication.

c. Arrangements for the submission of reports.

d. Arrangement for payment of fees and expenses.

The institution’s written briefing should include:

e. A comprehensive list of institutional contacts, administrative and academic, with an indication of who to contact about what. This will vary according to where responsibility for different aspects of the relationship with External Examiners is handled in the institution.

f. The programme handbook, incorporating the programme specification, which will include any programme specific assessment regulations, marking schemes and assessment criteria – both generic and module-specific, as appropriate.

g. The Regulations for Validated Awards of the Open University, including assessment regulations for the programme of study.

h. Information about internal moderation arrangements.
Arrangements relating to moderation of assessment:

The head of department or programme leader is usually responsible for:

i. Arranging External Examiners’ scrutiny of assessment-setting.

j. Arrangements for sampling of assessments are usually negotiated by the head of department or the programme leader with the External Examiners, in accordance with the University's expectations as set out in section F2.3.

k. Provision of marking schemes and the internally moderated list of marks for the cohort being assessed.

l. Arrangements for attendance at boards of examiners and any other visits, for example observation of practice, indicating timing and who to contact.

m. External Examiner involvement in resit examinations, appeals, cases of cheating and plagiarism.

F3.3 Induction meetings

It is recommended that new External Examiners are invited to visit the institution as soon as possible after appointment to clarify their role and responsibilities, to meet staff and, if desired, students. This will also provide an opportunity to discuss interactions during the academic year such as dates of visits and sampling of assessments.

If there is a group of new External Examiners, the institution may wish part of the visit to be a generic induction meeting, providing an introduction to general policies and regulations.

Some institutions hold open meetings for all External Examiners to provide general briefing about developments and opportunities for discussion at programme level.

F4 Board of examiners requirements

F4.1 Appointment of boards of examiners

The Regulations for Validated Awards of the Open University, section G, provides information on the appointment, membership and authority of the boards of Examiners.

F4.2 Timing of boards of examiners

The University requires that dates for formal meetings of boards of examiners are scheduled by the institution at the start of the academic year, and forwarded to the University. The University will send a representative to attend all final award and progression boards of examiners, and institutions must advise the University of any subsequent change to the dates.
Dates should be agreed (with External Examiners) at the earliest opportunity – normally at an annual meeting for the coming year and not changed thereafter except by agreement of all parties involved. Dates for other events such as approval of draft papers or assignment/project titles should be fixed at the same time and arrangements made for the involvement of External Examiners as appropriate. Arrangements and dates should also be established for dealing with any reassessments. These arrangements will commonly involve agreed delegation to designated members and officers of the board working with the appropriate External Examiners.

F4.3 Delegation of responsibility for assessments

The approved board of examiners is responsible for the reassessment or deferred assessment of students. The board may, at the time when it first meets to decide its recommendations, agree arrangements for delegating that responsibility to a sub-group, which must include at least one External Examiner. Such delegation will not be appropriate for all reassessments or deferred assessments and the board must be satisfied that it is appropriate in the particular circumstances before agreeing to delegate responsibility.

F4.4 Documentation for boards of examiners and record keeping

The University requires that the institution’s academic board or equivalent ensures that arrangements are made to appoint a Secretary to each board of examiners and that institutions keep detailed and accurate records of each board of examiners’ procedures and decisions, including the circumstances under which academic discretion is exercised.

The Registrar (or equivalent) or a nominee – acting with the authority of the Secretary to the Academic Board – should normally be appointed as Secretary.

Documentation for boards of examiners will typically include:

a. An agenda that is circulated to all board members in advance of the meeting and includes a reminder to members of the need to maintain appropriate confidentiality.

b. Minutes of previous meeting(s), confidential and members should be reminded to take appropriate care in their use and storage of them.

c. Mark sheets that contain all assessment components completed by students, together with information about pass marks for each component.

d. Statistical analyses of marks sufficient to allow the identification of any trends in student performance or marking practice which warrant the board’s attention.
e. **Quantitative data on progression and completion** detailed on The Open University template, ‘Exam Board Data’, for each programme being examined:

- For each stage of the programme, the total number of students being considered at the exam board.
- The number of students passing and progressing at each stage.
- The number of students who have a resit at each stage. Students who are progressing with a resit should be included in this section, not in the numbers of those who have passed and are progressing. For masters’ degree students, there is an additional line that allows you to include part-time progressing students as well as students being considered for an award.
- The number of students who have failed at each stage. A student is deemed to have failed if they have not passed the required number of credits to progress and are unable to continue their studies. The number of students who have been awarded an exit award (some of these may be included in the number of fails).
- For the final stage of the award: the number of students awarded a degree.
- The number of students awarded a degree at each classification (as appropriate).
- If any aegrotat awards have been made these should be included in the totals and details of the award appended separately.

f. **The regulations for the programme** as approved by the University.

g. **The University’s regulations** on issues such as the treatment of borderline cases, rounding of results, extenuating circumstances, and academic misconduct.

h. **Reports from any subsidiary boards**, including any reports on extenuating circumstances or student misconduct.

Mark sheets will normally be tabled at the meeting and under no circumstances should members remove them afterwards.

Where recommendations for conferment of awards are to be made the board of examiners may need appropriate results information from previous assessments in order that it may see overall outcomes and profiles.

The University requires that institutions have systems in place for verifying that marks are accurately recorded to avoid transcript errors.

Recommendations regarding conferment or classification of awards should be recorded by the Secretary (on the documentation which is to be submitted to the University) as they are agreed. The list should be read over and confirmed by the board before being signed off by the External Examiners and before the meeting is closed.
F4.5 Powers of External Examiners

No recommendation for the conferment of a validated award of the University may be made without the written consent of the approved External Examiners. On any matter which the External Examiners has declared a matter of principle, the decision of the External Examiners shall either be accepted as final by the board of examiners or shall be referred to the Academic Board. Disagreements between External Examiners shall be referred to the Academic Board or the University, as appropriate.

F5 Role of University representatives attending boards of examiners at partner institutions

F5.1 Guiding principles

The University will be represented at all final examination boards at partner institutions.

The primary role of University representatives is to provide support for boards of examiners or their committees in the continued assurance of academic standards. Attendance at boards of examiners will also provide for the University an important window on the assessment process for its validated awards. The University representative will not participate in making academic judgements but will be able to bring their own knowledge and experience of the assessment process to the discussion of outcomes. University representatives will respect the autonomy of the institution as it derives from the institutional agreement but will also have concern for the University’s obligations and national requirements.
F5.2  Terms of reference

The purpose of attendance at Progression and Award Boards is to confirm:

a. That the regulations of the University have been properly observed
b. That the assessment and qualification processes have been implemented with appropriate quality assurance and control procedures
c. That there is confidence that the precisely detailed cohort of students have met the threshold (academic) standards required for eligibility for the identified award of credit and/or qualifications.

University representatives will attend meetings of the institution’s boards of examiners or their committees to:

d. observe the conduct of the board of examiners in accordance with the institution’s own procedures
e. provide a source of advice on the interpretation and application of University policies and of guidance offered by QAA in the UK Quality Code and elsewhere
f. alert the institution and/or the University to policies, procedures or circumstances which seem likely to impede the effective functioning of the Board or the discharge of their responsibilities by internal or External Examiners
g. provide feedback to the University which will be included in briefing for institutional review panels.

F5.3  Reports from University representatives attending boards of examiners

University representatives will prepare a report confirming (or otherwise) the following:

a. Action from the previous meeting
   - Issues raised at the previous meeting, including those raised by the External Examiner(s) have been addressed
b. Conduct of assessment
   - The assessments have been moderated internally in accordance with approved regulations.
   - The assessments have been moderated externally in accordance with approved regulations.
   - Approved procedures for dealing with students with particular needs, eg dyslexia and other disabilities, have been applied.
**Decision-making**

Progression decisions and award recommendations have been reached in accordance with the University’s requirements and normal practice in UK Higher Education. Specifically that:

c. The External Examiners have reviewed a sample of work selected according to the Handbook for Validated Award requirements and any consequent adjustments to marking scales or marks of complete cohorts have been entered in the schedules to be considered (see also QAA Quality Code and Handbook for Validated Awards, Section F2).
d. Classification bands were properly observed.
e. Students on borderlines were given appropriate consideration.
f. Arrangements have been made for who will deal with academic appeals.
g. The application of compensation procedures was consistent with agreed regulations.
h. Any pleas of mitigation entered by the due date have been considered in a fair and equitable manner and in accordance with approved regulations.
i. Consequences of academic misconduct and other breaches of assessment regulations are discussed and dealt with appropriately and fairly, applying the approved regulations.
jj. Entitlements and arrangements for re-assessment have been confirmed.

**Conduct of the meeting**

k. The meeting was competent (and quorate) to conduct the business and was conducted in accordance with its terms of reference (see also UK Quality Code chapter B6 indicator 4 which has advice on membership and attendance).
l. Mark sheets were available for each level within each award and the sheets were easy to read and understand; and additional data was provided to aid decision making where appropriate.
m. An appropriate officer made a record of the board of examiners’ decisions.
n. Everyone present was familiar with and understood the regulations for the programme/award, any general institutional regulations impacting on the programme and the criteria for progression or award.
o. External Examiners were present and made an oral report to the board.
p. Approved procedures for dealing with students with impairments, such as dyslexia and other disabilities, had been applied.
q. Consequences of academic misconduct and other breaches of assessment regulations were discussed and dealt with appropriately and fairly, applying the appropriate regulations.
r. Progression decisions were confirmed by the Board and awards signed-off by the External Examiners.
s. If the meeting did not to consider all students registered for the award, clarification was provided on what arrangements were in place to deal with progress and or reassessment of the remaining students.
t. Arrangements were in place for the publication of assessment results and the provision of follow-up support for failing students.

u. The confidentiality of marks was secured (by collection of the mark sheets).

A copy of the feedback reports prepared by University representatives on the conduct of assessment and or meetings will be submitted simultaneously both to the institution and to the University, within two working days.

**F6 Examination Boards: Requirements for the Approval of Awards**

With effect from February 2016 all awards recommended by partner institution examination boards are ratified by The Open University. The University has set up a special committee to undertake this work; the Module Results Approval and Qualifications Classification Panel (MRAQCP). This panel has the authority of the University Senate to ratify the recommendations of all Examination Award Boards (EAB) after satisfying itself that the recommendations have been determined with due regard to the approved regulations, that the correct procedures have been followed and that the appropriate academic standards have been upheld. This Panel has the authority of the University Senate to overrule any result recommendation which is contrary to approved regulations. In practice, the Panel would normally refer the concern back to the partner institution in the first instance to arrange for the EAB to reconsider the results.

Results must not be issued to students until they have been ratified and formal notice has been received from the University that they can be released.

To ensure that MRAQCP can discharge its responsibilities we require our Partner Institutions to provide key information following examination boards. Additionally, examination board dates must be confirmed well in advance and the recommendation is that the dates for the following year’s boards are set at the previous board.

Partner Institutions are requested to provide the following documents:

- F7 sheet, signed as indicated
- Award recommendation list, signed as indicated
- Completed examination board spreadsheet.

The number of students recommended for awards on the recommendation list must correspond to the number of awards on the spreadsheet (both degrees and exit awards). Guidance on completing the examination board spreadsheet is available.
The documents should be sent to the cicp-examboards@open.ac.uk e-mail address within 2 working days of the examination board. Failure to supply the required paperwork in a timely fashion may result in extra delays in the approval of the results.

Once the paperwork has been submitted, it will be checked and any errors found will be referred back. Final documentation will be dealt with by MRAQCP within 7 working days of receipt, and notification of approval (or otherwise) will be sent out.
G  Registration, Conferment and Certification

Contents

G1  Student registration
G1 Student registration

Student registration with the University

Partner institutions are required to register the students enrolled on those programmes with the University. Institutions are also required to perform regular maintenance activities to ensure that student records are accurate at all times. The University has a web-based student registration system. Guidelines related to student registration are published every year and can be downloaded at http://www.open.ac.uk/cicp/main/sites/www.open.ac.uk.cicp.main/files/files/ecms/web-content/079-ai-cnna-ouvsv-registration-guidelines-and-procedures.pdf.

Institutions are required to notify the University of the number and registration details of all new students entering each approved programme at any stage and to remit fees to the University on an annual basis in accordance with the prevailing agreement. Information should be submitted using the supplied template. Full instructions and templates relating to the registration process are sent to individual institutions.

Students’ personal data to be submitted to the University includes full name, gender, date of birth, residential address and email address. It should also include details of the institution, the programme of study and the award being sought. Students should be informed that all information provided to the University and held on computer files are subject to the institution’s registration with the Data Protection Registrar, which allows for access by or disclosure to the University for registration and conferment of awards.

