THE OPEN UNIVERSITY IN SCOTLAND’S OUTCOME AGREEMENT WITH THE SCOTTISH FUNDING COUNCIL 2022–2023
The Scottish Funding Council’s key priorities for Academic Year (AY) 2022–23 are:

- Fair access and transitions including ensuring the delivery of the Commission on Widening Access (COWA) 2026 and 2030 sector target and engagement with the SFC funded National Schools Programmes
- Quality learning and teaching
- Learning with impact – students are equipped and ready to take up appropriate employment in the future
- Student participation and engagement in their educational experience
- Coherent Learning Provision – how institutions are using data and intelligence and engaging with stakeholders to adapt, develop and align provision to meet the needs of business, industry and stakeholders
- Fair Work – what institutions are doing to deliver Fair Work practices for their employees and through their procurement
- Equalities and inclusion
- High-quality research and innovation
**Fair access and transitions**

People from deprived areas have fair access and are supported to succeed.

**Supporting the sector’s delivery of the Commission on Widening Access (COWA) targets**

1. Social justice and equality of opportunity are at the heart of everything The Open University does. The Open University (OU) has always offered an open entry policy whereby our students can study with us at undergraduate level with no requirement for previous qualifications.

2. We saw growth in the proportion of our undergraduate entrants living in the Scottish Index of Multiple Deprivation most deprived quintile (SIMD20) and two most deprived quintiles (SIMD40) to 18.9% and 40.6% respectively in AY 2021–22.

3. As in the past three years, we continue to attract more entrants in Full-Time Equivalent (FTE) terms from the most deprived quintile than the least deprived.

4. We are working towards a target of 20% of our undergraduate entrants living in the most deprived quintile (SIMD20) in AY 2022–23.

**Care experienced people have fair access and are supported to succeed.**

5. We exceeded our 2021/22 ambition for the proportion of entrants declaring care experience, with 77 undergraduate entrants with care experience registering last year. This has followed significant improvements to our data collection processes and we are projecting a further increase to this proportion in AY 2022–23.

6. Undergraduate entrants who declare care experience are consistently more likely than average to live in the most deprived quintile (SIMD20).

7. Unlike other Scottish universities, OU care experienced students are not eligible for the care experience bursary because they study part-time.

8. The Open University in Scotland’s Corporate Parenting Plan is published on our website.

**Prior learning is considered, and students are offered the best pathway for them.**

9. The Open University encourages learners to apply for credit transfer towards their OU qualification if they have studied before, even if they didn’t complete their previous study.
Transitions and pathways for students are supported and signposted.

10. We continue to focus on articulation, supporting learners progressing from Higher National Certificates (HNC) and Higher National Diplomas (HND) courses at Scottish Credit and Qualifications Framework (SCQF) Levels 7 and 8 into university undergraduate programmes. Our articulation routes are available nationwide, unrestricted by the geographical location of the student or their college.

11. Building directly on the HN study the student has undertaken, we offer routes to a range of degree programmes in specific subjects. Current named qualifications available as articulation routes include Social Science; Natural Sciences; Social Work; Health and Social Care; Healthcare Practice; Adult Nursing; Mental Health Nursing; Childhood and Youth Studies; Business Management (including Accounting, Marketing and Economics pathways); Sport, Fitness and Coaching; Engineering; and Computing and IT.

12. In addition to these named qualifications, the University’s unique Open Degree is available to all HN students, regardless of the HN subject they studied at college. This allows the student to gain credit for previous study, whilst building a degree programme tailored to their own pathway development needs or to the needs of their employer.

13. The Open University in Scotland works closely with partner colleges to review and maintain articulation agreements and direct college learners to opportunities for articulation with the OU.

14. Despite growth in absolute numbers, we saw a drop in the proportion of undergraduate entrants coming to the OU with an HN qualification in AY 2020–21. The proportion recovered somewhat in AY 2021–22 but remained below pre-pandemic levels. We project that this proportion is likely to drop again in AY 2022–23.

