Open Forum 1993 April Edition – Computing into the 1990s clip

Contributors in clip: Howard Stableford

Clip transcript:

[opening theme music]

Howard Stableford:
Britain's largest university is set to grow even larger. We look at new ways of exploring pictures. But first, a user-friendly guide to computing.

[incidental music]

Howard Stableford:
The microchip affects all our lives in one way or another. During some part of the day, most of us will use some form of computing technology.

One of the great success stories of The Open University is the way that it's made use of technology widely available in our homes. Televisions and videos, audio cassettes and radios have all had a huge impact in the delivery of teaching materials to students.