Maximum period of registration

Students will remain registered with the University for three years beyond the expected duration of the validated award. This policy applies to both full-time and part-time awards. If a student wishes to complete a programme of study after this period, it will be necessary to re-register.

From September 2015 all institutions are required to comply with The Open University’s regulations. Some institutions will have been approved to operate under dual awards regulations.

- Standard version: Regulations for validated awards of The Open University
- Dual awards version: Regulations for validated awards of The Open University for institutions offering dual awards
H Equality and diversity

Contents

H1 Equality and diversity
H1 Equality and diversity

See relevant sections of the UK Quality Code for higher Education at http://www.qaa.ac.uk/assuring-standards-and-quality/the-quality-code.

University policies can be found on the Equality and Diversity website at http://www.open.ac.uk/equality-diversity/content/welcome-open-university-equality-and-diversity.

The University’s vision of a fair and just society

The Open University is inclusive, innovative and responsive.

We promote social justice and equality of opportunity.

The Open University’s Equality Scheme and Equality Objectives is available on the website above and sets out the University’s equality and diversity principles.

The University expects its partner institutions to have equality and diversity policies that are compatible with those of the University, and comply with the UK Quality Code (see sections on students with disabilities, and recruitment and admissions).
Appendix 1: Sample agreement between The Open University and the partner institution

APPRAOVAL AND VALIDATION AGREEMENT

DATED 201X

Made between:

1) THE OPEN UNIVERSITY a body incorporated by Royal Charter (RC 000391), an exempt charity in England and Wales, a registered charity in Scotland (SC038302); whose principal place of business is at Walton Hall, Milton Keynes, MK7 6AA United Kingdom, (the ‘University’)

2) [NAME OF INSTITUTION] (a XXXXXXXXXX) whose principal place of business is at [XXXXXXXX], (the “Institution”)

who may hereafter be together referred to as the ‘Parties’ or in the singular as the ‘Party’.

WHEREAS:

A. The Centre for Inclusion and Collaborative Partnerships is a unit of the University which provides quality assurance to educational establishments, commerce, industry and professional bodies through Institutional Partnership Approval and Validation (as defined).

B. [The Institution] has applied to the University for Approved Status to enable it to offer programmes of study leading to Validated Awards (as defined).

C. The University has agreed to confer Partner Institution status on the Institution upon the terms set out in this Agreement,
IT IS HEREBY AGREED AS FOLLOWS: -

1. DEFINITIONS AND INTERPRETATION

The following terms shall have the following meanings:

“Approval” the process by which an institution without its own degree awarding powers is given authority by the University to provide programmes of study leading to Validated Awards and “Approved” shall be construed accordingly.

“Agreement” this agreement and any schedules and annexes attached to this agreement and the Handbook.

“Annual Report” the report which conforms to the University’s requirements, as advised to the Approved Institution from time to time, to be submitted by the Approved Institution to the University confirming that the Validated Programmes have been operated in accordance with the principles, regulations and procedures agreed between the Parties.

“Annual Fee” a flat rate, payable annually, in accordance with this Agreement.

“Approval Letter” means the formal letter sent by the University to the Institution confirming the conferment of Associated Institution or Partner Institution status, or the outcome of an Institutional Review.

“Approved Institution” means an institution which has, through a process of peer review, been judged to meet the required set of principles covering structures, management arrangements and procedures and therefore to provide a satisfactory environment for the conduct of programmes leading to OU validated awards.

“Approved Period” the period for which this Agreement shall remain in force beginning on and including the Commencement Date and continuing thereafter until terminated in accordance with the provisions of this Agreement.

“Board of Examiners” means the board established by the Institution for the purpose of approving assessments and examination results in respect of Validated Programmes.

“Confidential Information” means any and all materials and information of or relating to a Party constituting or concerning products, services, contracts, business models, methods or practices, financial projections or results, know how, trade secrets, intellectual property or ideas which, at the time or times concerned, are not generally known to third persons and such other information as may be proprietary or
confidential in nature or is identified by such Party as confidential.

“Commencement Date” means the date from which this Agreement comes into force and is effective which shall be the date stated in the first Approval Letter.

“Force Majeure” any circumstances beyond the reasonable control of a Party including, without limitation, Act of God, fire, explosion, flood, malicious damage, lockouts or other industrial action, civil commotion, hostilities, war, or political interference with the operations of a Party.

“Institutional Review” means the process by which an Institution is critically reviewed for the purposes of confirming that the Institution meets the university requirements.

“Intellectual Property” means patents, registered and unregistered designs, copyrights, trademarks, services and trade names (whether registered or not) and all other intellectual property protection wherever in the world enforceable.

“Interim Review” means an activity to review the Institution or its programmes between scheduled visits.

“Marks” means name and marks of The Open University, The Open University’s logo (shield design) and any other name or marks from time to time of The Open University and used in relation to the Validated Programmes.

“Minimum Entry Standards” means the minimum academic entry standards required of any student to register with the Institution and the University, as set out in the University’s Handbook.

“Per Capita Fee” means the agreed fee payable by the Institution to the University for each student registered on a Validated Programme in excess of the number of students referred to in clause 16.1.2.
“Personal Data” means data which relate to a living individual who can be identified:

(i) from that data;

(ii) from that data and other information which is in the possession of the recipient and keeper of such data.

“Programme” A schedule of academic study and assessment which leads to an award.

“Programme Document” a document, the contents of which has been agreed by the setting out full details of the structure and syllabus of a Validated Programme and Minimum Entry Standards.

“Programme Review” or “Programme Revalidation” the process by which a Validated Programme is critically reviewed for the purposes of confirming that such Validated Programme continues to meet the University’s requirements.

“Quality Assurance Agency” or “QAA” The Quality Assurance Agency for Higher Education established in the United Kingdom.

“Regulations” Regulations applicable to all students registered for Validated Awards of The Open University and available at http://www.open.ac.uk/about/validate/about-us/regulations-ou-validated-awards.

“University’s” the University’s “Handbook for Validated Awards” (including the Handbook” or “Regulations”) which comprise the University’s regulatory “Handbook” framework for Validated Awards, as may be amended from time to time, and available at http://www.open.ac.uk/about/validate/files/validate/file/ecms/web-content/004-ou-handbook-for-validated-awards.pdf. For clarity, where the context of this Agreement requires a distinction between the Handbook and the Regulations (such as in clauses 2.8 or 3), specific reference to the Handbook in such circumstances shall exclude the Regulations.

“Validation” the process by which the University assesses that a programme meets the criteria, principles and requirements of a Validated Award (and the word “Validated” shall be construed accordingly).

“Validated Award” an award of the University conferred to students on successful completion of a Validated Programme.
“Validated academic programmes of study taught by the Institution which have been successfully Validated by the University.

“VAT” Value Added Tax as levied in the United Kingdom, or any similar tax charged by the revenue authorities in the area in which the Institution is based.

2. INTERPRETATION
2.1 The provisions of this clause 2 shall apply to the interpretation of this Agreement.
2.2 The recitals and appendices form part of this Agreement and will have the same force and effect as if expressly set out in the body of this Agreement and any reference to this Agreement will include the recital and appendices.
2.3 The index and clause headings are for convenience only and will not affect the interpretation of this Agreement.
2.4 Unless the context otherwise requires, any reference to a statute or statutory provision will include the statute or statutory provisions as from time to time amended, modified, extended, re-enacted, consolidated and all statutory instruments, orders, by-laws, directions and notices made pursuant to it in each case whether made before or after the Commencement Date.
2.5 Unless the context otherwise requires:
   2.5.1 use of the singular is deemed to include the plural and vice versa;
   2.5.2 use of any gender is deemed to include every gender;
   2.5.3 reference to a person includes a natural person, a firm, a corporation, a partnership, a trust, an association, an organisation and any other body or entity whether or not having separate legal personality.
2.6 Any undertaking by any of the Parties not to do any act or thing shall be deemed to include an undertaking not to permit or suffer or assist the doing of that act or thing any obligation on a Party not to do or omit to do anything includes an obligation not to allow that thing to be done or omitted by a third party.
2.7 In the event of any conflict between the terms of this Agreement and any provisions of the Handbook the provisions of the Handbook shall prevail.
2.8 In the event of a conflict between the Regulations and the Handbook, the Regulations shall prevail.

3. HANDBOOK AND REGULATIONS
3.1 The University will provide the Institution with access to the University’s Handbook (either in print or online). The Handbook is intended to add detail to this Agreement, forms part of it, and sets out the operational requirements expected of the Institution while an Approved Institution. The Handbook is updated from time to time, and while the University will endeavour to notify the Institution of any changes to the Handbook, it is the Institution’s responsibility to regularly check for updates on the University’s website.
3.2 The University will also provide the Institution with a copy of the Regulations (either in print or online). These Regulations are to apply to all students who register for Validated Awards. It is the responsibility of the Institution to ensure
that all students are made aware of and specifically undertake to comply with the Regulations in writing. Failure to ensure that students are made subject to the Regulations will be considered a material breach of this Agreement.

4. DATE OF COMMENCEMENT AND DURATION

4.1 This Agreement shall commence on the Commencement Date and subject to the provisions for termination contained herein shall continue in force until the outcome of the next Institutional Review is confirmed which will normally be no later than the fifth anniversary of the Commencement Date.

4.2 The Parties hereto agree that save as otherwise provided in this Agreement the provisions of this Agreement shall continue to subsist for so long as may be necessary for all students as may be registered on Validated Programmes to complete the Validated Programmes.

4.3 The Parties also agree that provisions of this Agreement may continue to subsist in relation to specified Validated Programmes even if it is discontinued for other named Validated Programmes.

4.4 Following an Institutional Review, the University shall have the absolute right to make such changes to this Agreement as it sees fit or to require the Institution to enter into a new agreement in a form specified by the University in each case to ensure that the Institution complies with any recommendations of the Institutional Review; or to terminate this Agreement.

5. APPROVED STATUS

5.1 In the event that the University grants Approved status on the Institution and permits the Institution to offer the Validated Programmes for the agreed period, the Approved Institution must publicise its relationship with The Open University and its Validated Programmes in accordance with the terms set out in the Handbook for Validated Awards.

5.2 In consideration of the University agreeing to grant Approved status to the Institution, the Institution undertakes:

5.2.1 to ensure that each Validated Programme is designed and operated in accordance with the Programme Documents and within the principles, regulations and provisions of the University’s Handbook.

5.2.2 to seek written approval from the University in accordance with agreed procedures prior to commencing a Validated Programme.

5.2.3 that it will not teach the Validated Programmes other than at such locations as agreed in advance by the University. Teaching will be at the address at the head of this Agreement unless specifically altered by agreement by both Parties which agreement is to be recorded in writing and signed by both Parties; or if teaching is via a specifically designated distance learning programme;

5.2.4 that the Validated Programmes will be operated with sufficient and appropriately qualified staff who teach the Validated Programmes in accordance with the Programme Document and all necessary learning resources and immediately to inform the University of any staffing changes or lack of learning resources where these affect responsibilities for academic quality or leadership of the Validated Programmes or involve persons with
whom the University has regular contact;

5.2.5 that it will not franchise the Validated Programmes without the prior written consent of the University;

5.2.6 that it will not collaborate with any third party in the delivery and assessment of the Validated Programmes without the prior written consent of the University;

5.2.7 to seek prior written consent of the University through a process agreed with the University prior to amending a Validated Programme;

5.2.8 to comply with the terms of this Agreement and the University’s Handbook;

5.2.9 to ensure (as set out in clause 3.2) that all students agree, in writing, to comply with the Regulations;

5.2.10 to provide to the University, at its request:

5.2.10.1 any information or documents required; and/or

5.2.10.2 access to any personnel;

5.2.10.3 and/or premises of the Institution.

6. VALIDATION

6.1 In order to apply for Validation of a programme the Institution shall, at its own expense, submit to the University as directed by the University, all information as set out in the University’s Handbook or as otherwise specified by the University.

6.2 The Validation process shall be undertaken by a Validation Panel of which the membership and constitution shall be as set out in the University’s Handbook.

6.3 The University may at its own discretion either:

6.3.1 grant approval for Validation for the respective programme for a specific period of time with or without conditions; or

6.3.2 advise the Institution of the University’s decision, with reasons, not to approve the respective programme for Validation.

6.4 Notwithstanding the provisions of Clause 6.3 the Institution may appeal against a decision by the University in accordance with the provisions set out in the University’s Handbook.

6.5 Subject to the Institution receiving written confirmation from the University that a programme has been Validated, the Institution must advertise and promote the respective Validated Programmes as set out in the Handbook.