15. Having seen a fall in both numbers and proportion of HN entrants who transferred credit from their HN qualification in 2020/21, the proportion began to recover in AY2021–22, and we project that this recovery will continue in AY 2022–23.

16. In addition to our SCQF level 6 access modules, we use Open Educational Resources (OERs) to support learners into higher education. This allows them to start learning informally at their preferred level and pace, gradually building confidence and skills for learning. Our free learning platform, OpenLearn, also offers Badged Open Courses (BOCs) over a wide range of core subjects and professional competencies essential for the workplace.
Institutions work with schools, SFC funded programmes and local communities to support successful pathways and effective transitions for students.

17. The Open University in Scotland’s Young Applicants in Schools Scheme (YASS) allows students in the final year of secondary school to experience higher education level study in school alongside their other subjects. Students can choose from a range of high-quality modules at SCQF Level 7, which give them access to subjects which may not be available in their school. YASS outcomes are included in Insight, the Scottish Government benchmarking tool for the senior phase.

18. From AY 2020–21, the Scottish Funding Council (SFC) embedded the strategic funding for YASS within The Open University in Scotland’s main teaching grant. SFC provide an additional 103 funded places to The OU in Scotland, on condition that the University continues to run YASS. Student number registrations and participation by SIMD is monitored through the outcome agreement and the self-evaluation process. The headcount number of YASS entrants grew to an all-time high of 1,272 students in 2021/22 despite the impact of COVID on schools, with 22.7% of YASS entrants coming from the two most deprived SIMD quintiles.

19. We are seeing challenges to our engagement with schools due to changes in school personnel, industrial action and long-term fatigue post-pandemic so we do expect a small decline in the number of entrants participating in YASS in AY 2022–23.

20. We are keen to share our experience of providing YASS across Scotland in the development of the National Schools Programme.

Quality learning, teaching and support

21. The Open University has been a provider of distance learning for over 50 years and with our mission to be ‘open to people, places, methods and ideas’, we remain committed to using new and emerging technologies to make quality higher education accessible to more people around the world.

22. Most undergraduate modules have tutorial groups of 20 students. Making use of online teaching technologies, Associate Lecturers lead group tutorials and seminars to link up student groups across the country. Associate Lecturers are also contactable by phone, email, and via dedicated online tutor group forums.
23. The Open University in Scotland was delighted to have achieved 90% for overall student satisfaction, ranking joint first in Scotland, in the National Student Survey 2022. Office for Students have proposed changes to the survey in 2023 which may impact our ability to capture satisfaction data in Scotland and report on this within the outcome agreement process.

24. We have reported in our Self-evaluation Report on AY 2021-22 that there was an unprecedented increase in the completion rate of both our continuing undergraduates and entrants in 2019/20 due to mid-year changes to assessment and changes in student behaviour linked to the pandemic. 2020/21 completion rates for both groups have fallen back to a point midway between the 2019/20 and pre-pandemic levels.

25. Early data for 2021/22 suggests that completion rates for undergraduate entrants for the October 2021 presentation have fallen again due to an increase in students withdrawing from their studies before module end, from across nearly all demographic groups. Factors such as the cost-of-living crisis are impacting student behaviours and student time availability and will continue to have an impact going forward.

26. In response to these declines and to consolidate work already in flow across the four nations, the University has developed a Student Outcomes Continuous Improvement Portfolio to improve student outcomes. Some of the key pillar activities being undertaken this year include the scaling up of the use of predictive analytics by tutors to identify students who may be need of additional support, development of a consistent approach to induction, use of exit milestone qualifications to recognise success of all our students, and pilots within the readiness to study space to support students in beginning their studies on the right level for them. There is a lag between action on retention and impact showing in our data.

27. The Open University in Scotland has been working on a Personal Learning Adviser retention pilot project focused on students from the most deprived quintile, and we are scoping further work to enhance frontline support for students.

