ORO update

STEM 2022/23

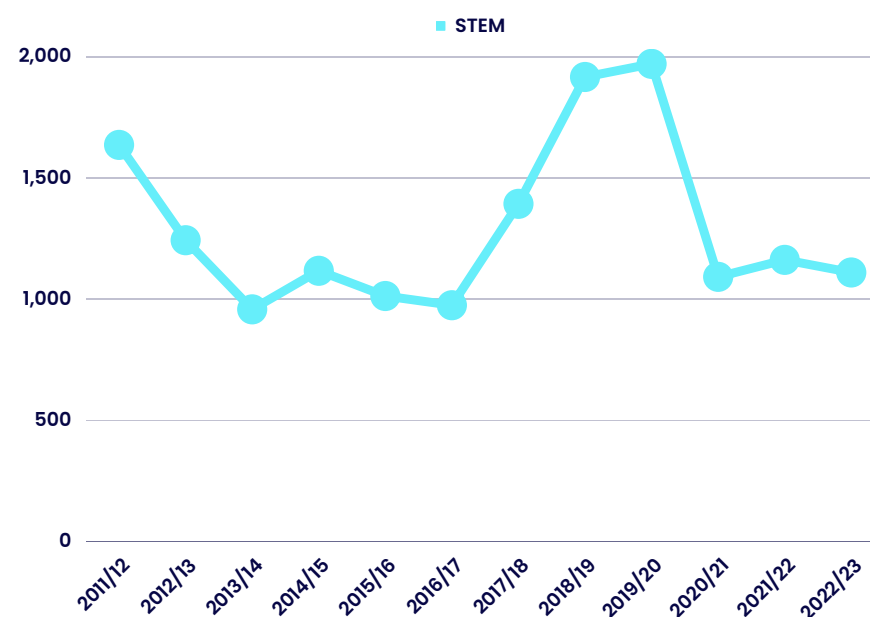

Papers are downloaded from ORO from across the world as the repository is indexed by web and academic search engines.

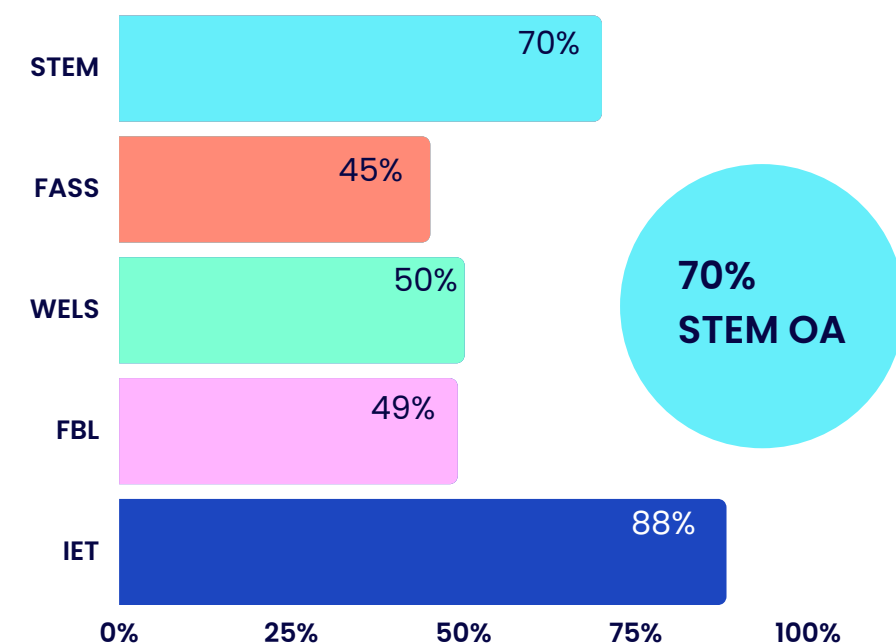

Downloads increase year on year as the repository grows and there is a larger number of papers to download.

Deposit data reflect the different faculty sizes and different publishing practices across academic disciplines.

Deposits vary year on year and are affected by REF cycles, deposit of backfill publications by new members of staff and digitisation projects.

Open Access is defined by the presence of a free to read paper in ORO.

Open Access percentage for the last year will be reduced as some papers will be under a publisher embargo.