6.6 Within timeframes specified by the University, following Validation of a Programme, the Institution shall:

6.6.1 lodge with the University a Programme Document including the programme regulations as prescribed in the University’s Handbook or as otherwise advised in writing by the University from time to time;

6.6.2 only make such changes to the Validated Programme as are in accordance with the terms of the University’s Regulations and Handbook or where the University has approved such changes; and

6.6.3 lodge with and as directed by the University any and all approved amendments to the Programme Documents.
6.7 In the event that the Institution decides to discontinue or transfer Validation of a Validated Programme, the Institution shall notify the University at least six months in advance of the proposed discontinuation or transfer and shall ensure that arrangements for existing students studying the respective Validated Programmes are maintained or the students are enabled to transfer to a suitable alternative programme elsewhere to complete their award.

6.8 In the event that the University decides to terminate or withdraw approval for a Validated Programme or to suspend the registration of students on a Validated Programme, the University shall notify the Institution at least six months in advance of the proposed termination, withdrawal or suspension. It will be the responsibility of the Institution to ensure that arrangements for existing students studying the respective Validated Programmes are maintained or the students are enabled to transfer to a suitable alternative programme elsewhere to complete their award.

6.9 In cases of concern regarding academic standards, the University reserves the right to propose immediate termination or withdrawal of approval, and/or suspension of student registrations.

7. INSTITUTIONAL REVIEW AND REAPPROVAL

7.1 At least once in every five years or as otherwise determined by the University, the University shall conduct an Institutional Review of the Institution to assess that the conduct of and environment of the Institution meets the University’s criteria as set out in the University’s Handbook and is in accordance with the terms of this Agreement or otherwise notified by the University. The Institution may be subject to a special review or reviews during the period of this Agreement if the University feels that circumstances require such a review.

7.2 The Parties shall agree mutually convenient dates for the Institutional Review.

7.3 For the purposes of conducting an Institutional Review, the Institution shall permit the University and its authorised representatives access to the premises and facilities of the Institution.

7.4 Following an Institutional Review the University shall issue a report to the Institution inviting comment upon the factual accuracy of the report.

7.5 Subject to receiving confirmation or otherwise from the Institution about the factual accuracy of the report within thirty days of receipt of the report, the University will provide the Institution with a confirmed report of the findings of the Institutional Review.

7.6 The Institution shall comply with any requirements of the University that are highlighted in the report or otherwise notified in writing to the Institution as a result of the Institutional Review.

7.7 In the event that an Institutional Review reveals that the Institution does not provide a satisfactory environment for the conduct of programmes leading to Validated Awards of the University, the University reserves the right to terminate this Agreement in accordance with the provisions of Clause 17 of this Agreement. Otherwise the Institution shall be regarded as having been re-approved on the terms of this Agreement until the next Institutional Review.
7.8 In addition to the Institutional Reviews, the Institution shall also be expected to participate in and co-operate with the University in relation to any assessment or inspection undertaken by the Quality Assurance Agency or other external body in respect of the University or the Institution.

7.9 In addition to its other rights under this Agreement, the University reserves the right to withdraw or suspend Approval of the Institution at any time.

8. PROGRAMME REVALIDATION

8.1 Programme Revalidation shall be conducted at the expense of the Institution and in accordance with timescales agreed with the University but in any event at intervals of not more than five years. Any Validated Programme may be subject to a special review during the period of this Agreement if the University feels that circumstances require such a review.

8.2 Programme Revalidation shall be undertaken by a Programme Review Panel of which the membership and constitution shall be as further specified in the Handbook.

8.3 In the event that the Programme Review Panel recommends that approval for a Validated Programme shall be withdrawn, representatives of the University will meet with the Institution to discuss the recommendation and to enable the Institution to respond and to consider the position of continuing students and implement the provisions of clause 8.6 below. Otherwise, the Institution shall be treated as having had the Validated Programmes revalidated on the terms of this Agreement until the next Programme Review.

8.4 Summaries of the outcomes of programme validations may be published by the University on its publicly accessible web-site.

8.5 In addition to its other rights under this Agreement and notwithstanding the provisions of Clause 8.3, the University reserves the right to withdraw or suspend Validation for a Programme and/or for the registration of students for a Validated Programme at any time and any such notification shall be in writing to take effect at the University’s discretion either immediately or from the academic year immediately following the date of notification.

8.6 In the event of withdrawal of approval, appropriate arrangements will be made (at the cost of the Institution) by the Institution and the University for students undertaking the Validated Programme to complete their studies.

9. REGISTRATION OF STUDENTS

9.1 Unless otherwise agreed, the Institution may only seek applicants for a programme of study once it has become (and remains) a Validated Programme.

9.2 Recruitment and registration of students shall be carried out by the Institution. Students will also be required to be registered with The Open University in accordance with the Handbook. It is a requirement of the Handbook that certain personal data relating to students is sent to the University, and the Institution will ensure that any supply of such data to the University is in accordance with any applicable Data Protection legislation including, without limitation, Directive 95/46/EC of the European Parliament and the Council, and the DPA, as more fully described in clause 22 below.
9.3 The Institution shall only recruit and register students if they have met the Minimum Entry Standards or as otherwise agreed by the University and the programme for which the students are to be registered is a Validated Programme for which approval has not been withdrawn or suspended by the University. The Institution shall ensure that each student is provided at registration with details of the Validated Programme together with the current edition of the University’s Regulations relating to programmes validated by the University and the Institution’s rules and regulations and other information relating to the Validated Programme as specified by the University from time to time. The students shall be subject to the Institution’s normal rules and regulations as supplemented by the Handbook and/or the Agreement.

10. STUDENT STATUS

10.1 All students shall be registered by the Institution with the University for award purposes only in accordance with the University’s procedures and requirements as set out in the Handbook or otherwise sent by the University to the Institution and with the Institution for all other purposes.

10.2 Registration with the University will not itself allow students access to the University’s resources.

10.3 The Institution shall be responsible for all aspects of student welfare and the student experience whilst undertaking a validated programme.

10.4 The University will not be liable if the Institution fails to meet its requirements regarding standards and this leads to the withdrawal of approval by the University.

11. ASSESSMENT AND EXAMINATION

11.1 The method of assessment and/or examination for each Validated Programme shall be as described in the Regulations and Programme Document.

11.2 The Institution shall conduct assessments and examinations in accordance with the procedures agreed by the University from time to time.

11.3 The External Examiners for each Validated Programme will be appointed in accordance with the procedures laid down in the Handbook.

11.4 Students who complete the assessment to the satisfaction of the Institution, the University and the External Examiners shall be granted the relevant Validated Award (referred to in the Programme Document) in accordance with the procedures set out in the University's Handbook.

11.5 Awards shall be conferred by the University either through a ceremony organised by the Approved Institution or in absentia. The Institution will be responsible for sending award certificates for awards made in absentia by registered post.

11.6 The procedures for the production and distribution of award certificates and transcripts shall be in accordance with the University's Handbook.

12. ACADEMIC APPEALS, COMPLAINTS AND DISCIPLINE

12.1 All students shall have the right to appeal against the decision of the examiners in accordance with the procedures as set out in the University’s Handbook.
12.2 The Institution shall ensure that when a student registers with it for a Validated Programme, details of the procedures by which the students may pursue complaints and appeals through the Institution and the University are provided to them.

12.3 The Institution shall be responsible for handling complaints and appeals. Complaints in relation to all matters (except those of the University under clause 9.1 in respect of awards) shall be the responsibility of the Institution and dealt with by the Institution in accordance with its own policies and regulations.

12.4 The Institution shall have a written student disciplinary code that complies with accepted principles of natural justice and reflects the requirements of the University’s Regulations. The Institution shall supply a copy of the said code to the University. Discipline of students shall be the responsibility of the Institution.

13. ACADEMIC LIAISON

13.1 The Institution and the University shall nominate from time to time representatives who shall on behalf of each institution, liaise on academic matters and review the relationship between the Parties.

13.2 The University reserves the right to undertake such activities as it deems appropriate to assure itself that the quality assurance and academic standards of its awards are secure. Examples of these activities are described in the University’s Handbook.

14. MAINTENANCE OF RECORDS AND TRANSCRIPTS

14.1 The Institution shall undertake to maintain the following records in respect of all Validated Programmes for the periods indicated:

14.1.2 a permanent record of student registration, progression, assessment and awards.

14.1.2 copies of transcripts issued to all students for a minimum period of 12 months.

14.1.3 annual Validated Programme monitoring reports and any reports on or about the Institution by the Institution or any third party for a minimum period of 7 years.

14.1.4 minutes and reports on the evaluation of Validated Programme monitoring within its academic committees for a minimum period of 7 years.

14.1.5 External Examiners' reports for a minimum period of 7 years.

14.1.6 any written evidence of student feedback relevant to Validated Programme monitoring for a minimum period of 7 years.

14.1.7 copies of Programme Documents and Handbooks for a period not less than the maximum period of student registration on each Validated Programme.

14.1.8 copies of all self evaluation documents and action plans arising from external quality assurance, inspection, accreditation or other approved agencies’ institutional or programme or subject reviews related to Validated Programmes or the Institution for a minimum period of 7 years.

14.1.9 copies of all publicity material relating to Validated Programmes for a period not less than the maximum period of student registration on each Validated Programme.
14.1.10 a record of any information necessary to meet requirements of the Quality Assurance Agency for a minimum of 7 years.

14.2 At the end of each academic year, each registered student studying a Validated Programme, who has successfully completed any elements of that Validated Programme, shall be issued with a transcript by the Institution which shall specify:

14.2.1 the full name of the registered student;
14.2.2 the dates of the student’s registration with the Institution;
14.2.3 the elements of the Validated Programme successfully completed by the student with details of the length, level, UK credit points, where applicable, grade achieved, where appropriate, date of completion and language of instruction, if not English;
14.2.4 details of any period of supervised work experience or placement with dates and, where appropriate, grades;
14.2.5 an authorised signature on behalf of the Institution’s Academic Board (or equivalent body).

15. REPORTING

15.1 The Institution shall undertake (where necessary) to procure the student’s consent to send to the University, and shall send as soon as reasonably practicable:

15.1.1 upon expiration of an academic year the Annual Report conforming to the University’s published requirements;
15.1.2 after commencement of an academic year annual lists of the names of newly enrolled students on each Validated Programme for registration with the University;
15.1.3 after commencement of an academic year annual returns showing the numbers of students enrolled on each year of each Validated Programme;
15.1.4 upon receipt conferment lists signed by the External Examiners;
15.1.5 after commencement of an academic year an annual schedule of forthcoming Validation and Programme Review events and of any visits from external quality assurance or approval agencies such as the Quality Assurance Agency and professional bodies relating to Validated Programmes;
15.1.6 prior to publication, a copy of its annual prospectus and publicity material related to Validated programmes, as set out in the handbook;
15.1.7 upon receipt copies of any reports (including drafts) from all external quality assurance or approval agencies relating to accreditation or validation of the institution or Validated Programmes;
15.1.8 upon receipt copies of any memoranda of co-operation or association entered into with any third party in the provision of Validated Programmes;
15.1.9 upon receipt copies of any information necessary to meet teaching quality information requirements;
15.1.10 the information in respect of each student that is set out in Appendix 2 to the Handbook; and
15.1.11 upon demand any other information or documents required by the University.
16. FINANCIAL PROVISIONS

16.1 In consideration of the University granting Approved status to the Institution, the Approved Institution will pay the following fees and charges to the University:

16.1.1 The Annual Fee, which at the commencement of this Agreement is £XXX

16.1.2 the Per Capita Fee, as laid down in the fee schedule that is applicable at the time of registration for all of the Institution’s students registering on Validated Programmes in excess of XXX students per annum.

16.2 All of the Fees are subject to the University’s annual adjustment and review.

16.3 All Fees shall be non-refundable and are subject to any applicable taxes from time to time. In the event that VAT or any similar tax is deemed payable for the services rendered by the University, then the figures quoted in this agreement will be exclusive of any such VAT or tax; and the Institution will themselves be responsible for accounting to the relevant authorities for the VAT or tax on receipt of the services.

16.4 Payment of all Fees due shall unless otherwise agreed by the University, be in pounds sterling and shall become due and payable within 30 days of receipt of an invoice by the Institution from the University.

16.5 If the Institution fails to make any payments by the due dates then without prejudice to any other right or remedy of the University, the University shall be entitled to charge the Institution interest (both before and after any judgement) on the amount unpaid at the rate of 3% per annum above the Bank of England’s base rate from time to time until such time as payment in full is made (a part of a month being treated as a full month for the purposes of calculating interest). In the event of non-payment, the University also reserves the right to suspend registrations and withhold certificates.

