Stephan Korner, Professor of Philosophy at Yale and Bristol, discusses with Renford Bambrough, Fellow of St. John's College, Cambridge, the traditional problem of Universals, and Wittgenstein's contribution, in his later philosophy, towards solving the problem.

Professor Godfrey Vesey chairs the discussion.

Summary: The contributors discuss the problem of Universals and explore the light which Wittgenstein's work has thrown on the problem. Slightly opposing views of the value to the problem of Wittgenstein's contribution are held.

Seq.	Time.	Footage.	Sequence List.	Sound Cue
1	2.12	35	Godfrey Vesey explains the philosophical problem of universals and introduces the two contributors who will discuss the matter.	St. John's College
2	7.11	108	Vesey reads a passage from Wittgenstein's Blue Book dealing with the concept of 'having something in common'. Bambrough outlines why he thinks that Wittgenstein threw light on the problem of universals. Korner outlines his objections to Wittgenstein's ideas on this matter.	We'll discuss this
3	9.52	144	Vesey asks Körner to expand those parts of Wittgenstein's analysis of family ressemblance concepts which Körner considers incomplete. Körner does so, using as his argument the existence of borderline cases in some arrays of objects, their absence in oth He introduces the theory of continuous connection.	
4	11.24	177	Vesey asks Bambrough whether the latter has to disagree with Kerner's proposition. Bambrough makes his reservations, Korner replying.	Do you have to bad Wittgensteinian there.
5	15.36	217	The concept of 'having something in common' is discussed, Korner taking the view that it is not a particularly meaningful phrase, Bambrough an opposing viewpoint. An example is used (i.e.books).