28. Unlike other Higher Education Institution (HEI’s), The Open University in Scotland is funded by Scottish Funding Council on student numbers at completion. As a result, all teaching grant received from SFC is directly linked to number of students successfully completing OU modules, across the student population.
Students are supported in their mental health and wellbeing.

29. Using the funding from Scottish Funding Council for mental health counselling, we offer a virtual therapy service to our students in Scotland. Students are referred by our Educational Advisors for an initial clinical assessment followed by access to one-to-one counselling sessions. We also have been able to employ a Mental Health Advisor (Casework) in Scotland as part of a team providing a specialist, one-to-one support service for students needing guidance on managing complex mental health difficulties or severe emotional distress alongside their studies.

30. The Open University works with mental health support partners such as the text service Shout 85258 and TalkCampus to provide help to our students. We also offer an OU Wellbeing app to suggest positive habits to help maintain good wellbeing.

31. The Open University introduced the Report + Support system in 2022, to provide an easy and confidential way to report incidences of bullying, harassment, discrimination, sexual misconduct or hate crime.

32. The Open University is committed to supporting the well-being of its students and staff. We recognise that a positive and collaborative approach to the management of physical and mental health difficulties is crucial to the success of our students and the optimal performance of our staff. The Open University’s Student and Staff Mental Health and Wellbeing Strategy was developed in line with the Universities UK #stepchange framework for mental health in higher education, and is available on The OU in Scotland website.

33. The Open University in Scotland launched its Student Mental Health Agreement (SMHA) in 2021 in partnership with the OU Students Association and with support from the National Union of Students Scotland’s Think Positive project. This agreement aligns with the University’s Student and Staff Mental Health and Wellbeing Strategy, setting out our joint commitment to work together to promote the mental wellbeing of our students.

Learning with impact

34. With three-quarters of our students in work while they study with us, and well over half of all part-time learners in Scotland, The Open University in Scotland is uniquely placed to support the skilling, reskilling and upskilling of Scotland’s workforce across the length and breadth of the country. The OU’s expertise in accessible, flexible, modular distance learning means that employers and learners can be offered high quality, adaptable, work-based learning solutions that meet the workforce development needs of employers and the
skills aspirations of individuals, regardless of where the workplace is based in Scotland.

35. The University takes advantage of its size and reach to develop vocational and work-based curriculum in partnership with organisations across a number of sectors; these are appropriate to the learning needs of the organisation and the individual. From bite-sized Continuing Professional Development (CPD) workshops to the shaping of specific qualifications, we work with employers to understand their work-based learning needs and to ensure that our students can make a meaningful impact on the Scottish economy and society.

36. The increasing use of Open Educational Resources (OERs) in the workplace has allowed experimentation using that methodology to support learning and we are working with employers to develop OERs as part of bespoke learning packages for their workforce, particularly for employees who require an introduction to or reacquainting with formal learning.

37. In 2022–23, we will maintain our strategic partnership with the STUC and Scottish Union Learning; building on our community outreach model to offer higher education to groups in the workplace. Typically, the participants are non-traditional learners.

38. We have developed a dedicated suite of free Employability badged courses on the OpenLearn website to help those facing new career choices.

39. Our Employability of Qualifiers Survey 2022, which aims to gather insight into the impact of OU study and the careers and employability success of OU students, was sent to students who completed a qualification in 2018/19. The survey results were as follows:

- 88% of respondents in Scotland agreed that OU study has/will help them achieve their career goals.
- 90% of respondents agreed that OU study has/will help them achieve their personal goals.

**Student participation and engagement in their educational experience**

40. The Open University’s [Student Charter](#), which was developed in partnership with the Students Association, sets out our aims for working together as a learning community, illustrates our shared values and what we can expect from each other.
41. The Open University in Scotland is passionate about ensuring the student voice is heard at all levels and helps inform our decision making. This is a core aspect of all teams’ activities, with development being led by our Access, Participation and Success team. The OU in Scotland actively participates in the OU’s Student Voice week each year with a Student Twitter Takeover and facilitating a ‘Big Blether’ focusing on study confidence and wellbeing.