16.6 The University reserves the right, at its sole discretion, to review the Annual Fee upwards.

17. TERMINATION

17.1 Either the University or the Institution shall have the right at any time by giving written notice to the other to terminate this Agreement immediately, if:

17.1.1 the other Party commits a material breach of the terms of the Agreement which is not capable of remedy;

17.1.2 the other Party commits a material breach of the provisions of this Agreement which if capable of remedy, is not remedied to the reasonable satisfaction of the other Party within a reasonable period as specified in a written notice to the other Party notifying the breach and the request for the remedy thereof;

17.1.3 the other Party is in persistent breach of the terms of this Agreement;

17.1.4 the other Party makes a voluntary arrangement with its creditors or becomes subject to any administration order;

17.1.5 an encumbrancer takes possession or a receiver is appointed over any of the property, assets or revenues of the other Party;

17.1.6 anything analogous to the provisions of Clause 17.1.4 and 17.1.5 under the laws of any jurisdiction occurs in relation to a Party;

17.1.7 an Institutional or Interim Review or a review by an external agency or body such as QAA concludes that the Institution does not provide a satisfactory environment for the conduct of Validated Programmes;
17.1.8 the other Party being engaged in behaviour or activities which call into disrepute reputation damage or could damage their goodwill of the innocent party.

17.2 Notwithstanding the provisions of Clause 17.1 either Party may terminate this Agreement at any time by serving at least six months written notice on the other Party.

17.3 In the event of termination by either Party, the Parties will take all reasonable steps to ensure that the students who are studying on the Validated Programmes are able to complete the Validated Programmes or to transfer to a suitable alternative programme elsewhere to complete their award.

18. INTELLECTUAL PROPERTY AND PUBLICITY

18.1 Subject to any third party rights therein, all the Intellectual Property in any item or matter supplied by one party to the other hereunder shall remain the property of the disclosing party. The University shall be entitled to licence any materials to the Institution on the terms of a separate agreement as specified by the University.

18.2 The Institution shall not use or reproduce the University’s trademarks or logos without the written permission of the University and in accordance with the provisions of any such written permission.

18.3 The Institution shall be responsible for the accuracy of all public information, publicity and promotional activity relating to the Validated Programmes howsoever disseminated. The University has the power of veto over any such publicity or information and may require the withdrawal of the material concerned.

19. FORCE MAJEURE

19.1 If any Party is affected by Force Majeure it shall immediately notify the other Party of the nature and extent of the Force Majeure event.

19.2 No Party shall be deemed to be in breach of this Agreement or otherwise be liable to the other Party, as a result of any delay in performance or non-performance of any of its obligations in this Agreement provided that such delay or non-performance is due to any Force Majeure of which it has notified the other Party.

19.3 If the Force Majeure continues, the Parties shall discuss ways to alleviate its effects or agree upon alternative arrangements as may be fair and reasonable.

19.4 In the event that the Parties mutually agree that this Agreement is to be terminated by reason of such Force Majeure, the Parties shall take such steps as required to bring the Agreement to an end in a timely, cost effective and orderly manner. The University reserves the right to submit an invoice to the Institution for payment to account for all charges properly incurred or committed to in performing this Agreement and which, subject to the duty to minimise such losses, cannot be recovered.
20. **WARRANTIES**

20.1 The Institution represents and warrants to the University that:

20.1.1 it has full power and authority to enter into this Agreement and to carry out the actions contemplated under this Agreement;

20.1.2 it does not require any consent approval, authorisation or clearance from any government, governmental or regulatory bodies, agencies or authorities in the United Kingdom or otherwise and neither, in its opinion, is any such consent, approval, authorisation or clearance desirable for such purposes.

20.1.3 it is not at the Commencement Date a party to any agreement, arrangement or understanding with any third party that in any manner prevents or hinders it from the performance of any material obligation under the terms of this Agreement.

20.1.4 it has disclosed all information to the University which is relevant to the University entering into this Agreement with the Institution.

21. **LIABILITY AND INSURANCE**

21.1 Nothing in this Agreement excludes or limits a party's liability for death or personal injury caused by that party’s negligence or for fraud, or fraudulent misrepresentation.

21.2 Either Party’s total liability in contract, tort (including negligence or breach of statutory duty) misrepresentation, restitution or otherwise, arising in connection with the performance or contemplated performance of this Agreement shall in the case of the Institution be limited to the income received by the Institution under this Agreement for any single event or series of related events or such higher amount as may be recoverable under its insurances; and in the case of the University be limited to the income received by the University under this Agreement for the two years preceding the date of any claim by the Institution.

21.3 Neither party shall be liable for any pure economic loss, loss of profit, loss of business, depletion of goodwill or otherwise, in each case whether direct, indirect or consequential, or any claims for consequential compensation whatsoever (howsoever caused) which arise out of or in connection with this Agreement.

21.4 For the avoidance of doubt, this clause 21 shall survive the expiry or termination of this Agreement for whatever reason.

22. **PERSONAL DATA AND CONFIDENTIALITY**

22.1 The Parties shall comply with the DPA. Unless otherwise required by the operation of law and in accordance with the DPA, the Parties will keep confidential at all times any and all information and Personal Data received from the others relating to teaching strategy, students and tutors, and their performance and progress. No Personal Data received from the other Parties will be divulged to any third party without the prior written approval of the individual to whom such Personal Data relates.

22.2 The Institution acknowledges that the University is subject to the requirements of the FOIA and the Institution agrees that it shall co-operate and provide (at its own expense) all necessary assistance as may reasonably be requested by the University to enable the University to comply with its obligations under the FOIA.
22.3 Each of the Parties agree to keep strictly confidential, the terms of this Agreement and all Confidential Information relating to the other Party that it has obtained during the course of negotiating this Agreement or that it may obtain during the term of this Agreement.

22.4 Each of the Parties hereby agrees:

22.4.1 not to use any Confidential Information save as agreed in writing with the disclosing Party;

22.4.2 to procure that they only disclose the Confidential Information to persons or entities (including employees) for the purpose of the performance of the terms of this Agreement and keep it strictly confidential; and that any such persons are, in respect of such Confidential Information, bound by confidentiality obligations equivalent to the terms of this clause 22; and

22.4.3 not to copy or reproduce any Confidential Information of the disclosing Party without the prior written consent of such Party.

22.5 The provisions of clause 22.4 shall cease to apply to:

22.5.1 information that has come into the public domain other than by breach of this clause or any other duty of confidence; and

22.5.2 information that is obtained from a third party without breach of this clause or any other duty of confidence.

22.6 Each Party may disclose such Confidential Information if and to the extent that any part of the Confidential Information is required to be disclosed by a regulatory or government body or court of competent jurisdiction with power to compel the disclosure provided the disclosing Party shall, if and to the extent permitted by applicable law, promptly notify the Party who owns the Confidential Information of such requirement, and shall use all reasonable endeavours to keep such Confidential Information confidential notwithstanding any such requirement.

22.7 The provisions of this clause 22 shall continue to apply notwithstanding termination of this Agreement.

23. NOTICES AND CORRESPONDENCE

23.1 All notices and correspondence concerning matters and issues related to this Agreement shall be sent to the University at the following address and marked for the attention of The Director:-

Centre for Inclusion and Collaborative Partnerships,
Wilson B Block, Walton Hall
Milton Keynes, MK7 6AA;
United Kingdom.

23.2 All notices and correspondence concerning matters and issues related to this Agreement shall be sent to the Institution at the following address and marked for the attention of [Head of Institution – e.g. The Principal, The Director, etc]-
[Address].
24. **ASSIGNMENT**

24.1 The Institution may not charge or sub-contract or assign its rights and obligations under this Agreement nor appoint any agent or otherwise delegate any person to carry out its obligations without the prior written consent of the University.

25. **RIGHTS OF THIRD PARTIES**

25.1 A person who is not a party to this Agreement has no right under the Contracts (Rights of Third Parties Act) 1999 to enforce any term of this Agreement.

26. **WAIVER**

26.1 The failure of a Party at any time to require performance of any provision of this Agreement shall in no manner affect its right to enforce such provisions at a later time. No waiver by any Party of any condition or breach shall constitute a continuing waiver thereof.

27. **LEGAL RELATIONSHIP**

27.1 Nothing in or arising from this Agreement shall:

27.1.1 constitute the Parties as partners or members of a partnership, as prescribed in the Partnership Act 1890, or otherwise and neither do the Parties share or intend to share profits and losses;

27.1.2 constitute the Parties’ relationship as employer and employee;

27.1.3 permit a Party to enter into an agreement or make any representation or warranty on behalf of or pledge the credit of or otherwise bind or oblige the other Party.

28. **SEVERABILITY**

28.1 Each clause, term and provision of this Agreement shall be considered severable and if for any reason any clause, term or provision herein is determined to be invalid or unenforceable for any reason such determination shall not prejudice or impair the operation of or affect the remainder. The Parties will endeavour to replace that part determined with a valid clause, term or provision reflecting as far as possible the original intention of the Parties.

29. **VARIATIONS AND AMENDMENTS**

29.1 This Agreement shall not be varied save by an instrument in writing signed by authorised representatives of all the Parties.

30. **ENTIRE AGREEMENT**

30.1 This Agreement constitutes the entire agreement between the Parties and supersedes all previous agreements.
31. LAW AND JURISDICTION

31.1 This Agreement shall be governed in accordance with the laws of England and all disputes arising from it or in relation to it shall be subject to the non-exclusive jurisdiction of the English courts.

31.2 Notwithstanding and without prejudice to the provisions of Clause 31.1 of this Agreement in the event of a dispute between the Parties in connection with this Agreement the Parties shall negotiate in good faith in an endeavour to resolve the dispute amicably.

32. LANGUAGE

32.1 English shall be the language of all documents, notices, correspondence and meetings in any way relative to this agreement. The Institution shall ensure that any translations required are made faithfully and accurately by a competent translator at its own expense.

33. LEGAL OBLIGATIONS

33.1 The Institution shall obtain, at its own expense, all necessary permissions, consents and licences to enable the full legal operation of the Validated Programmes and to comply with this Agreement, including without limitation those required to be given by any government department or body constituted under the laws of the domicile of the Institution for regulatory purposes.

33.2 The Institution shall indemnify the University for all costs, claims expenses, fees, or losses incurred by the University as a result of the failure of the Institution to obtain any necessary permissions and consents as required in Clause 33.1.

Appendix 2: Exemplar diploma supplement

EXEMPLAR DIPLOMA SUPPLEMENT

This Diploma Supplement model was devised by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international ‘transparency’ and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended.

It should be free from any value judgements, equivalence statements or suggestions about recognition.

Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

Description of Higher Education in England, Wales and Northern Ireland

In England, Wales and Northern Ireland, higher education institutions are independent, self-governing bodies active in teaching, research and scholarship. They are established by Royal Charter or legislation and most are part-funded by government.

Higher education (HE) is provided by many different types of institution. In addition to universities and university colleges, whose charters and statutes are made through the Privy Council which advises the Queen on the granting of Royal Charters and incorporation of universities, there are a number of publicly-designated and autonomous institutions within the higher education sector. Publicly funded higher education provision is available in some colleges of further education by the authority of another duly empowered institution. Teaching to prepare students for the award of higher education qualifications can be conducted in any higher education institution and in some further education colleges.

Degree awarding powers and the title ‘university’

All universities and many higher education colleges have the legal power to develop their own courses and award their own degrees, as well as determine the conditions on which they are awarded. Some HE colleges and specialist institutions without these powers offer programmes, with varying extents of devolved authority, leading to the degrees of an institution which does have them. All universities in existence before 2005 have the power to award degrees on the basis of completion of taught courses and the power to award research degrees. From 2005, institutions in England and Wales that award only taught degrees (‘first’ and ‘second cycle’) and which meet certain numerical criteria, may also be permitted to use the title ‘university’. Higher education institutions that award only taught degrees but which do not meet the numerical criteria may apply to use the title ‘university college’, although not all choose to do so. All of these institutions are subject to the same regulatory quality assurance and funding requirements as universities; and all institutions decide for themselves which students to admit and which staff to appoint. Degrees and other higher education qualifications are legally owned by the awarding institution, not by the state.

Higher education institutions, further education colleges and other organisations able to offer courses leading to a degree of a Recognised Body are listed by the English, Welsh and Northern Irish authorities, and are known as

2 The UK has a system of devolved government, including for higher education, to Scotland, to Wales and to Northern Ireland. This description is approved by the High Level Policy Forum which includes representatives of the Department for Business, Innovation and Skills, the Scottish Government, the Welsh Assembly Government, the Higher Education Funding Councils for England, Scotland and Wales, the Quality Assurance Agency (QAA), Universities UK (UUK), GuildHE and the National Recognition Information Centre for the UK (UK NARIC).
"Listed Bodies".

