

What are these skills cards for?

- To help teams to consider ways to embed skills for sustainable development in the students learning experience.
- To provide guidance on how the sustainable development skills connect with existing frameworks at the Open University.
- To support teams to consider how to adapt learning outcomes to connect with sustainable development skills.

What sustainability skills would Open University students most like to see included in their modules?

Problem Solving

Critical Thinking

Collaboration

Do we know what Open University students think about sustainability skills being embedded within their learning experiences?

Quotes taken from student feedback provided in the Sustainability CDSP activity and QOTM:

"There is an inherent need for a change in mindset when it comes to sustainability. Starting with ways of thinking ... It's not only about saving the environment, it's preparing the next generations for their future."

"Sustainability should be meaningfully embedded into learning."

Do we know how Open University students want to see sustainability embedded in their learning experiences?

Feedback summarised from Sustainability CDSP activity:

- Be explicit about how the skills that are being embedded relate to sustainability

Critical thinking competency: the ability to question norms, practices and opinions; to reflect on own one's values, perceptions and actions; and to take a position in the sustainability discourse.

Related Skills Card:
Critical Thinking 1

Anticipatory competency: the abilities to understand and evaluate multiple futures – possible, probable and desirable; to create one's own visions for the future; to apply the precautionary principle; to assess the consequences of actions; and to deal with risks and changes