42. The Open University in Scotland strongly believes that the student body is a key stakeholder in the development of policy and that its views and concerns should be acknowledged. Engagement is facilitated through The Open University in Scotland’s Student and Staff Engagement Group, which meets twice a year, and includes representation from students, Associate Lecturers, faculty staff, academic-related and support staff.

**Coherent learning provision**

43. The OU’s expertise and unique access, accessibility and delivery model give us a key role in supporting government ambitions in relation to economic recovery and social renewal. The OU is well placed to support the skilling, reskilling and upskilling of the workforce through our work-based and work-related learning routes and experience in short course, modular delivery, Massive Open Online Courses (MOOCs), microcredentials, open educational resources and lifelong learning. We believe that part-time study and flexible work-based education initiatives can play an important role in supporting the economic recovery.

44. The Open University presents microcredentials, qualifications and short courses on the FutureLearn platform. The OU sold its stakes in FutureLearn in November 2022 to Global University Systems (GUS). This provides welcome stability and continuity for the millions of learners globally that use the FutureLearn platform and secures the future of FutureLearn independently of OU ownership and funding. The OU will remain a partner of FutureLearn which means we will continue to present our existing paid course offer with no disruption to the learner experience.

45. We welcome the changes to the delivery of the Flexible Workforce Development Fund in AY 2022–23 that will increase the potential for eligible employers to access upskilling and retraining opportunities.

46. We will continue to fully utilise the SFC Upskilling Fund to develop, test and roll-out flexible skills-focused learning solutions, utilising our expertise in this area and working with partners and employers to ensure our provision is
employer-led and meets the needs of the Scottish economy and employers’ skills gaps.

47. We have paused recruitment to our Graduate Apprenticeships on Cyber Security and Software Development in AY 2022–23 due to issues of low take up. We will continue to support our Graduate Apprentices from the 2021–22 cohort and the Skills Development Scotland (SDS) –funded Graduate Apprentices from earlier cohorts through to the end of their qualification.

48. We continue to call for the development of a broader range of more flexible Graduate Apprenticeship frameworks that reflect the post-pandemic skills needs, e.g., social work, policing, nursing, and management at postgraduate level. Graduate Apprenticeships need to support the needs of small and medium-sized enterprises (SMEs), the public and third sector who cannot best take advantage of the programme as it currently stands.

49. We will continue to engage with SDS, SFC, Universities Scotland and the Strategic Board to ensure that the OU plays a central role in the development of the Future Skills agenda and to support programmes such as The Young Person’s Guarantee with flexible and quality skills provision.

50. The Open University in Scotland is actively involved in the South of Scotland Pathfinders work and represented on the Education & Skills Strategic Co-ordination Group. There are challenges for an organisation such as ours with national coverage to support numerous activities at a regional level.

**Fair work**

51. The Open University is an accredited Living Wage Foundation employer.

52. In August 2022, following extensive negotiations with the University and College Union (UCU), The Open University implemented new permanent contracts for its Associate Lecturers, in what was billed as the biggest decasualisation programme to take place in the higher education sector. While there is still more work to do to operationalise what has been agreed, OU tutors are now benefitting from enhanced financial and job security which includes additional annual leave and staff development allowances.

53. The Open University is proud to be listed as one of the Inclusive Top 50 UK Employers in 2022. This list brings together UK-based organisations that promote inclusion across all protected characteristics and throughout each level of employment within their organisation.

54. Our procurement vision and strategy support the University to achieve its strategic goals through the balanced consideration of quality, financial and
reputational stability, value, social responsibility and risk when acquiring goods and services from outside sources.

**Equalities and inclusion**

55. The Open University was founded to widen access to higher education, and we place social justice and equality of opportunity at the centre of all we do. The University is committed to extending opportunities for educational success to every potential student who wants to achieve their ambitions.