**Qualifications**

The types of qualifications awarded by higher education institutions at sub-degree and undergraduate (first cycle) and postgraduate level (second and third cycles) are described in the Framework for Higher Education Qualifications in England, Wales and Northern Ireland (FHEQ). This also includes qualification descriptors that were developed with the HE sector by the Quality Assurance Agency for Higher Education (QAA - established in 1997 as an independent UK-wide body to monitor the standard of higher education provision - www.qaa.ac.uk). The FHEQ was self-certified as compatible with the Framework for Qualifications of the European Higher Education Area, the qualifications framework adopted as part of the Bologna Process, in February 2009. Foundation degrees, designed to create intermediate awards strongly oriented towards specific employment opportunities, were introduced in 2001. In terms of the European Higher Education Area they are "short cycle" qualifications within the first cycle. The FHEQ is one component of the Credit and Qualifications Framework for Wales (CQFW). The Qualifications and Curriculum Authority (QCA), the Department for Children, Education, Lifelong Learning and Skills, Wales (DCELLS) and the Council for Curriculum Examination and Assessment, Northern Ireland (CCEA) have established the Qualifications and Credit Framework (to replace, in time, the National Qualifications Framework (NQF)). These authorities regulate a number of professional, statutory and other awarding bodies which control VET and general qualifications at all levels. The QCF is also incorporated into the CQFW. There is a close association between the levels of the FHEQ and the NQF (as shown overleaf), and other frameworks of the UK and Ireland.

**Quality Assurance**

Academic standards are established and maintained by higher education institutions themselves using an extensive and sophisticated range of shared quality assurance approaches and structures. Standards and quality in institutions are underpinned by the universal use of external examiners, a standard set of indicators and other reports, by the activities of the QAA, and in professional areas by relevant professional, statutory and regulatory bodies. This ensures that institutions meet national expectations described in the FHEQ: subject benchmark statements, the Code of Practice and programme specifications. QAA conducts peer-review based audits and reviews of higher education institutions with the opportunity for subject-based review as the need arises. The accuracy and adequacy of quality-related information published by the higher education institutions is also reviewed. QAA also reviews publicly funded higher education provision in Further Education colleges.

**Credit Systems**

Most higher education institutions in England and Northern Ireland belong to one of several credit consortia and some operate local credit accumulation and transfer systems for students moving between programmes and/or institutions. A framework of national guidelines, the Higher Education Credit Framework for England, was launched in 2008. Credit is also an integral part of the CQFW and the QCF. It may be possible for credit awarded in one framework to be recognised by education providers whose qualifications sit within a different framework. HE credit systems in use in England, Wales and Northern Ireland are compatible with the European Credit Transfer System (ECTS) for accumulation and transfers within the European Higher Education Area, and are used to recognise learning gained by students in institutions elsewhere in Europe.

**Admission**

The most common qualification for entry to higher education is the General Certificate of Education at 'Advanced' (A) level. Other appropriate NQF level 3 qualifications and the kite-marked Access to HE Diploma may also provide entry to HE. Level 3 qualifications in the CQFW, including the Welsh Baccalaureate, also provide entry, as do Scottish Highers, Advanced Highers or qualifications at the same levels of the Scottish Credit and Qualifications Framework. Part-time and mature students may enter HE with these qualifications or alternatives with evidenced equivalent prior formal and/or experiential learning. Institutions will admit students whom they believe to have the potential to complete their programmes successfully.

Entry to HE via equivalent experiential or prior learning

1 PhD and DPhil qualifications are typically not credit-rated. Newer doctoral degrees, such as the Professional Doctorate, are sometimes credit rated, typically 540 UK credits.
2 A range of 90-120 ECTS is typical of most awards.
3 ECTS credit is typically worth 2 UK credits.
4 The Welsh Baccalaureate Qualification is part of the Credit and Qualifications Framework for Wales (QCFW).
5 For students with the necessary prerequisites, entry to each FHEQ level is possible from the next lower level in the NQF or Framework for Higher Education Qualifications.
6 These levels will also apply to the Qualifications and Credit Framework (QCF). The QCF will eventually replace the National Qualifications Framework (NQF).
Appendix 3: Appeals and complaints

Formal appeals and complaints procedures for students approaching The Open University having exhausted all appropriate internal procedures at their own institution.

1 Introduction

The University is interested in the concerns of students undertaking programmes at its partner institutions. The majority of such concerns can usually be dealt with informally by speaking to your course or programme leader or department within your institution. If your concerns cannot be addressed informally, you must access your institution’s own internal procedures which have been approved by the University for dealing with such matters. If after following your institution’s internal procedures, you still feel that your concerns have not been properly addressed, you may approach the University and make a formal appeal or complaint if you have grounds as outlined in Section 5 Stage 1 or Section 6 Stage 1 below. You may seek guidance on procedural matters from the University.

2 Your rights and responsibilities as a student

If you are studying on an OU validated programme you have the opportunity to approach the University, either individually or collectively, regarding matters of proper concern to the University, providing you can demonstrate that you have exhausted all the appropriate procedures open to you at your institution. You may do so without disadvantage and in the knowledge that your privacy and that of any third party will be respected if specifically requested. You should approach the University about your concerns through Centre for Inclusion and Collaborative Partnerships (CICP). You should use one of the following procedures:

The formal appeals procedure

- A formal appeal is a request for review of a decision taken by an academic body (for example Academic Board) charged with making decisions about student admissions, progression, assessment and awards. Students may not appeal against the academic judgement of their teachers or examiners.

The formal complaints procedure

- A formal complaint is an expression of dissatisfaction with a service provided or the lack of a service. It must relate to services that students were led to believe would be provided.

You must ensure that you have exhausted the appropriate internal procedures at your institution before approaching the University.
The University’s regulations for validated awards require institutions offering validated programmes to have their own procedures by which student appeals and complaints can be heard. The University approves these procedures at institutional approval and monitors them through annual reporting and periodic institutional review. The University is therefore confident that appropriate appeals and complaints procedures are in place in all its partner institutions, which is why there is no right of appeal or complaint to the University in the first instance.

When making a formal appeal or complaint, you are entitled to:

- be dealt with impartially and in accordance with the University’s equality and diversity strategy
- withdraw a formal appeal or complaint without prejudice at any time during the procedure

*If you wish to withdraw an appeal or complaint, you must inform the University in writing. Any decision made by the University or the institution at the previous stage in the procedure will then be upheld and become the final outcome.*

- guidance from your institution and the University on the procedure for making a formal appeal or complaint to the University
- claim from your institution any reasonable and proportionate incidental expenses that you have necessarily incurred, if your formal appeal or complaint is upheld
- access information held about you, both in your institution and in the University, and to be kept informed of progress in relation to your formal appeal or complaint.

When making a formal appeal or complaint, you must:

- ensure that you have exhausted all your institution’s own internal appeals and complaints processes within the specified timescale, and explain how or why the institution’s processes failed to satisfy you, beyond a simple disagreement with the outcome
- ensure that you provide the University with all the information necessary for dealing with your formal appeal or complaint, including supporting evidence. You must respond promptly to requests for further information or clarification
- not attempt to use the formal appeals or complaints procedures to bring frivolous or vexatious matters to the University’s attention.
3 Your institution’s rights and responsibilities

Your institution is responsible for dealing with your initial appeal or complaint in accordance with the appeals and complaints procedures approved by the University. It will carry out this responsibility by:

- ensuring that the appeals and complaints procedures of both the institution and the University are widely published and presented to all students on OU validated programmes
- informing you of the final outcome of its internal procedures in writing this letter is important and you will need it if you wish to make a formal appeal or complaint to the University
- responding in an open and timely manner in relation to any requests made by the University in relation to a formal appeal or complaint, without disadvantage to you
- acting in accordance with the final outcome of a formal appeal or complaint to the University
- providing information on appeals and complaints to the University as part of its obligations in relation to annual monitoring and periodic review
- reporting to the University on action it has taken in response to a formal appeal or complaint.

Your institution has a right to be heard and to present its case in relation to any formal appeal or complaint made against it.

4 The Open University’s responsibilities

The University is responsible for approving the appeals and complaints procedures in institutions offering OU validated programmes. The University is also responsible for monitoring and reviewing institutions’ internal procedures through its annual reporting and periodic review processes.

The University will monitor how information under both the University’s formal Appeals and Complaints Procedures and the institution’s procedures is made available to students, as part of institutional approval and review. The University will ensure that:

- it provides guidance on the formal appeals and complaints procedures and arranges further support if requested
- students have the opportunity to raise concerns without being disadvantaged
- once a formal appeal or complaint has been made, it is dealt with in a timely manner, normally within forty working days
- it upholds students’ rights, including access to relevant information
• all persons investigating, or adjudicating upon an appeal or complaint do so impartially and do not act in any matter in which they have a material interest or in which any potential conflict of interest might arise
• its formal appeals and complaints procedures are operated in accordance with its equality and diversity strategy
• students are informed in writing of decisions and the reasons for them, of progress and of any delays in relation to their formal appeal or complaint
• the final decision of a formal appeal or complaint is upheld.

The University will monitor, evaluate and review its own formal appeals and complaints procedures, as well as its arrangements for monitoring and reviewing the internal procedures of its institutions. In doing so, it will take into account current good practice and changes in legislation.

5 Formal appeals procedures

Stage 1 – Can I make a formal appeal to the University?

You can only make a formal appeal to the University if all of the following are true:

• Your appeal is against an institutional body, such as an assessment board, or admissions board, and the decision related to one or more of the following:
  • your final award
  • your progression from one stage or level of the programme to the next
  • your assessment on the programme
  • your admission to the programme and
  • you can demonstrate that you have exhausted all appropriate internal procedures open to you at your institution
and
• you have grounds to believe that the partner institution’s internal procedures and regulations for dealing with appeals were not interpreted or implemented correctly or fairly.

Disagreement with the academic judgement of an institutional body - an assessment board, or an admissions board - cannot of itself constitute grounds for an appeal. Reconsideration of decisions may only take place if:

• You produce documentary evidence that performance was affected by factors which you were unable, or for valid reasons unwilling, to divulge before the institutional body made its decision or
• you produce evidence that there has been a material administrative error, or that the assessments were not conducted in accordance with the current regulations for the programme, or that some other material irregularity has occurred.

If the matter that concerns you does not meet these conditions, it may be possible to pursue the issue by making a formal complaint. Please refer to the University’s Formal Complaints Procedures (section 6) for further information.

Stage 2 - How Do I make a formal Appeal to the University?

If you have exhausted all the appropriate internal procedures open to you at your institution and you believe that you have met all the conditions outlined in Stage 1 above you may submit a formal appeal to the University.

How do I submit an appeal?

You must submit a formal appeal in writing and your letter must include the following information:

• your contact address and telephone number
• the name of the institution at which you are studying
• the name of the programme on which you are studying
• the specific decision you are appealing against
• documentary evidence that you have exhausted your institution’s own internal procedures including copies of written correspondence between yourself and your institution concerning the decision you are appealing against, and a copy of the letter from your institution notifying you of the final outcome of its internal appeals procedure
• a clear statement explaining why you are appealing and how your appeal meets the conditions specified in stage 1
• documentary evidence to support the grounds on which you are appealing. If you fail to provide all of the above, your appeal will be delayed and may eventually be dismissed.

Important: please read carefully:

The University will make every attempt to respect your privacy and confidentiality when dealing with your appeal. However, unless you specifically state otherwise, the University will assume that you have given permission to disclose as necessary any of the information you provide. If you wish any matter to remain private or confidential, you must state so clearly in your letter. If you do not wish the University to disclose information, it may not be possible to consider your appeal appropriately.
When can I submit an appeal?

It is important that the University receives your appeal as soon as possible, and within three months of the outcome of your institution’s internal procedures. Furthermore, the University and your institution may be unable to investigate fully formal appeals received after a significant time lag.

Where should I submit the appeal?

Appeals must be sent to:

The Director,
Centre for Inclusion and Collaborative Partnerships,
The Open University,
Walton Hall,
Milton Keynes,
MK7 6AA,
United Kingdom.

Stage 3 - What will the University do next?

On receipt of your appeal:

When the University receives your appeal, a formal acknowledgement of receipt will be sent to you.

Your letter will then be checked to ensure that all the necessary information has been provided as listed in stage 2.

If information or evidence is missing, your original appeal will be returned to you with a letter requesting the missing information. You will be given a deadline by which you must respond. If you do not respond by that deadline, your appeal will be dismissed. This decision will be final.

or

If you have provided all the necessary information, your appeal will proceed to Initial Evaluation.

Initial evaluation of the grounds of your appeal:

Once you have provided all the necessary information, your appeal will be considered against the conditions listed in stage 1.

If your appeal does not meet the conditions listed in stage 1 or is considered to be frivolous or vexatious, it will not be considered further and will be dismissed. This decision will be final.
and you will be informed of this in writing by the University, giving the reasons.

or

If it is clear that your appeal meets the conditions listed in stage 1, your appeal will proceed to Investigation.

