Cisco networking (CCNA) T216

Presentation pattern October to June

Course description
As a Cisco Academy, The Open University can offer students the opportunity to study the Cisco Certified Network Associate (CCNA) programme. Cisco is a worldwide leader in networking for the internet, and students will use the latest online CCNA curriculum for most of their study. This course will provide them with the knowledge, understanding, and skills needed to configure a LAN/WAN using Cisco equipment. They will be provided with hands-on experience of configuring networks at four day schools (a compulsory element of the course). If students successfully complete this course, they will be able to go on and gain the industry recognised certification by taking the CCNA examination.

Person specification
The person specification for this course should be read in conjunction with the generic person specification for an associate lecturer at The Open University.

As well as meeting all the requirements set out in the generic person specification, you should have:
- successfully completed semesters 1–4 of CCNA (Cisco Certified Network Associate) training as an Academy Instructor.

It would be an advantage to have:
- a CCAI (Cisco Certified Academy Instructor).

Module related details - a full explanation can be found on the website

Credits awarded to the student for the successful completion of a module: 60
Number of assignments submitted by the student: 5
Method of submission for assignments: 2
Level of ICT requirements: 3
Number of students likely to be in a standard group: 20
Salary band: 7
Estimated number of hours per teaching week: 6
