Open Research Online (ORO) & ORCIDS

bit.ly/OpenResearchOnlineORCIDs

1. ORO collects ORCIDs for the OU

ORCIDs (Open Researcher and Contributor IDs) are the de-facto standard for identifying people in research communications.

2. Disambiguate

ORCID IDs allow you, and systems, to disambiguate between like, or similar, names.

3. Authenticate your identity

Connect your ORCID ID to ORO to authenticate your identity with ORCID. This also tells the OU your ORCID ID.

4. Connect

Connect your ORCID ID to ORO to connect your publications with ORCID. Use your ORCID ID whenever you can to pass data across systems and reduce keystroke.

5. Mandates

ORCID IDs are increasing requested, or required, by publishers, funders and other bodies (e.g. Higher Education Statistics Agency).