**Investigation:**

The University will normally write in confidence to an appropriate senior member of your institution asking for comments on specific issues that appear to require investigation or response. It will determine these issues from your letter and supporting evidence. The University will need to pass information provided by you on to the institution in order to address your appeal. If you do not wish the University to disclose any private or confidential information, it is your responsibility to specify this in writing. Please note that disclosure is normally necessary to progress your appeal. The University will expect the institution to investigate the matter urgently and will provide a deadline to the institution.

In some cases further correspondence might be needed, particularly if the appeal is complex. It is also possible that the University will contact you to ask for further clarification or information. The University will keep you informed of progress and of any delays.

**Stage 4 - How might my appeal be resolved?**

The University will seek to resolve your appeal within 40 working days of receiving your complete appeal letter. It will base its decision on the information provided by you and the institution in response to its investigation.

There are three possible outcomes:

- The University may inform you and your institution that there is no case for any further action and may therefore dismiss your appeal. The University may reach this decision if on investigation it finds no evidence to support your appeal on the grounds you stated. This decision is final.

- The University may inform you and your institution that you have legitimate grounds for an appeal. The University will then refer the appeal back to your institution advising on the necessary action required to reach a satisfactory conclusion. The action required might be for your appeal to be reconsidered through the institution’s own internal procedures, or for the body that made the decision to reconsider. The University will follow up this decision by requiring the institution to report on what action has been taken to resolve the matter by an agreed deadline. The University reserves the right, in exceptional circumstances, subsequently to refer the matter to an Appeals Panel as in 5.5 below. The institution will also be expected to meet any reasonable expenses you have incurred as a result of submitting a formal appeal to the University.
or

- If the University considers the appeal to be too complex to be resolved by correspondence within the time scale of 40 working days, the matter will be referred to an Appeal Panel.

You and your institution will be informed of the outcome in writing.

**Stage 5 - Attending an Appeal Panel**

If the University considers that your appeal should be investigated further, a specially convened Appeal Panel may be established to consider your appeal on behalf of the University. The University will seek to convene the panel within 40 days of receiving the decision as indicated in stage 4. This is the last stage of the appeals procedure and the panel’s decision will be final.

**Appeal Panel Membership**

An Appeal Panel will consist of:

- The Chair of the University Curriculum Partnerships Committee or a nominee as Chair
- Another member of the University Curriculum Partnerships Committee, external to the University, with appropriate knowledge and experience
- The Director of the Centre for Inclusion and Collaborative Partnerships (CICP) or the Director’s nominee
- A member of a recognised student group.

Appeal Panel members must participate impartially. Therefore, no member of the Appeal Panel may act in any matter in which they have a material interest or in which any conflict of interest might arise.

**Attendance**

You will be expected to attend to speak to the panel and may be questioned. You may bring a witness. You may also be accompanied by someone, such as a student advisor, who may attend and speak on your behalf, or support you. You must inform the University of the attendance, name and status of any person representing you at least 10 working days in advance of the panel.

The following will also attend:

- the academic registrar or equivalent of your institution, or nominee
- the Chair of your institution’s body against whose decision you are appealing
• any relevant witnesses required by the partner institution
• any further relevant parties required by the University
• a CICP Officer as secretary.

Responsibilities

The University will be responsible for:

• convening the panel and attendees
• organising a venue and necessary catering
• producing a draft agenda
• informing all parties of the time and venue
• disseminating documentation to all parties
• reporting the outcome of the panel to all parties and producing the final report.

You will be responsible for:

• providing the University with information regarding your availability so that a panel may be convened
• informing the University of any relevant witnesses you wish to attend
• informing the University of any person you wish to attend to support you
• providing the University with any further information that the panel requires
• attending the panel in order to present your case and answer any questions
• You may decide not to attend the panel in person, if so you may appoint a representative. You must inform the University of this at least 10 working days before the panel.

If you find you are unable to attend the panel after a date has been agreed, you must inform the University at least 48 hours in advance. If possible, the panel may be reconvened at a more suitable time. If you do not give at least 48 hours’ notice, the panel will meet without you, unless you can provide prior evidence that your non-attendance is outside your control.

Your institution will be responsible for:

• ensuring that the academic registrar or equivalent, or nominee is in attendance to present the institution’s case
• ensuring that the Chair of the institutional body making the decision appealed against, or their nominee, is in attendance to answer questions
• providing the University with the availability of those to attend so that a panel may be convened
• informing the University of any relevant witnesses it wishes to be invited to attend
• providing the University with any further information that the panel requires.

If the institution’s representatives find that they are unable to attend the panel after a date has been agreed, they must inform the University at least 48 hours in advance. If possible, the panel may be reconvened at a more suitable time. If the institution does not give at least 48 hours’ notice, the panel will meet without them, unless they can provide prior evidence that their non-attendance is outside their control.

**Your rights**

Both parties will be given at least 10 working days’ notice of the date and place of the Appeal Panel.

Both parties will be provided with copies of the documentation received by the Appeal Panel at least four working days before it convenes.

Both parties are entitled to separate rooms at the venue in which to wait and prepare for the Appeal Panel.

Both parties will be allowed the opportunity to present their case to the Appeal Panel.

The student has the right to be accompanied at the Appeal Panel. The person accompanying the student has the right to be heard. The University must be informed about the person who is to accompany the student at least 10 working days before the Appeal Panel convenes.

Both parties will be entitled to call witnesses relevant to the appeal. Any witness must be notified to the University at least 10 working days before the Appeal Panel. Both parties will be allowed the opportunity to question the other party and their witnesses.

The Appeal Panel will need to meet in private at times to discuss outstanding issues or to agree their conclusions. Neither party will be entitled to be present during any private meeting of the Appeal Panel.

Both parties will be informed of the outcome of the Appeal Panel within 24 hours. Written confirmation of the outcome will be posted within 24 hours and the full confirmed report will be sent within 10 working days.
What might the outcome of the Appeal Panel be?

Possible outcomes are:

- The University may inform you and your institution that there is no case for any further action and may therefore dismiss your appeal. The University may reach this decision if, on investigation, it finds no evidence to support your appeal on the grounds you have stated.
- The University may inform you and your institution that you have legitimate grounds for an appeal. The University will then refer the appeal back to your institution advising on the necessary action required to reach a satisfactory conclusion.

The Appeal Panel’s decision is final.

The Office of the Independent Adjudicator for Higher Education

Once a student has completed all the internal procedures if they are still dissatisfied with the outcome, they may be able to apply for a review of the matter to the Office of the Independent Adjudicator for Higher Education (OIA).

The OIA was set up under the Higher Education Act 2004 to provide 'an independent student complaints scheme'. All HEIs in England and Wales are required to comply with the scheme, which is free to students. Under the rules, a student who has exhausted the full complaints, appeals or disciplinary procedure available to them within the University, must be informed, via a ‘Completion of Procedures’ letter of their right to a review by the OIA.

Further details are available at: [www.oiahe.org.uk/](http://www.oiahe.org.uk/).

Where to get further help and guidance

You can contact the University for advice and guidance on the University's formal Appeals and Complaints Procedures. Please contact the Director of CICP in one of the following ways:

Contact CICP by email: CICP-Director@open.ac.uk
Contact CICP by phone: 01908 332840
Address:
   The Director,
   Centre for Inclusion and Collaborative Partnerships
   Walton Hall,
   Milton Keynes,
   MK7 6AA
   United Kingdom
For further support and advice, please contact your Student Union or the student representative body in your institution, and where appropriate the NUS.

6 Formal complaints procedures

Stage 1 – Can I make a formal complaint to the University?

You can only make a formal complaint to the University if all of the following are true:

- you have a legitimate complaint about a service, or lack of service for which your institution is responsible and this impacts directly and substantively on the academic standards of the OU validated programme on which you are studying. It must relate to a service that you were led to expect would be provided.

and

- you can demonstrate that you have exhausted all appropriate internal procedures open to you at your institution.

and

- that the partner institution’s internal procedures and regulations for dealing with complaints were not interpreted or implemented correctly or fairly.

or

- that the matter has not been properly addressed by the institution’s own internal procedures.

If your complaint is not directly related to the academic standards of the OU validated programme on which you are studying, then you may be able to take your complaint directly to the Office of the Independent Adjudicator (OIA) if your institution is a member of their scheme. Further details relating to the OIA can be found later in these procedures. If you are in any doubt who you should raise a complaint with please contact the University, contact details can be found here.

Stage 2 – How do I make a formal complaint to the University?

If you have exhausted all the appropriate internal procedures open to you at your institution and you believe your complaint meets the conditions listed in stage 1 above, you may submit a formal complaint to the University.
How do I submit a complaint?

You must submit a complaint in writing. Your letter must include the following information:

- your full name, contact address and telephone number
- the name of the institution at which you are studying
- the name of the OU validated programme on which you are studying
- a detailed statement explaining what you are complaining about and why
- documentary evidence that you have exhausted your institution’s own internal procedures, including copies of written correspondence between you and your institution concerning the matter that you are complaining about, and a copy of the letter from your institution notifying you of the final outcome of its internal complaints procedure
- documentary evidence to support your complaint.

If you fail to provide all of the above, your complaint will be delayed and may eventually be dismissed.

Important: please read carefully

The University will make every attempt to respect your privacy and confidentiality when dealing with your complaint. However, unless you specifically state otherwise, the University will assume that you have given permission to disclose as necessary any of the information you provide. If you wish any matter to remain private or confidential, you must state so clearly in your letter. If you do not wish the University to disclose information, it may not be possible to consider your complaint appropriately.

When can I submit a complaint?

It is important that the University receives your complaint as soon as possible and within three months of the outcome of your institution’s internal procedures. A delay may mean that the University and the institution are unable to investigate the matter fully.

Where should I submit the complaint?

Complaints must be sent to:

The Director,
Centre for Inclusion and Collaborative Partnerships
Walton Hall,
Milton Keynes,
MK7 6AA
United Kingdom
Stage 3 – What will the University do next?

On receipt of your complaint

When the University receives your complaint, a formal acknowledgement of receipt will be sent to you.

Your letter will be checked to ensure that all the necessary information has been provided as listed in stage 2.

If information or evidence is missing, your original complaint will be returned to you with a letter requesting the missing information. You will be given a deadline by which you must respond. If you do not respond by that deadline, your complaint will be dismissed. This decision will be final.

or

If you have provided all the necessary information, your complaint will proceed to Initial Evaluation.

Initial Evaluation of the grounds of your complaint

Once you have provided all the necessary information, your complaint will be considered against the grounds as listed in stage 1. If your complaint does not meet the conditions listed in stage 1 or is considered frivolous or vexatious, it will not be considered further and will be dismissed. This decision will be final. You will be informed of this in writing by the University, giving the reasons.

or

If it is clear that your complaint meets the conditions listed in Stage 1 your complaint will proceed to Investigation.

Investigation

The University will normally write in confidence to an appropriate senior member of your institution asking for comments on specific issues that appear to require investigation or response. It will determine these issues from your letter and supporting evidence. The University will need to pass information provided by you onto the institution in order to address your complaint. If you do not wish the University to disclose any private or confidential information, it is your responsibility to specify this in writing. Please note that disclosure is normally necessary in order to progress your complaint. The University will expect the institution to investigate the matter urgently and will provide a deadline to the institution.
In some cases further correspondence might be needed, particularly if the complaint is complex. It is also possible that the University will contact you to ask for further clarification or information. The University will keep you informed of progress and of any delays.

**Stage 4 – How might my complaint be resolved?**

The University will attempt to resolve your complaint within 40 working days of receiving your letter. It will base its decision on the information provided by you and the institution in response to its investigation.

There are two possible outcomes:

- The University may inform you and your institution that there is no case for any further action and may therefore dismiss your complaint. The University may reach this decision if on investigation it finds no evidence to support your complaint, or that the institution has taken all the steps that could reasonably be expected to address the matter. This decision is final.

  or

- The University may inform you and your institution that you have legitimate grounds for complaint. The University will then refer the matter back to your institution advising on the necessary action required to reach a satisfactory conclusion. The action required might vary considerably depending on the complaint. The University will follow up this decision by requiring the institution to report on what action has been taken to resolve the matter by an agreed deadline. The institution will also be expected to meet any reasonable expenses you have incurred as a result of submitting a formal complaint to the University. This decision will be final.

**The Office of the Independent Adjudicator for Higher Education**

Once a student has completed all the internal procedures if they are still dissatisfied with the outcome, they may be able to apply for a review of the matter to the Office of the Independent Adjudicator for Higher Education (OIA).

The OIA was set up under the Higher Education Act 2004 to provide ‘an independent student complaints scheme’. All HEIs in England and Wales are required to comply with the scheme, which is free to students.