56. The Open University’s [Institutional Equality, Diversity and Inclusion (EDI) Plan](#) outlines our ambitions and provides support and guidance to drive positive change. It is designed to cover specific issues that impact the OU community so that all staff and students are empowered to promote equity, value diversity and foster an inclusive culture.

57. As required by the Public Sector Equality Duty and the specific requirements for Scotland, The Open University in Scotland published its [Public Sector Duty Report](#) on its website in April 2021.

58. The Open University was re-awarded its Athena SWAN Institutional Bronze status in 2021 and is aiming for an institutional Silver in the next submission.

59. The OU is currently developing a submission for a Race Equality Charter (REC) Bronze Award in 2024.

60. The Open University in Scotland offers a wide range of support services and facilities to enable learners with additional needs to succeed in their studies. These include course materials in alternative formats and are tested for compatibility with assistive software, as well as special arrangements for tutorials and examinations and, where appropriate, advice about funding. The proportion of our undergraduate entrants declaring a disability has grown steadily over time from 18.2% in 2017/18 to 21.1% in 2021/22, and we anticipate a further increase in AY 2022-23.

**High quality research and innovation**

61. The majority of The Open University’s research funding is from UK Research and Innovation, with the SFC allocating a small amount of University Innovation funding to The OU in Scotland. The Research Excellence Framework 2021 recognised the OU’s commitment to research and societal impact with 82% of its research impact assessed to be ‘world-leading’ (4*) or ‘internationally excellent’ (3*).
62. The OU has published a new Research Plan for 2022-27 which focuses on five activities:

- Open Societal Challenges
- The Next Generation
- Open Research
- Building On Our Strengths
- Improving Our Processes

63. The Open University in Scotland utilises the University Innovation Fund (UIF) Platform Grant from the Scottish Funding Council to maintain its knowledge exchange and innovation activities. An updated University Innovation Fund plan for AY 2022-23 is submitted alongside this Outcome Agreement.

Responding to the climate emergency

64. The Open University has committed to divestment from fossil fuels by 2023, decarbonising our energy supplies by 2030 and being ‘net zero’ by 2050 institutionally and across our supply chains. Our policies, statements, reports and guidance relating to sustainability are available on the OU website.

65. The Open University in Scotland complies with the Climate Change (Duties of Public Bodies: Reporting Requirements) (Scotland) Order 2015 and submitted its annual Climate Change report for 2020/21 to the Scottish Government in November 2022.

66. The Open University offers both a wide range of modules and qualifications relevant to climate change and sustainability, and careers information. The OU also provides a significant range of free informal learning for resources relevant to climate change on OpenLearn, iTunesU and YouTube. These channels reach millions of people beyond our own students. There are also online citizen science projects such as Treezilla, a project to map all Britain’s trees and iSpot, the community website for wildlife identification. The OU’s partnership with the BBC has delivered impactful programmes such as Green Planet with David Attenborough in 2022.
National measures are typically defined with conventional, full-time, student populations in mind and therefore often do not fully reflect the unique contribution The Open University (OU) makes in enabling flexible, part-time, non-linear and modular student journeys. Where appropriate, the OU and SFC have agreed a set of parallel bespoke measures in the tables below that align with national priorities and measures. Progress towards the agreed bespoke measures in the tables below, and other OU-specific targets, will continue to be shared with SFC via our annual Self-Evaluation Return.

The OU is funded by the SFC on full-time equivalent (FTE) completions rather than registrations, with no restriction on the number of registrations. To this end, the majority of our targets are based on proportion of FTE rather than FTE numbers which may fluctuate according to demand. We have used headcount for targets relating to the retention and progression of undergraduate degree entrants.
The Open University in Scotland saw significant growth in the number of Scottish-domiciled undergraduate entrants in 2020–21, reflecting a UK-wide recruitment surge related both to the pandemic and to our specific COVID response in Scotland. AY 2021–22 saw a return to 2019–20 levels of recruitment and early data for AY 2022–23 indicates a continuing small decline.