Under the rules, a student who has exhausted the full complaints, appeals or disciplinary procedure available to them within the University, must be informed, via a ‘Completion of Procedures’ letter of their right to a review by the OIA. Further details are available at [www.oiahe.org.uk/](http://www.oiahe.org.uk/).
Where to get further help and guidance

You can contact the University for advice and guidance on the OU Formal Appeals and Complaints Procedures. Please contact the Director of CICP in one of the following ways:

Contact CICP by email: CICP-Director@open.ac.uk
Contact CICP by phone: 01908 332840
Address:
   The Director,
   Centre for Inclusion and Collaborative Partnerships
   Walton Hall,
   Milton Keynes,
   MK7 6AA
   United Kingdom

For further support and advice, please contact your Student Union or the student representative body in your institution and where appropriate the NUS.
### Appendix 4: Glossary

The glossary below briefly explains some of our most frequently used terms. You may also wish to refer to the glossary that the Quality Assurance Agency (QAA) provides on its website [http://www.qaa.ac.uk/AboutUs/glossary/Pages/default.aspx](http://www.qaa.ac.uk/AboutUs/glossary/Pages/default.aspx) (QAA 2012).

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Administrative Audit</strong></td>
<td>The process by which the University assesses the administrative infrastructure of an institution to confirm that it is fit for the purpose of supporting validated programmes. It covers a wide range of administrative, financial and governance issues, including financial viability, planning, administrative staffing and processes, IT, structure and communications.</td>
</tr>
<tr>
<td><strong>Annual monitoring</strong></td>
<td>Under the terms of institutional approval, the University delegates to partner institutions the functions associated with assuring the quality of their programmes. The annual monitoring process is a key mechanism by which the University assures itself that partner institutions are meeting their responsibilities.</td>
</tr>
<tr>
<td><strong>Approval</strong></td>
<td>The process by which an institution without its own degree awarding powers is given authority by the University to provide programmes of study leading to validated awards.</td>
</tr>
<tr>
<td><strong>Approval Letter/Re-approval letter</strong></td>
<td>The formal letter by which the University confirms to an institution that it has been (re)approved by The Open University as an appropriate organisation to offer higher education programmes leading to Open University validated awards.</td>
</tr>
<tr>
<td><strong>Awarding body</strong></td>
<td>A body with the authority to award academic qualifications, given to it by statute, royal charter, or under licence from another body.</td>
</tr>
<tr>
<td><strong>Bridging unit/programme</strong></td>
<td>A unit or programme of study designed and approved to prepare students who have successfully achieved an award, such as a Foundation Degree, for direct entry to an advanced stage of another programme, usually at a higher level.</td>
</tr>
<tr>
<td><strong>Centre for Inclusion and Collaborative Partnerships (CICP)</strong></td>
<td>Unit of The Open University responsible for validating awards for academic institutions, professional bodies, companies and other organisations.</td>
</tr>
<tr>
<td><strong>Certificate (for validated award)</strong></td>
<td>An official document recording achievement of a specific award.</td>
</tr>
<tr>
<td><strong>Collaborative arrangement</strong></td>
<td>A term to describe how institutions work together to provide higher education, including learning opportunities, student support, and assessment, resulting in a qualification from one or more awarding institutions. (QAA 2012)</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Conferment</strong></td>
<td>When the qualification is awarded (aka certification).</td>
</tr>
<tr>
<td><strong>Credit</strong></td>
<td>A means of quantifying and recognising learning, used by most institutions that provide higher education programmes of study, expressed as ‘numbers of credits’ at a specific level. (QAA 2012)</td>
</tr>
<tr>
<td></td>
<td>There is broad agreement amongst institutions in England that one credit represents 10 notional hours of successful learning.</td>
</tr>
<tr>
<td><strong>Credit level descriptor</strong></td>
<td>A statement of the generic characteristics of learning at a specific credit level, used as a reference point for those designing programmes of study. (QAA 2012)</td>
</tr>
<tr>
<td><strong>Curriculum map</strong></td>
<td>A map of the outcomes of units of study against the intended outcomes for the programme as a whole, to ensure overall completeness and coherence.</td>
</tr>
<tr>
<td><strong>Curriculum Partnerships Committee (CuPC)</strong></td>
<td>Main Open University committee concerned with validation. CuPC is responsible to the Education Committee for policy and regulations relating to partnerships for taught provision, including validated provision, leading to an OU award. CuPC approves and monitors the validation of partner institutions and awards offered by them.</td>
</tr>
<tr>
<td><strong>Diploma supplement</strong></td>
<td>A formal, verifiable and comprehensive record of the learning and achievement of a student on completion of a higher education qualification.</td>
</tr>
<tr>
<td><strong>Dual award (or double award)</strong></td>
<td>The granting of separate awards for the same programme by two awarding institutions who have jointly delivered the programme of study leading to them. (QAA 2012)</td>
</tr>
<tr>
<td><strong>Education Committee</strong></td>
<td>Higher level OU Committee responsible to the Senate for strategy and policy relating to curriculum, assessment and qualifications (including validated provision), learning and teaching and the student experience.</td>
</tr>
<tr>
<td><strong>Frameworks for higher education qualifications</strong></td>
<td>A published formal structure that identifies a hierarchy of national qualification levels and describes the general achievement expected of holders of the main qualification types at each level, thus assisting higher education providers in maintaining academic standards. The QAA publishes the following frameworks: The</td>
</tr>
</tbody>
</table>
framework for higher education qualifications in England, Wales and Northern Ireland (FHEQ) and The framework for qualifications of higher education institutions in Scotland (FQHEIS). (QAA 2012)

Institutional agreement  The formal agreement between the OU and the partner institution, which sets out the responsibilities of each party.

Institutional approval  The process through which an institution is judged by a group of external peers to meet the principles set out in this handbook and to provide a satisfactory environment for the conduct of programmes leading to OU validated awards.

Institutional review  The process by which an institution is critically reviewed for the purposes of confirming that it continues to meets the University’s requirements.

Interim review  An activity to review the institution or its programmes between scheduled visits. The period of validation or institutional approval is in all cases subject to satisfactory outcomes from annual monitoring. If there is an unsatisfactory outcome or other cause for concern, an interim review may be required to look at specific concerns within a programme or at institutional level.

Learning outcome  What a learner is expected to know, understand and/or be able to demonstrate after completing a process of learning. (QAA 2012)

Level (or qualification level)  One of a series of defined points on a qualifications framework that are numbered in ascending order. Qualifications within the same level share characteristics and require similar achievement. Qualification levels in different frameworks can be compared.

Qualification levels are distinct from credit levels. (QAA 2012)

Memorandum of co-operation  Where a programme is jointly developed or delivered, or involves significant input from an external body, respective responsibilities should be set out in a memorandum of co-operation. The purpose of this is to define the means by which the academic standards of the programme will be maintained, to ensure that the collaborative arrangements are clearly set out and operate smoothly, and that clear channels of authority, accountability and executive action are identified.

Minimum entry standards  The minimum academic entry standards required of any student to register with the institution and the University, as set out in the University’s Handbook.
Module or Unit
A self-contained, formally structured, unit of study with a coherent and explicit set of learning outcomes and assessment criteria. Some institutions use the word 'course' to refer to individual modules. (QAA 2012).

Module Results Approval and Qualification Panel (MRAQCP)
Module Results Approval and Qualification Panel (MRAQCP) – the panel that ratifies the recommendations of all Examination Award Boards when satisfied that the approved regulations and correct procedures have been followed and appropriate academic standards upheld.

Partner institution
An Approved Institution (see above).

Professional, statutory and regulatory bodies (PSB)
Organisations that set the benchmark standards for, and regulate the standards of entry into, particular profession(s) and are authorised to accredit, approve or recognise specific programmes leading to the relevant professional qualification(s) for which they may have a statutory or regulatory responsibility.

Programme (of study)
An approved course of study that provides a coherent learning experience and normally leads to a qualification. (QAA 2012)

Programme revalidation (review)
The process whereby an existing programme of study is critically appraised at intervals of not more than five years, in order to confirm that it continues to meet the University’s requirements for validation.

Programme specification
Published statements about the intended learning outcomes of programmes of study, containing information about teaching and learning methods, support and assessment methods, and how individual units relate to levels of achievement. (QAA 2012)

Programme validation
See validation

QAA Code of Practice for Higher Education
Superseded by the UK Quality Code for Higher Education from the 2012-13 academic year.

Quality assurance
The systematic monitoring and evaluation of learning and teaching, and the processes that support them, to make sure that the standards of academic awards meet UK expectations, and that the quality of the student learning experience is being safeguarded and improved. (QAA 2012)

Quality Assurance Agency or QAA
The Quality Assurance Agency for Higher Education. Its purpose is to uphold quality and standards in UK universities and colleges.

Quality and Partnerships Manager (QPM)
Member of staff of The Open University who is responsible for managing the partnership with the institution.
<p>| (UK) Quality Code (for Higher Education) | A set of documents published by the QAA which set out the Expectations that all providers of UK higher education are required to meet and gives all higher education providers a shared starting point for setting, describing and assuring the academic standards of their higher education awards and programmes and the quality of the learning opportunities they provide. Providers use it to design their respective policies for maintaining academic standards and quality. |
| Quality enhancement | Taking deliberate steps at institutional level to improve the quality of learning opportunities. It is used as a technical term in QAA’s audit and review processes |
| Recognition/Accreditation of prior (experiential) learning (RPL/AP(E)L) | The identification, assessment and formal acknowledgement of learning and achievement that occurred at some time in the past (perhaps as the result of a previous course, self-directed study, or active experience) which is taken into account when admitting a student to a course of study. (QAA 2012) |
| Registration | The process by which a partner institution registers its students with The Open University for a validated award. |
| Revalidation | The process whereby an existing programme of study is critically appraised at intervals of not more than five years, in order to confirm that it continues to meet the University’s requirements for validation (see programme revalidation). |
| Subject benchmark statements (QAA) | A published statement that sets out what knowledge, understanding, abilities and skills are expected of those graduating in each of the main subject areas (mostly applying to bachelor’s degrees), and explains what gives that particular discipline its coherence and identity. The statements are consistent with the relevant generic qualification descriptors. (QAA 2012) |
| Transcript | The transcript provides a comprehensive verifiable record of students’ learning while they are studying, a formative statement that should help students to monitor their progress and plan their further academic development. |
| Validated award | An award of the University conferred upon students, following the successful completion of an approved programme. |
| Validated programmes | Programmes that have been validated through a process of external peer review by The Open University as being of an appropriate standard and quality to lead to Open University validated awards. |</p>

Appendix 5: Guidance on the content of student handbooks

Whilst recognising that partner institutions may wish to develop their own distinctive style and to present information to students in different ways, the University has a minimum content for all student handbooks for validated awards, which is indicated below.

It is worth bearing in mind that if the documentation does not enable a validation panel to confirm that the University’s minimum expectations are met, then institutions are likely to be asked to provide more information during validation events, and they will end up with more conditions of approval than they would like. This may delay the issuing of an approval letter and the registration of students for the validated award.

Information should be presented in a clear, accessible, student-friendly language. To avoid duplication of information, students should be clearly signposted to relevant institutional policy documents or referred to relevant web links.

Where a student handbook covers a set of related awards or modes of study, any special features must be clearly stated for each variation. For example, learning outcomes for validated exit awards should be specified in a positive language.

Programme specifications (item 7 below) will be subject to close scrutiny by validation panels and they may initially be stand-alone working documents that will be incorporated later in the final text once they have been approved by final validation panels. Institutions are strongly encouraged to use the University’s template for programme specifications, which is designed to be a concise description of the programme that is accessible to students, employers and other stakeholders.

Likewise, the University also has a template for module specifications, and it may be more convenient for institutions to have them as separate documents to be incorporated in the final text once they have been approved by final validation panels.

1. Welcome and introduction (institution and department)
2. Academic calendar (including term and assessment dates)
3. List of programme director and academic staff, their contact details and availability arrangements
4. List of support staff (technical and administrative)
5. Name, position and institution of the external examiner(s) involved in the programme
6. Introduction to the programme
- background, history, philosophy
- where a programme leads to professional body recognition (e.g., engineering, teaching, social work) or accreditation, this should be clearly set out in the definitive student handbook, to include clarification on how this may affect overseas students.
- attendance requirements
- opportunities available to students on completion of the programme (employment, further academic study, etc).

7. Programme specification
- overview/factual information
- programme aims and objectives
- learning outcomes, which should be linked to:
  - teaching methods
  - assessment strategy
  - programme structure (including information on exit awards)
  - curriculum map

8. Module specifications
The main headings are:
- factual information (module title, module tutor, type, level, credit value, notional learning hours)
- rationale and relationship with other modules
- aims of the module
- pre-requisite modules or specified entry requirements
- intended learning outcomes/teaching and learning strategy
- indicative content
- assessment strategy, assessment methods and their relative weighting
- mapping of assessment tasks to learning outcomes
- teaching staff associated with the module
- key reading list and other indicative texts
9. **Student support, guidance and advice**
   - induction arrangements
   - personal tutoring
   - study skills
   - careers advice
   - counselling
   - role of personal tutor
   - careers guidance at both institutional and programme level
   - counselling and student welfare
   - support for students with disabilities
   - financial advice and support
   - guide to the Virtual Learning Environment (VLE)

10. **Opportunities for personal development planning**

11. **Opportunities and support for study abroad**
   - rationale
   - criteria and approval processes for suitable placements
   - responsibility for finding and arranging placement
   - supervision arrangements
   - student responsibilities
   - supporting and feedback arrangements

12. **Work placement information**
   - rationale
   - criteria and approval processes for suitable placements
   - responsibility for finding and arranging placement
   - supervision arrangements
   - student responsibilities
   - supporting and feedback arrangements
13. Facilities and Services

- library resources
- computing facilities
- technical support and helpdesk
- catering Services
- multimedia.
- workshop, laboratory, studio or study areas and other specialist accommodation available to support the programme.
- equipment required to be provided by the student.

14. Assessment and progression regulations

Student handbooks should provide a clear explanation of the rules governing the assessment matters in a clear and succinct format that is accessible to students. This information should be conveyed in an accessible and jargon-free language. Some institutions may prefer to publish these regulations separately from student handbooks, in which case they must be circulated to all students. Where appropriate, the student handbook should refer students to any web links where the regulations can be found. Guidelines to students on progression and assessment should cover:

- Identification of all elements of assessment, including type, volume weighting and timings of assessment
- Minimum pass marks for modules
- Rules governing extension to submission deadlines
- Penalties for late submission or non-submission of work
- Process for requesting deferral of modules
- Assessment of work-based learning, where applicable
- Assessment of presentations and performance, where applicable
- Definitions and consequences of academic misconduct, including plagiarism
- Mechanisms for provision of feedback to students on performance, and the role of formative and summative assessment.
- Acceptable forms of academic referencing and citation
- Progression regulations
- Reassessment and re-sits
• Extenuating circumstances
• Appeals and complaints procedures
• Provision for students with special needs

15. **Dissertations and projects**
• Supporting arrangements
• In the case of dissertations, explicit criteria for viva-voce

16. **Determination of results**
• Assessment weightings for the overall scheme and within specific modules.
• How results are communicated
• Rules for determining degree classification, and for the award of honours, distinction, and merit, as applicable.
• Brief explanation on the role of assessment boards and external examiners

17. **Other institutional policies and regulations**
Some of the information below may be given in the form of general brief statements that refer students to separate generic institutional policy document.
• disability statement
• grounds and procedures for appeals
• equal opportunities statement
• data protection
• health and safety issues

18. **Student participation and evaluation**
• arrangements for student feedback and how the institution uses it.
• student representation on committees.
• registered student organisations.
• academic and professional organisations.

19. **General reading list (ie not module specific), including electronic resource.**
Appendix 6: Sample agenda for an institutional approval

The Open University

Sample institutional approval visit agenda

Day 1

12.00   Arrival of the panel at institution
12.15 - 15.00 Private panel meeting to:
• discuss a summary of initial panel member comments
• identify key issues arising from the documentation
• confirm the agenda for the meeting with college staff
• review of supplementary documents in base room (including documents such as Quality Code mapping)
(Lunch and refreshments to be provided)

15.00 - 16.00 Meeting with college senior management team including representatives from the governing body.
Discussions may include:
• institutional mission, strategic planning and development institutional governance, management and academic structures
• development of new academic regulations for the OU framework
• teaching, learning and assessment strategy
• policy on equal opportunities and diversity including support for students with disabilities
• staffing, staff appraisal, induction and development
• external partnerships

16.00 - 17.00 Tour of college facilities including VLE demonstration
17.00 - 17.30 Private panel meeting
17.30   Departure of the panel for the hotel
19.30   Panel dinner at hotel
## Day 2

14.00 - 15.00* Private panel meeting to formulate conclusions of the visit (tea and coffee to be provided)
15.00-15.30 Informal feedback to Institution on the panel’s recommendations to validation committee
15.30 Departure of the panel

Please note that the times and details of meetings may be subject to alteration during the visit.

* If a call back session is required this will commence at 14.00 with the timetable below being followed:

14.00 - 14.45 Call back session
14.45 - 15.45 Private panel meeting to formulate conclusions of the visit (tea and coffee to be provided)
15.45 - 16.15 Informal feedback to Institution on the panel’s recommendations to validation committee
16.15 Departure of the panel
Appendix 7: Requirements for programme documentation

Background document
The background document for validation and revalidation proposals will provide the context and rationale for the proposal, describing how it has involved consultation within the institution as well as students, employers and other external input. It will be produced specifically to facilitate the (re)validation process and to assist a panel that may not be familiar with the institution or the background to the proposal. It should be reflective and analytical. It will be treated as a confidential document. The University has identified minimum requirements for background documentation. The template for submission for validation is available here.

Critical appraisal (for revalidation proposals)
In the case of revalidations, the background document should also incorporate a critical appraisal of the success of the programme and its development in practice. The institution will draw on existing evidence to demonstrate the effectiveness of their mechanisms for managing and enhancing the programme.

The revalidation submission should include the rationale of any proposed modifications to the programme, such as the addition or replacement of new modules or pathways. This will take account of developments in the subject area that have taken place since the last (re)validation. The critical appraisal should also be informed by feedback from students, external examiners and other relevant external input during the approval period.

The Template for Critical Appraisal is available here.

Student handbook
A draft student handbook should describe details of all aspects of the proposed programme in accessible and student-friendly language. It will include a programme specification, details of all modules that comprise the programme, as well as regulations and resources for student support (see UK HE providers - advice on consumer protection law).

The University has identified minimum content for student handbooks, and more guidance can be downloaded from the validation website at student handbook content guidance.
Programme specification and curriculum map

The programme specification should provide a concise description of the programme’s aims and intended learning outcomes and the means by which these will be achieved and demonstrated. The specification will help students to understand how the teaching and learning methods enable the outcomes to be achieved and how the assessment methods enable achievement to be demonstrated. An indication will be given of the relationship between the programme and its study elements and any subsequent professional qualification or career path.

The expectations regarding student achievement and attributes described by the learning outcomes must be appropriate to the level of the award within the QAA Framework for HE qualifications.

Learning outcomes must also reflect the detailed statements of graduate attributes set out in QAA subject benchmark statements that are relevant to the programme/award.

A programme specification will be accessible to students, teaching staff, assessors, External Examiners, employers and the wider community. The University has a programme specification template that all institutions must use, and which can be downloaded from the validation website.

Institutions should map the learning outcomes set out in modules specifications against the intended learning outcomes for the programme as outlined in the programme specification, to ensure overall completeness and coherence. The curriculum map is included in the Programme Specification template.

Validated programmes delivered in other languages must have a programme specification both in English and in the language of delivery.

Module specifications

For the purposes of (re)validation, module specifications should be submitted as a separate document. As the (re)validation process is generally an iterative process, having the module specifications as one document makes updating easier.

There is a module specification template for module specifications that institutions must use and is available on the website.
Regulatory framework and institutional policies

In addition to the student handbook, the institution’s regulations and policies should be provided as separate documents. This includes any documents included in the student handbook either by means of a simple reference or a general statement, which includes a reference to where the full document can be found. It is accepted that this may lead to some duplication of information.

Material on institution-wide strategies and policies and procedures should be the same for all programmes considered for validation.

The policy and regulatory framework required for (re)validation submissions will typically comprise:

- **Admissions policy and regulations for the programme**: These will be in accordance with the University’s Regulations for validated awards of The Open University.

- **Assessment/progression policy and regulations**: These will be in accordance with the University’s Regulations for validated awards of The Open University.

- **Staff development policy**: This will be the institution’s staff development policy setting out how it operates at programme level. This should include information on:
  - staff appraisal
  - peer review or teaching
  - induction and mentoring of new staff
  - support to visiting and part-time staff
  - opportunities for internal workshops
  - staff involvement in subject networks.

- **Placement learning policies and regulations/study abroad regulations**: This should cover:
  - the role of supervisors/mentors
  - criteria for approval of placements
  - student support and information
  - student responsibilities and feedback
  - monitoring and evaluation of placement/study abroad opportunities.

- **Equality and diversity policies (covering both staffing and student matters)**: The University’s expectations regarding equality and diversity are set out in Section H.

The University expects institutions to have established internal procedures for formal approval of programme documentation. Submission documentation will be prepared by institutions in advance of preliminary (re)validation meetings and reviewed to take account of external input as part of the (re)validation process.
The University may nominate a representative (the process panel member (PPM)), who will offer comments relevant to validation during the development of the programme. The PPM will be a member of both the preliminary validation meeting organised by the institution and a final validation meeting organised by the University.

Whenever possible, the PPM should be a member of OU academic staff, although the important criterion is that the person nominated has specialist expertise relevant to the proposal.

The institution is invited to identify one external panel member – an institutional process panel member (IPPM) – for the preliminary validation panel who may also take part in the final validation, subject to approval by the University. The aim of this is to give an opportunity for institutions to have a ‘critical friend’ involved in the process of considering whether the programme is ready to be (re)validated and who can link between the preliminary and the final validation meetings.

Approval of IPPMs to sit on final validation panels will be subject to the submission of a CV to the QPM. The nomination should be submitted at an early stage, ideally in advance of the planning meeting. The following criteria will be taken into account:

- expertise relevant to the proposal
- impartiality – for example, the nominee will not have had formal links with the institution in the last five years as an external examiner or a former member of staff
- prior experience of teaching on programmes at the same level or above
- where appropriate, professional expertise from a relevant professional background
- individuals who have been engaged by the institution as external consultants for the proposal should not be nominated as process panel members.

Panel members will be asked to provide initial comments on issues for consideration and further information needed, a summary of which will be shared with the institution.

The University encourages observers nominated by the institution to overview the (re)validation process and, as appropriate, attend any meetings, except those with students.

Observers will not be decision-making members of the panel, but are encouraged to assist the panel by contributing factual information. If, however, a situation should arise where the participation of observers is likely to inhibit discussion or the formulation of decisions, the Chair has the discretion to ask observers to leave until recalled.

Observers are not normally members of the senior management of the institution or persons involved in the management or teaching of the programme under validation or revalidation. Observers may be invited when an institutional review and (re)validation of a programme take place concurrently, subject to the prior agreement of the Chair of the panel. When this happens, observers are normally external members of the institution’s Academic Board or its equivalent, or from the institution’s Governing Body.
Appendix 8: Sample agenda for the final (re)validation meeting

Institution
(Re)Validation of name of programme

date

<day and date>

<hotel venue>

18:00 Panel meeting to agree agenda for meetings during event, identify key issues and receive verbal reports from the Institutional process panel member.
19:45 Panel dinner at hotel

<day and date>

<venue>

08.30 Panel depart hotel
08:45 Panel arrives at the Institution
09:00 – 09.15 Private meeting of panel
09:15 – 10:15 Meeting with senior management to consider as appropriate:
- A brief introduction to <Institution> including an overview of the validated programmes
- Institutional context for the programme
- Academic organisation, management and planning, resource planning & programme staffing
- Quality assurance for the programme, including internal validation processes
- External consultation
- staffing, staff development and resources
- any remaining issues and future developments
10.15 – 11.45 **Meeting with programme team for <programme name>**

- programme development, organisation, aims and rationale
- programme content and structure, teaching and learning methods
- admission arrangements
- assessment strategy and methodology
- programme management, administration, review and improvement, including quality processes and programme monitoring
- research and staff development policies
- resource issues
- any other matters arising

11.45-12:00 Private meeting of panel

12:00 – 12:45 Tour of facilities

12.45 – 13.30 Lunch and meeting with students (from current student body)

- Student experience
- Representation
- Feedback
- Assessment
- Any other matters arising

13.30 – 14:15 **Private panel meeting** to discuss issues from meetings to date and in particular to decide if a call-back session is required; to agree conclusions and prepare any conditions and/or recommendations of approval.

Either

14:15 – 14.30 **Feedback to senior management and programme teams of conclusions**

14:30 Panel concludes

**OR**

14:15 – 15:00 **Further meetings with senior management/programme team** (if required)

15:00 – 15:30 **Private meeting of panel** to agree conclusions and prepare any conditions and/or recommendations of approval for the award.

15:30 – 15.45 **Feedback to senior management and programme team of conclusions**

15:45 Panel concludes

*These times and details may be subject to alteration on the day of the visit*

* tea/coffee/water available*
